The Rhetoric of the Human Sciences John S. Nelson, Allan Megill, Deirdre N. McCloskey, 1987 Opening with an overview of the renewal of interest in rhetoric for inquiries of all kinds this volume addresses rhetoric in individual disciplines mathematics anthropology psychology economics sociology political science and history Drawing from recent literary theory it suggests the contribution of the humanities to the rhetoric of inquiry and explores communications beyond the academy particularly in women's issues religion and law The final essays speak from the field of communication studies where the study of rhetoric usually makes its home The Oxford Handbook of Political Psychology Leonie Huddy, David O. Sears, Jack S. Levy, 2003-07-31 Political psychology applies what is known about human psychology to the study of politics It examines how people reach political decisions on topics such as voting party identification and political attitudes as well as how leaders mediate political conflicts and make foreign policy decisions The Oxford Handbook of Political Psychology gathers together a distinguished group of scholars from around the world to shed light on these vital questions Focusing first on political psychology at the individual level attitudes values decision making ideology personality and then moving to the collective group identity mass mobilization political violence this fully interdisciplinary volume covers models of the mass public and political elites and addresses both domestic issues and foreign policy Now with new material providing an up to date account of cutting edge research within both psychology and political science this is an essential reference for scholars and students interested in the intersection of the two fields *Ibss: Political Science: 1987* British Library of Political and Economic Science, 1991 IBSS is the essential tool for librarians university departments research institutions and any public or private institutions whose work requires access to up to date and comprehensive knowledge of the social sciences **The Politics of Postmodernity** Gary Brent Madison, 2001-04-30 This volume outlines in a clear and coherent manner the implications for political theory that are inherent in philosophical hermeneutics It demonstrates how hermeneutical theory provides the ultimate philosophical justification for democratic practice and universal human rights Exploring Interstitiality with Mangroves Kate Judith, 2022-12-15 Mangroves thrive in intertidal zones where they gather organisms and objects from land river and ocean They develop into complex ecologies in these dynamic in between spaces Mobilising resources drawn from semiotic materialism and the environmental humanities this book seeks a form of social theory from the mangroves that is to think interstitiality from the perspective of mangroves themselves exploring the crafty and tenacious world making they are engaged in Three sections weave together theory science and close observation responding to calls within the environmental humanities for detailed attention to interactions in marginal spaces and those of interpretative tension It examines interstitiality by considering theories of difference relationality and reflexivity in the context of mangrove socioecological materialities drawing on influential writers such as Michel Serres Jacques Derrida Deborah Bird Rose Donna Haraway Brian Massumi and Maurice Merleau Ponty as theoretical touchstones Exploring Interstitiality with Mangroves is a lyrically crafted

Politics and Ambiguity William E. Connolly, 1987 In a series of stimulating essays William E. Connolly explores the element of ambiguity in politics He argues that democratic politics in a modern society requires if it is to flourish an appreciation of the ambiguous character of the standards and principles we cherish the most Connolly's work lucidly presented and intellectually challenging will be of interest to students and scholars of political science philosophy rhetoric and law and to all whose interests include the connections between contemporary epistemological arguments and politics and more broadly between thought and language Connolly criticizes the ways in which contemporary politics extends normalization into various areas of modern existence He argues against this trend for an approach that would provide relief from the rigid identity formations that result from normalization In supporting his thesis Connolly shows how the imperative for growth must be relaxed if normalizing pressures are to be obviated His however is not the familiar antigrowth argument rather he ties his thesis to his general antinormalization argument asking how one could create an ethic that would sustain itself when the growth imperatives are relaxed Connolly's chapters on the work of other thinkers including Michel Foucault Jürgen Habermas Richard Rorty and Charles Taylor are linked with his main theme as he shows how various tendencies in the philosophy of the social sciences and in political theory aid and abet the normalizing tendency His analyses of Rorty and Taylor are especially important Connolly shows the significance of antifoundationalism Rorty's contribution to the debate on epistemology while providing a compelling critique both of Rorty's stance and Taylor's alternative to it Especially important to Connolly's thesis is the ontology on which it rests He shows how the endorsement of an ontology of discordance within concord a view that all systems of meaning impose order on that which was not designed to fit neatly within them can support a more democratizing process His final chapter Where the Word Breaks Off vindicates the ontology of discordance which has governed the argument throughout the text Throughout these essays Connolly builds a consistent argument for the politicalization of normalization disclosing forms of normalization where others have seen unproblematic modes of communication and problem solving Original in concept and bold in presentation Connolly's work will form the basis for considerable debate in the several disciplines it serves

