The European Garden Flora Flowering Plants James Cullen, Sabina G. Knees, H. Suzanne Cubey, J. M. H. Shaw, 2011-08-11
The European Garden Flora is the definitive manual for the accurate identification of cultivated ornamental flowering plants. Designed to meet the highest scientific standards the vocabulary has nevertheless been kept as uncomplicated as possible so that the work is fully accessible to the informed gardener as well as to the professional botanist. This new edition has been thoroughly reorganised and revised bringing it into line with modern taxonomic knowledge. Although European in name the Flora covers plants cultivated in most areas of the United States and Canada as well as in non tropical parts of Asia and Australasia. Volume 4 contains accounts of 82 families mostly rather small but including the Primulaceae with *Primula* as its largest genus and Ericaceae with *Rhododendron* the largest genus in the Flora.

New Illustrated Encyclopedia of Gardening - Vol 1 T. H. Everett, 1964 **The Illustrated Dictionary of Gardening** George Nicholson, 1889 **New Illustrated Encyclopedia of Gardening** Thomas H. Everett, 1960 **New Illustrated Encyclopedia of Gardening** T. H. Everett, *The New Illustrated Encyclopedia of Gardening* T. H. Everett, 1960 New Illustrated Encyclopedia of Gardening Thomas H. Everett, Greystone Press, The Bamboos of the World D. Ohrnberger, 1999-01-29

Bamboos constitute one of a few select categories of plants which are taxonomically related, very rich in species and of vital economic and ecological importance. Since the early 20th century the accepted number of species of bamboos world wide has tripled. However until now information was scattered through numerous often not easily available publications. *The Bamboos of the World* is the first comprehensive taxonomic as well as horticultural reference work that provides basic information on bamboos world wide whether they are wild or cultivated, well known or rather unknown. The work based on bamboo literature facilitates access to further data by citation and a comprehensive bibliography. Among the main data included are botanical names with synonyms and geographical distribution of genera and species varieties with their distinctive characters, common bamboo names, plant introductions to the West, plant size and uses. The distribution of genera is mapped. *The Bamboos of the World* presents a wealth of essential information in an accessible and structured manner. It gives the opportunity to check under what names and where relevant information on any bamboo can be found. For the researcher with management and development interests it provides a convenient means of basing bamboo resource on a sound understanding of generic and species relationships with names that appear in earlier literature put into context. The work should prove to be invaluable for those interested in the morphology, taxonomy, distribution and cultivation of bamboos. It should support botanical, forestry, horticultural and ecological research, training and resource management.
