Media and the Politics of Culture Nickesia S. Gordon, 2008 There is a great deal of discussion about media globalization particularly television especially as it is being driven by the spread of satellite technology and cable While certain schools of thought view this trend as promoting cultural heterogeneity and the diversification of programme content

this book argues otherwise It discusses the influence of globalization on Jamaica s television industry Specifically it looks at how market liberalization globalization s twin force has lead to government divestment of the television sector and increased private ownership and consolidation within this sector It revisits the cultural imperialism debate within the context of media globalization and locates Jamaica s position within this milieu It suggests that old concerns relating to cultural imperialism are still relevant in new ideas such as cultural proximity and programme modeling The book also discusses the implications that increased private ownership of television media in Jamaica have for public broadcasting services especially in an age of consolidation Finally the book examines current media policies and discusses whether or not they are adequate to address the present media environment within which the market model of media management encourages anti competitive behaviour among media firms

International Handbook on Globalisation, Education and Policy Research Joseph Zajda, 2005-03-17. The aim of this Handbook is to present a global overview of developments in education and policy change during the last decade. It has the objective of providing both a strategic education policy statement on recent shifts in education and policy research globally and offers new approaches to further exploration, development, and improvement of education and policy making. The Handbook attempts to address some of the above issues and problems confronting educators and policy makers globally. Different articles seek to conceptualize the ongoing problems of education policy formulation and implementation and provide a useful synthesis of the education policy research conducted in different countries and practical implications. The Handbook, by focusing on such issues as the OECD 2001 model of the knowledge society and associated strategic challenge and deliverable goals, OECD 2001, 139 UNESCO-driven lifelong learning paradigm and its relevance to education policy makers globally, different models of policy planning and equity questions that are raised by centralization, decentralization, diversity, uniformity, and curriculum standardization issues, the crises of educational quality, the debate of standards and excellence, and good and effective teaching, will contribute to a better and more holistic understanding of the education policy and research nexus, offering possible strategies for the effective and pragmatic policy planning and implementation at the local, regional, and national levels.

Migration and the Globalisation of Health Care John Connell, 2010-01-01. The international migration of health workers has been described by Nelson Mandela as the poaching of desperately needed skills from underprivileged regions. This book examines the controversial recent history of skilled migration and explores the economic and cultural rationale behind this rise of a complex global market in qualified migrants and its multifaceted

outcomes John Connell pays particular attention to the increase in demand for migrants in more developed countries due to the complex ramifications of aging and new opportunities and expectations He illustrates how globalization has linked sub Saharan Africa to Europe and North America and created new demand in Japan for international migrants from China and isolated island states The long established skill drain with its impact on household relations and negative consequences for health care is carefully balanced against new flows of remittances the return of skills and complex regional changes Wide ranging policy interventions and greater social justice have been challenged by the rise of the competition state and limitations to economic growth in the global south This comprehensive and definitive analysis of the global migration of health workers will prove an essential resource for academics and research students in health and social policy and in the various disciplines that relate to migration including sociology economics and geography