Self/Power/Other Romand Coles, 2019-01-24 Romand Coles here explores the writings of Augustine Foucault and Merleau-Ponty in order to fashion an ethos that emphasizes the value of dialogical relationships between the self and others In his view each of these thinkers has made significant contributions that must figure in any reconsideration

of the relationship between the self ethics and power Whereas Augustine saw depth as the dimension of freedom and truth according to Coles s reading Foucault regarded depth as that dimension in which we rout out the other and constitute ourselves in light of hegemonic norms implanted deep within us After drawing out those aspects of Foucault s thought which point toward a dialogical artistic ethics Coles explores Merleau Ponty s philosophy of depth arguing that it elucidates the intercorporeality of the world in a way that emphasizes the value of our dialogical relations with different others In conclusion he brings the three thinkers together to assess their rhetorical and philosophical similarities and differences and to argue against the tendency to see all post modern thought as nihilistic and incapable of developing an ethico political stance Coles s highly original work seeks to provide an alternative to the positions that have structured most recent debate in political philosophy Thus his book points up difficulties in both the individualist and the communitarian readings of politics and ethics even as it seriously explores the ethical dimensions and possibilities of post modernist thought His attempt to develop an ethos based on a specific conception of selves and the world enables him to cast provocative light on the continuing dialogue between rationalists and relativists about the nature of both selves and our social and political institutions

The Politics of Social Research Professor Martyn Hammersley, 1995-03-09 Is social research political Should it be political What are the implications of the politicization of social research Recent years have seen a growing range of challenges to the idea that research should be governed by the principle of value neutrality Critical feminist antiracist and postmodernist analyses have argued that social research is intrinsically political In this stimulating and often controversial book Martyn Hammersley weighs the arguments offered in support of these positions He considers the fundamental issues that the debate raises about the nature of social research its political dimensions and its contemporary relevance At the same time he provides a robust defence of value neutrality as a constitutive principle of social research and makes a reassessment of the role of research in modern societies Praise for *The Politics of Social Research* For anyone interested in the nature of social research who has enough grasp of the issues to access the text this book is a must British Journal of Educational Psychology All in all Hammersley has produced a text which provides us with much to think about As I have said certain chapters will no doubt attract considerable debate Almost all of the chapters could stand alone but the broad political theme used to bring chapters and topics together works well almost always Local Government Studies Not only is Hammersley a leading exponent of sociological research he is also a key writer and thinker on the problems of undertaking research This collection some of which has been published elsewhere

Law, Hermeneutics and Rhetoric Francis J. Mootz Iii,2016-04-22 Mootz offers an antidote to the fragmentation of contemporary legal theory with a collection of essays arguing that legal practice is a hermeneutical and rhetorical event that can best be understood and theorized in those terms This is not a modern insight that wipes away centuries of dogmatic confusion rather Mootz draws on insights as old as the Western tradition itself However the essays are not antiquarian or merely descriptive because hermeneutical and rhetorical philosophy have undergone important changes over the millennia To return to hermeneutics and rhetoric as touchstones for law is to embrace dynamic traditions that provide the resources for theorists who seek to foster persuasion and understanding as an antidote to the emerging global order and the trend toward bureaucratization in accordance with expert administration violent suppression or both

