## Reporting Desk for New Drugs

### What is the Reporting Desk for New Drugs?

The Reporting Desk for New Drugs is a large-scale national surveillance study in the Netherlands, which is coordinated by the Trimbos Institute. Through this surveillance study, data are collected about new psychoactive substances in the Netherlands. The Reporting Desk for New Drugs reports on which new psychoactive substances had been discovered to be present in the Netherlands, and if available, in which quantities these new psychoactive substances have been detected on the illicit drug market during the last year.

Commissioned by the Ministry of Health, Welfare and Sports of the Netherlands

**Organization:** The Reporting Desk for New Drugs assembles, analyzes, and reports on data collected by a variety of organizations in the Netherlands about the production, trade, and consumption of new psychoactive substances. The Customs Laboratory of the Netherlands and the Netherlands Forensic Institute provide data about seized new psychoactive substances that have been sent to their laboratories for analysis. The Drugs Information and Monitoring System (DIMS) provides data about new psychoactive substances that have been detected in consumer samples submitted for laboratory analysis at a drug checking service<sup>1</sup>. The Monitor Drug-related Incidents (MDK) and the Dutch Poisons Information Centre (DPIC) share data about adverse health-related events related to the use of new psychoactive substances. Additional information about new psychoactive substances being used in the Netherlands is also collected from pre-selected online discussion boards about drugs.

**Application:** The annual report from the Reporting Desk for New Drugs is used by the Ministry of Health, Welfare and Sports in the Netherlands and the Coordination point for Assessment and Monitoring new drugs (CAM) to assess the distribution and possible risks associated with the sale, transport, and use of new psychoactive substances in the Netherlands.

### What are new psychoactive substances?

The European Monitoring Centre for Drugs and Drug Addiction (EMCDDA) defines new psychoactive substances as "substances of abuse, either in a pure form or a preparation, that are not controlled by the 1961 Single Convention on Narcotic Drugs or the 1971 Convention on Psychotropic Substances, but which may pose a public health threat"<sup>2</sup>. The Reporting Desk for New Drugs focuses on substances that have been produced in and introduced to the illicit drug market for their psychoactive properties since the early 2000s.

A few substances, such as 2C-B, GHB/GBL, DMT, and ketamine, have also been included in the Reporting Desk for New Drugs. These substances are being monitored by the European Monitoring Centre for Drugs and Drug Addiction under the framework of the European Joint Action on new synthetic drugs.

#### New psychoactive substance groups

New psychoactive substances are usually classified according to their chemical structure or pharmacological properties. These classifications include:

- Synthetic cannabinoids
- Cathinones
- Phenethylamines
- Tryptamines
- Piperazines
- Other new psychoactive substances:
  - arylcyclohexylamines
  - synthetic opioids (i.e. fentanyl derivatives)
  - new benzodiazepines

<sup>1</sup>Currently, there is no nationwide surveillance system for new psychoactive substances in the Netherlands, which means that under-reporting of all new psychoactive substances is likely. However, the information from the Reporting Desk for New Drugs gives an indication of the situation regarding new psychoactive substances being present in the Netherlands on the illicit drug market.
