**New House Planning & Idea Book** Alberta. Home and Community Design Branch,1983      Solar Home Design Manual for Cool Climates Shawna Henderson,Don Roscoe,2012-07-26 If you want an inexpensive environmentally sound source of energy for your home you need look no further than the sun Solar heat is not subject to rate increases is totally renewable pollution free and requires little or no technology It is here for you today and can easily provide up to 50% of your space and water heating requirements This is a book that simply and clearly explains the principles of using solar energy to heat your home Anyone building a new home or renovating an old one can incorporate one or several aspects of solar energy into their design Taking you through the process of designing a solar home from the ground up this manual is also a basic course in conservation and sustainable house design If you live in a heating climate meaning if you have space heating requirements for most of the year then this is an invaluable resource A house is the biggest single investment most of us will make in our lives the way it is built and how it operates can reflect a long term investment in both the building and the planet

**Eco-Homes** Doctor Jenny Pickerill,2016-01-15 It is widely understood that good affordable eco housing needs to be at the heart of any attempt to mitigate or adapt to climate change This is the first book to comprehensively explore eco housing from a geographical social and political perspective It starts from the premise that we already know how to build good eco houses and we already have the technology to retrofit existing housing Despite this relatively few eco houses are being built Featuring over thirty case studies of eco housing in Britain Spain Thailand Argentina and the United States Eco Homes examines the ways in which radical changes to our houses such as making them more temporary using natural materials or relying on manual heating and ventilation systems require changes in how we live As such it argues it is not lack of technology or political will that is holding us back from responding to climate change but deep rooted cultural and social understandings of our way of life and what we expect our houses to do for us      The City of the 21st Century ,1988