Shaping Science with Rhetoric Leah Ceccarelli,2010-11-15 How do scientists persuade colleagues from diverse fields to cross the disciplinary divide risking their careers in new interdisciplinary research programs Why do some attempts to inspire such research win widespread acclaim and support while others do not In *Shaping Science with Rhetoric* Leah Ceccarelli addresses such questions through close readings of three scientific monographs in their historical contexts Theodosius Dobzhansky's *Genetics and the Origin of Species* 1937 which inspired the modern synthesis of evolutionary biology Erwin Schrödinger's *What Is Life* 1944 which catalyzed the field of molecular biology and Edward O Wilson's *Consilience* 1998 a so far not entirely successful attempt to unite the social and biological sciences She examines the rhetorical strategies used in each book and evaluates which worked best based on the reviews and scientific papers that followed in their wake Ceccarelli's work will be important for anyone interested in how interdisciplinary fields are formed from historians and rhetoricians of science to scientists themselves

The Limits of Neoliberalism William Davies,2016-11-16 Brilliant explains how the rhetoric of competition has invaded almost every domain of our existence Evgeny Morozov author of *To Save Everything Click Here* In this fascinating book Davies inverts the conventional neoliberal practice of treating politics as if it were mere epiphenomenon of market theory demonstrating that their version of economics is far better understood as the pursuit of politics by other means Professor Philip Mirowski University of Notre Dame A sparkling original and provocative analysis of neoliberalism It offers a distinctive account of the diverse sometimes contradictory conventions and justifications that lend authority to the extension of the spirit of competitiveness to all spheres of social life This book breaks new ground offers new modes of critique and points to post neoliberal futures Professor Bob Jessop University of Lancaster Since its intellectual inception in the 1930s and its political emergence in the 1970s neoliberalism has sought to disenchant politics by replacing it with economics This agenda setting text examines the efforts and failures of economic experts to make government and public life amenable to measurement and to re model society and state in terms of competition In particular it explores the practical use of economic techniques and conventions by policy makers politicians regulators and judges and how these practices are being adapted to the perceived failings of the neoliberal model By picking apart the defining contradiction that arises from the conflation of economics and politics this book asks to what extent can economics provide government legitimacy Now with a new preface from the author and a foreword by Aditya Chakraborty

Social Media and Digital Politics James Jaehoon Lee,Jeffrey Layne Blevins,2024-08-29 Informed by critical theory this book employs Social Network Analysis SNA to examine the ever increasing impact that social media has

on politics and contemporary civic discourse In just the past decade social media platforms have been at the forefront of political discord that played out in the January 6th insurrection the expulsion of a US President from major social media platforms the attempted regulation of social media in various states and the takeover of Twitter now X by one of the richest and arguably most financially influential persons in the world This book examines these phenomena through a comprehensive and in depth exploration of their meaning and implication for democratic society Informed by SNA James Jaehoon Lee and Jeffrey Layne Blevins examine several types of social and political commentary on one of the most influential social media networks and argue that the use of emotional appeals in these posts about social and political topics degrades the quality of civic discourse and encourages the abandonment of reasoning in democratic self governance A timely and vital text for upper level students and scholars in a variety of disciplines from media and communication studies journalism and digital humanities to social network analysis political science and sociology The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The Practice of Theory Michael F. Bernard-Donals, 1998-06-04 Though theory has become a common language in the humanities in recent years the relation between theoretical speculation and its practical application has yet to be fully addressed In *The Practice of Theory* Michael Bernard Donals examines the connection between theory and pedagogy at the level of practice He asks how such a practice works not only to change the way we read and

speaking with one another but also the conditions in which these activities become possible Bernard Donals argues that the most sophisticated practice linking pedagogy to theory is rhetoric but the version of this tradition in thinkers like Rorty and Fish is never broad enough The conception of rhetoric he proposes instead is linked to other human and natural sciences The practice of theory investigates the degree to which a materialistic rhetoric can reinvigorate the link between theory teaching and practice and offers a sustained reflection on the production of knowledge across a broad range of contemporary disciplines **The Handbook of Organizational Rhetoric and Communication** Oyvind Ihlen, Robert L.
