The Unseen Politics of Public Housing Tiffany Gayle Chenault, 2015-08-15 The Department of Housing and Urban Development HUD emphasizes the word community for building economic development citizen participations and revitalization of facilities and services in urban and rural areas Resident Councils are one way to develop and build community among residents of public housing Despite HUD stressing community building in public housing and investing money and policies around it there are some resident councils that are not fulfilling the expectations of HUD This book is my attempt to describe and explain HUD's expectations for the resident council as an active agent for community building and the actual practices of the resident council I argue that policies and regulations of resident councils which exist to support the effectiveness of the resident council in creating and implementing community

building self sufficiency and empowerment activities and goals in a public housing community may do more harm than good The Department of Housing and Urban Development invests and spends billions on Public Housing Programs 6 6 billion in 2013 The majority of the 1 2 million people who live in public housing do not live in large urban areas with thousands of people confined to a certain space The majority of public housing units 90% have fewer than 500 units These smaller units and the people that live in them tend to go unnoticed This ethnographic case study focuses on explaining and understanding the factors and constraints that exist between HUD s expectations for the resident council as an active agent for community building and the actual practices of the resident council To explain the disjunction in fact to determine if such disjunctions identified by Rivertown council members are real Using the tenets of Critical Race Theory allows us to understand what forces either real or imagined structural or cultural prevent the resident council from being an effective agent for change in the public housing community

The Affordable Housing Reader J. Rosie Tighe, Elizabeth J. Mueller, 2013 The Affordable Housing Reader brings together classic works and contemporary writing on the themes and debates that have animated the field of affordable housing policy as well as the challenges in achieving the goals of policy on the ground The Reader aimed at professors students and researchers provides an overview of the literature on housing policy and planning that is both comprehensive and interdisciplinary It is particularly suited for graduate and undergraduate courses on housing policy offered to students of public policy and city planning The Reader is structured around the key debates in affordable housing ranging from the conflicting motivations for housing policy through analysis of the causes of and solutions to housing problems to concerns about gentrification and housing and race Each debate is contextualized in an introductory essay by the editors and illustrated with a range of texts and articles Elizabeth Mueller and Rosie Tighe have brought together for the first time into a single volume the best and most influential writings on housing and its importance for planners and policy makers

Cityscape ,2004 **Where the Other Half Lives** Sarah Glynn, 2009-05-20 Housing has become a hot topic The media is filled with stories of individual housing hardship and of major property related financial crises of crippling personal debts rundown social housing homelessness mass demolition spiralling prices unaffordability and global recession This book links all of these through a radical analysis that puts housing at the heart of critical economic and political debate The authors show that these problems arise from the fact that houses are no longer seen primarily as homes for living in but rather as a source of profit Case studies from the UK the US and other western countries are set into a overview of how housing has changed over the last few decades The book also examines campaigns for better housing and explores possibilities for a different approach to this most fundamental of human needs

movements styles and building practices across traditional geographic and cultural boundaries The Neoliberal City Jason Hackworth, 2014-01-15 The shift in the ideological winds toward a free market economy has brought profound effects in urban areas The Neoliberal City presents an overview of the effect of these changes on today's cities The term neoliberalism was originally used in reference to a set of practices that first world institutions like the IMF and World Bank impose on third world countries and cities The support of unimpeded trade and individual freedoms and the discouragement of state regulation and social spending are the putative centerpieces of this vision More and more though people have come to recognize that first world cities are undergoing the same processes In The Neoliberal City Jason Hackworth argues that neoliberal policies are in fact having a profound effect on the nature and direction of urbanization in the United States and other wealthy countries and that much can be learned from studying its effect He explores the impact that neoliberalism has had on three aspects of urbanization in the United States governance urban form and social movements The American inner city is seen as a crucial battle zone for the wider neoliberal transition primarily because it embodies neoliberalism's antithesis Keynesian egalitarian liberalism Focusing on issues such as gentrification in New York City public housing policy in New York Chicago and Seattle downtown redevelopment in Phoenix and urban landscape change in New Brunswick NJ Hackworth shows us how material and symbolic changes to institutions neighborhoods and entire urban regions can be traced in part to the rise of neoliberalism

