the market The analysis compares the various policy positions of the relevant stakeholders in the two countries highlighting the ideologies of neo liberalism university autonomy and new managerialism These ideologies coexist in both the English and the Japanese university systems However the interpretations of these ideologies made by stakeholders the patterns of the interrelations between them and their contextualization as elements in the policy and stance of each stakeholder differ between England and Japan The book argues that convergence between the English and Japanese university systems is to a large extent explained in the transformation of the university system in England during the 1980s and the continuity of the Ministerial jurisdictional mechanism in Japan

the field drawing widely on international research but contextualised within recent UK wellbeing policy discourses The second part embeds the theory in a case study based on the author s own experience of trying to develop quality of life indicators within a local authority against the backdrop of increasing national policy interest in measuring happiness This accessible and informative book covering uniquely both practice and theory will be of great appeal to students academics and policy makers interested in wellbeing sustainable development indicators public policy community participation power and discourse
