New Education Policy:

New Education Policy and Development Challenge Maitreya Balsara, 1996 *Globalizing Education Policy* Fazal Rizvi, Bob Lingard, 2009-12-04 Rizvi and Lingard's account of the global politics of education is thoughtful, complex and compelling. It is the first really comprehensive discussion and analysis of global trends in education policy, their effects, structural and individual, and resistance to them. In the enormous body of writing on globalisation, this book stands out and will become a basic text in education policy courses around the world. Stephen J Ball, Karl Mannheim Professor of Sociology of Education, Institute of Education, University of London, UK. In what ways have the processes of globalization reshaped the educational policy terrain? How might we analyse education policies located within this new terrain, which is at once local, national, regional and global? In *Globalizing Education Policy*, the authors explore the key global drivers of policy change in education and suggest that these do not operate in the same way in all nation states. They examine the transformative effects of globalization on the discursive terrain within which educational policies are developed and enacted, arguing that this terrain is increasingly informed by a range of neo-liberal precepts which have fundamentally changed the ways in which we think about educational governance. They also suggest that whilst in some countries these precepts are resisted to some extent, they have nonetheless become hegemonic and provide an overview of some critical issues in educational policy to which this hegemonic view of globalization has given rise, including devolution and decentralization, new forms of governance, the balance between public and private funding of education, access and equity, and the education of girls, curriculum, particularly with respect to the teaching of English language and technology, pedagogies and high stakes testing, and the global trade in education. These issues are explored within the context of major shifts in global processes and ideological discourses currently being experienced and negotiated by all countries. The book also provides an approach to education policy analysis in an age of globalization and will be of interest to those studying globalization and education policy across the social sciences. *Handbook of Education Policy Research* Janelle Scott, 2025-07-17 The second edition of the *Handbook of Education Policy Research*, the largest volume published in AERA's history, addresses a variety of policy and contextual issues in early childhood, K-12 and postsecondary education that have received extensive empirical attention during the past 15 years. With the pandemic and social turmoil as a backdrop, the editors build on the breadth and depth of the first edition while expanding the scope of the project to include subjects, methods, theories and analyses that have contributed powerfully to the study of education policy and politics in the 2010s and 2020s. The field has become more comprehensive and inclusive, and the authors represent a diversity of racial, ethnic and gender identities and intellectual and disciplinary orientations. Most chapters come from multiple authors, reflecting the multi-sourced development of research in education policy since the first volume was published. This compilation consists of 70 chapters and nine commentaries that map past, present and future directions of the field and richly attend to critical issues of interest to students, researchers, policy makers and practitioners.

The New Limits of Education Policy Roger Benjamin, 2012-01-01 Using a political economy framework to analyze the current problems facing US post secondary education The New Limits of Education Policy tackles the questions surrounding the future of higher education This study provides an explanation as to why improvement of teaching and learning is not a high priority for the stakeholders involved Roger Benjamin explains why heightened recognition by the State of the importance of human capital in the knowledge economy will create the external conditions that will in turn create the need for an altered incentive system for these stakeholders He goes on to make a case for additional positive incentives that would reward behavior that improves teaching and learning The political economy framework used here suggests that post secondary education is a common pool problem CPP that may soon become a permanent crisis a tragedy of the commons The popular consensus that the post secondary education sector the venue for enhancing human capital is not doing a good enough job is now combined with the prospect of continued rising costs and declining resources for colleges and universities Anticipating a national debate about the CPP Roger Benjamin emphasizes the need for evidence based decision making to assist leaders in improving quality and reducing costs The New Limits of Education Policy is an eye opening critical read for anyone with a vested interest in the future of higher education including policymakers administrators and students and scholars of economics and public policy
