## New Developments With Human And Veterinary Vaccines 25th Oholo Biological:

New Developments with Human and Veterinary Vaccines, 1980      *Adverse Effects of Pertussis and Rubella Vaccines*  
Institute of Medicine, Committee to Review the Adverse Consequences of Pertussis and Rubella Vaccines, 1991-02-01 Parents  
have come to depend on vaccines to protect their children from a variety of diseases. Some evidence suggests, however, that  
vaccination against pertussis (whooping cough) and rubella (German measles) is in a small number of cases associated with  
increased risk of serious illness. This book examines the controversy over the evidence and offers a comprehensively  
documented assessment of the risk of illness following immunization with vaccines against pertussis and rubella. Based on  
extensive review of the evidence from epidemiologic studies, case histories, studies in animals, and other sources of  
information, the book examines the relation of pertussis vaccines to a number of serious adverse events, including  
encephalopathy and other central nervous system disorders, sudden infant death syndrome, autism, Guillain-Barre syndrome,  
learning disabilities, and Reye syndrome. The relation of rubella vaccines to arthritis, various neuropathies, and  
thrombocytopenic purpura. The volume, which includes a description of the committee's methods for evaluating evidence and  
directions for future research, will be important reading for public health officials, pediatricians, researchers, and concerned  
parents.      **A Shot in the Dark** Harris Livermore Coulter, Barbara Loe Fisher, 1991-01-01 Every week tens of thousands of
