Pro-Family Politics and Fringe Parties in Canada Chris MacKenzie, 2014-05-14 Pro Family Politics and Fringe Parties in Canada explores the organizational and ideological nature of political parties that are initially formed to do the work of social movements Specifically it examines the development of the Family Coalition Party of British Columbia FCP from its origins as a group of alienated Social Credit Party members to its rebirth as the Unity Party of British Columbia and through its struggles as a marginal political entity along the way While addressing the FCP's relationship to the larger North American pro family movement Chris MacKenzie also deftly demonstrates how the party can be seen as organizationally congruent with its ideological antithesis the Green Party Basing his findings on seven years of field research he identifies the obstacles that political parties involved in social movement work must overcome in order for them to achieve their goals He concludes that despite their invaluable contribution to democracy such party movements have limited political institutionalization Consequently their only realistic goal may be to merge their ideals with those of another larger political body This book makes a substantial contribution to our understanding of the genesis development and impact of political party movements in Canada Moreover it provides useful insight into the dynamics and issues that make up the current pro family movements in Canada and the United States

New Managerialism Spencer Zifcak, 1994 An extended comparative analysis of British and Australian public administration It charts the history of two reform programmes which in the past decade have been central to the British and Australian governments drive to introduce a more managerially oriented administration

Political and Economic Analysis of State-Owned Enterprise Reform Huiming Zhang, 2021-07-29 In revisiting the forty year history of reforms to China's state owned enterprises SOE the book assesses the experiences of this

process of reform and scrutinizes how this has helped advance the country's economy overall. The author finds that China's SOE reform not only commits to institutional innovation within the corporation in terms of operating mechanisms, management structure, legal organization and the economic system of the enterprise but that it is also underpinned by a series of policies that highlight an increasing market orientation. The measures have given rise to a benign interaction between enterprise reform and market development while switching the SOE's role from appendages of government organs under a planned economic system to more autonomous entities that integrate public ownership and the market economy. In this regard, SOE reform's success in constructing a modern enterprise system serves as the micro foundation and core of an improved socialist market economic system. The book will appeal to academics and students interested in political economy and the Chinese economy with particular reference to SOE reform and the recent economic transition in China.
