complex situation as a former colony and a rising empire America strove to forge a new identity based on the biological findings of fresh scientific fields the so called pseudosciences In their travel texts American travel writers wished to revive their ties with the Old Norse world embarking on trips which aimed to link the discovery of Vinland by the Vikings with the nineteenth century rediscovery of the Old Norse culture by Victorian and American scholars This book explores American perceptions of the Nordic countries which contributed to the construction of the nineteenth century American national identity The concepts of Nordic unity and the Americanisation of Northern Europe in response to the increasing immigration from Southern and Eastern Europe are connected to American travellers parallel attempt to reflect upon the Nordic societies from a utopian perspective