Geography and Social Justice in the Classroom Todd W. Kenreich, 2013 The rise of critical discourses in the discipline of geography has opened up new avenues for social justice Geography and Social Justice in the Classroom brings together contemporary research in geography and fresh thinking about geography's place in the social studies curriculum The book's main purposes are to introduce teachers and teacher educators to new research in geography and to provide theoretical and practical examples of geography in the curriculum The book begins with the premise that power and inequality often have spatial landscapes With the tools and concepts of geography students can develop a critical geographic literacy to explore the spatial expressions of power in their lives communities and the wider world The first half of the book introduces new research in the field of geography on diverse topics including the social construction of maps as instruments of power and authority The second half of the book turns the readers attention to geography in the P 12 classroom and it highlights how geography can enable teachers and students to explore issues of power and social justice in the classroom Through critical geographic literacy educators can boldly position themselves and

their students as advocates for a more just world Coming of Age in the Other America Stefanie DeLuca, Susan Clampet-Lundquist, Kathryn Edin, 2016-04-19 Recent research on inequality and poverty has shown that those born into low income families especially African Americans still have difficulty entering the middle class in part because of the disadvantages they experience living in more dangerous neighborhoods going to inferior public schools and persistent racial inequality Coming of Age in the Other America shows that despite overwhelming odds some disadvantaged urban youth do achieve upward mobility Drawing from ten years of fieldwork with parents and children who resided in Baltimore public housing sociologists Stefanie DeLuca Susan Clampet Lundquist and Kathryn Edin highlight the remarkable resiliency of some of the youth who hailed from the nation's poorest neighborhoods and show how the right public policies might help break the cycle of disadvantage Coming of Age in the Other America illuminates the profound effects of neighborhoods on impoverished families The authors conducted in depth interviews and fieldwork with 150 young adults and found that those who had been able to move to better neighborhoods either as part of the Moving to Opportunity program or by other means achieved much higher rates of high school completion and college enrollment than their parents About half the youth surveyed reported being motivated by an identity project or a strong passion such as music art or a dream job to finish school and build a career Yet the authors also found troubling evidence that some of the most promising young adults often fell short of their goals and remained mired in poverty Factors such as neighborhood violence and family trauma put these youth on expedited paths to adulthood forcing them to shorten or end their schooling and find jobs much earlier than their middle class counterparts Weak labor markets and subpar postsecondary educational institutions including exploitative for profit trade schools and under funded community colleges saddle some young adults with debt and trap them in low wage jobs A third of the youth surveyed particularly those who had not developed identity projects were neither employed nor in school To address these barriers to success the authors recommend initiatives that help transform poor neighborhoods and provide institutional support for the identity projects that motivate youth to stay in school They propose increased regulation of for profit schools and increased college resources for low income high school students Coming of Age in the Other America presents a sensitive nuanced account of how a generation of ambitious but underprivileged young Baltimoreans has struggled to succeed It both challenges long held myths about inner city youth and shows how the process of social reproduction where children end up stuck in the same place as their parents is far from inevitable The Business of Black Power Laura Warren Hill, Julia Rabig, 2012 Explores business development in the Black power era and the centrality of economic goals to the larger black freedom movement The Business of Black Power emphasizes the centrality of economic goals to the larger black freedom movement and explores the myriad forms of business development in the Black power era This volume charts a new course for Black power studies and business history exploring both the business ventures that Black power fostered and the impact of Black power on the nation's business world Black activists pressed business leaders

corporations and various levels of government into supporting a range of economic development ventures from Black entrepreneurship to grassroots experiments in economic self determination to indigenous attempts to rebuild inner city markets in the wake of disinvestment They pioneered new economic and development strategies often in concert with corporate executives and public officials Yet these same actors also engaged in fierce debates over the role of business in strengthening the movement and some African Americans outright rejected capitalism or collaboration with business The ten scholars in this collection bring fresh analysis to this complex intersection of African American and business history to reveal how Black power advocates or those purporting a Black power agenda engaged business to advance their economic political and social goals They show the business of Black power taking place in the streets boardrooms journals and periodicals corporations courts and housing projects of America In short few were left untouched by the influence of this movement Laura Warren Hill is assistant professor of history at Bloomfield College Julia Rabig is a lecturer at Dartmouth College
