Politics And Old Age Older Citizens And Political Processes:

Politics and Old Age: Older Citizens and Political Processes in Britain John A. Vincent, Guy Patterson, Karen Wale, 2024-11-01 This title was first published in 2001 Older people have been characterized by two mutually contradictory stereotypes One the one hand they have been portrayed as a powerful lobby growing demographically and able to demand large redistributions of the nation s income in their direction On the other hand they have been typified as a marginalized group at high risk of poverty and exclusion and in a political context largely powerless This book examines using original research conducted by the Older People and Politics Project OPPOL within Exeter University s Sociology Department the reality of the impact of the increasing number of older people on the British political process The project had three main investigative concerns how effective are pressure groups and lobbyists for older people how is the power and influence of older people perceived by older people themselves and the general public and how are politicians responding to older people and their needs

The Political Participation of Older People in Europe A. Goerres, 2009-03-26 The first comparative analysis of the political behaviour of older people using evidence from 20 European democracies In contrast to younger people across European societies older people do not behave uniformly For political participation in later life it matters where and when individuals have grown up and in which country they become old

The Evolution of British Gerontology Miriam Bernard, Mo Ray, Jackie Reynolds, 2020-04-01 Half a century of UK gerontology research theory policy and practice are under the spotlight in this landmark critical review of the subject that places the country s achievements in an international context Drawing on the archives of the British Society of Gerontology and interviews with dozens of the most influential figures in the field it provides a comprehensive picture of key developments and issues and looks to the future to plot new directions in thinking This is the story of the remarkable progress of gerontology told through the eyes of those who have led it

John A. Vincent, 2003 Recent decades have seen a fundamental change in the age structure of many Western societies This book provides an overview of the key issues **Aging, Globalization and Inequality** Jan Baars, Dale Dannefer, Chris Phillipson, Alan Walker, 2016-11-03 This book is a major reassessment of work in the field of critical gerontology providing a comprehensive survey of issues by a team of contributors drawn from Europe and North America The book focuses on the variety of ways in which age and ageing are socially constructed and the extent to which growing old is being transformed through processes associated with globalisation The collection offers a range of alternative views and visions about the nature of social ageing making a major contribution to theory building within the discipline of gerontology The different sections of the book give an overview of the key issues and concerns underlying the development of critical gerontology These include first the impact of globalisation and of multinational organizations and agencies on the lives of older people second the factors contributing to the social construction of later life and third issues associated with diversity and inequality in old age arising through the effects of cumulative advantage and disadvantage over the life course These different themes are analysed using a variety of theoretical perspectives drawn from sociology social policy political science and social anthropology **Aging Globalization and Inequality** brings together key contributors to critical perspectives on aging and is unique in the range of themes and concerns covered in a single volume The study moves forward an important area of debate in studies of aging and thus provides the basis for a new type of critical gerontology relevant to the twenty first century

Routledge International Handbook of Diversity Studies Steven Vertovec, 2014-11-20 In recent years the concept of diversity has gained a leading place in academic thought business practice and public policy worldwide Although variously used diversity tends to refer to patterns of social difference in terms of certain key categories Today the foremost categories shaping discourses and policies of diversity include race ethnicity religion gender disability sexuality and age further important notions include class language locality lifestyle and legal status The Routledge Handbook of Diversity Studies will examine a range of such concepts along with historical and contemporary cases concerning social and political dynamics surrounding them With contributions by experts spanning Sociology Anthropology Political Science History and Geography the Handbook will be a key resource for students social scientists and professionals It will represent a landmark volume within a field that has become and will continue to be one of the most significant global topics of concern throughout the twenty first century *Long Lives Are for the Rich* Jan Baars, 2023-07-26 *Long Lives Are for the Rich* is the title of a silent ominous program that affects the lives of millions of people In all developed countries disadvantaged and especially poor people die much earlier than the most advantaged During these shorter lives they suffer ten to twenty years longer from disabilities or chronic disease This does not happen accidentally health inequalities including those between healthy and unhealthy life styles are mainly caused by social inequalities that are reproduced over the life course This crucial function of

the life course has become painfully visible during its neoliberal reorganization since the early 1980s Studies about aging over the life course from birth to death show the inhumane consequences as people get older In spite of the enormous wealth that has been piled up in the US for a dwindling percentage of the population there has been growing public indifference about the needs of those in jobs with low pay and high stress but also about citizens from a broad middle class who can hardly afford high quality education or healthcare However this ominous program affects all recent mortality rates show that all Americans including the rich are unhealthier and dying earlier than citizens of other developed countries Moreover the underlying social inequalities are tearing the population apart with nasty consequences for all citizens including the rich Although the public awareness of the consequences has been growing neoliberal policies remain tempting for the economic and political elites of the developed world because of the enormous wealth that is flowing to the top All this poses urgent questions of social justice Unfortunately the predominant studies of social justice along the life course help to reproduce these inequalities by neglecting them This book analyzes the main dynamics of social inequality over the life course and proposes a theory of social justice that sketches a way forward for a country that is willing to invest in its greatest resource the creative potential of its population **Contemporary Approaches to Public Policy** B. Guy Peters,Philippe

Zittoun,2016-05-25 This book considers a range of contemporary approaches to public policy studies These approaches are based on a number of theoretical perspectives on decision making as well as alternative perspectives on policy instruments and implementation The range of approaches covered in the volume includes punctuated equilibrium models the advocacy coalition framework multiple streams approaches institutional analyses constructivist approaches behavioural models and the use of instruments as an approach to public policy The volume concludes with a discussion of fundamental issues of democracy in public policy *International Bibliography of Political Science* British Library of Political and Economic
