Politics In Time History Institutions And Social Analysis:

Politics in Time Paul Pierson, 2011-09-19 This groundbreaking book represents the most systematic examination to date of the often invoked but rarely examined declaration that history matters. Most contemporary social scientists unconsciously take a snapshot view of the social world. Yet the meaning of social events or processes is frequently distorted when they are ripped from their temporal context. Paul Pierson argues that placing politics in time, constructing moving pictures rather than snapshots, can vastly enrich our understanding of complex social dynamics and greatly improve the theories and methods that we use to explain them. *Politics in Time* opens a new window on the temporal aspects of the social world. It explores a range of important features and implications of evolving social processes: the variety of processes that unfold over significant periods of time; the circumstances under which such different processes are likely to occur; and above all, the significance of these temporal dimensions of social life for our understanding of important political and social outcomes. Ranging widely across the social sciences, Pierson's analysis reveals the high price social science pays when it becomes ahistorical. And it provides a wealth of ideas for restoring our sense of historical process. By placing politics back in time, Pierson's book is destined to have a resounding and enduring impact on the work of scholars and students in fields from political science, history, and sociology to economics and policy analysis.

The Oxford Handbook of Time and Politics Klaus Goetz, 2024 The Oxford Handbook on Time and Politics is the first major publication that surveys time-centered research in political science across its sub-disciplines. As such, it integrates and consolidates an emergent body of knowledge but also aims to inspire future scholarship. The Handbook highlights that paying systematic attention to time in political analysis yields questions and insights that are of relevance to a very broad range of political scientists working within different theoretical, methodological, and epistemological traditions. The Handbook covers comparative politics and government, public policy, international relations, and political theory. Its authors are drawn from more than a dozen countries.

The Politics of Work-Family Policy Reforms in Germany and Italy Agnes Blome, 2016-11-25 One of the fundamental challenges facing modern welfare states is the question of work-family reconciliation. An increasing share of mothers work, but many European welfare states do not adequately support the dual earner model, especially in southern Europe. After 2005, German policy makers transformed the nature of Germany's family policy regime through a number of legislative measures, whilst Italy, a country with many similarities, witnessed little change. Using a multi-methods approach, this book addresses the puzzle of why Germany was able to implement far-reaching reforms in this policy area after a long impasse and Italy was not. As such, it delivers a broad systematic account of these reforms and sheds light on why similar reforms were not also adopted in other similar welfare states at the same time. More generally, it contributes to understanding the determinants of welfare policy change in modern European welfare states. This text will be of key interest to scholars, students, and professionals working on topics linked to European politics, welfare, and work-family policies, comparative politics, social policy, and more broadly to

political science and gender studies Philosophy, Politics, and Austrian Economics Daniel J. D'Amico, Adam G. Dismantling Solidarity Michael A. McCarthy, 2017-02-01 Why has old age security become less solidaristic and increasingly tied to risky capitalist markets Drawing on rich archival data that covers more than fifty years of American history Michael A McCarthy argues that the critical driver was policymakers reactions to capitalist crises and their political imperative to promote capitalist growth Pension development has followed three paths of marketization in America since the New Deal each distinct but converging occupational pension plans were adopted as an alternative to real increases in Social Security benefits after World War II private pension assets were then financialized and invested into the stock market and since the 1970s traditional pension plans have come to be replaced with riskier 401 k retirement plans Comparing each episode of change Dismantling Solidarity mounts a forceful challenge to common understandings of America s private pension system and offers an alternative political economy of the welfare state McCarthy weaves together a theoretical framework that helps to explain pension marketization with structural mechanisms that push policymakers to intervene to promote capitalist growth and avoid capitalist crises and contingent historical factors that both drive them to intervene in the particular ways they do and shape how their interventions bear on welfare change By emphasizing the capitalist context in which policymaking occurs McCarthy turns our attention to the structural factors that drive policy change Dismantling Solidarity is both theoretically and historically detailed and superbly argued urging the reader to reconsider how capitalism itself constrains policymaking It will be of interest to sociologists political scientists historians and those curious about the relationship between capitalism and democracy

European Politics Klaus H Goetz, Peter Mair, Gordon Smith, 2013-09-13 This book arises out of a specially commissioned issue of West European Politics marking the journal s 30th anniversary It examines the profound changes in the European political landscape over the last three decades including the fall of Communism progressive European integration territorial restructuring public sector reforms at European national regional and local levels changes in democratic participation protest elections political communication political parties and party competition and challenges to the welfare state The book also discusses how political science has responded to these changes in terms of its substantive focus concepts methods and theories Many of the 17 contributions included identify important challenges for the future including those stemming from EU integration the

The Politics of Representation in the Global Age Peter A. Hall, Wade Jacoby, Jonah Levy, Sophie Meunier, 2014-04-07 How has the process of political representation changed in the era of globalization The representation of interests is at the heart of democracy but how is it that some interests secure a strong voice while others do not While each person has multiple interests linked to different dimensions of his or her identity much of the existing academic literature assumes that interests are given prior to politics by a person's socioeconomic institutional or cultural situation This book mounts a radical challenge to this view arguing that interests are actively forged through processes of politics The book develops an analytic framework for understanding how representation takes place based on processes of identification mobilization and adjudication and explores how these processes have evolved over time Through a wide variety of case studies the chapters explore how actors identify their interests mobilize them into action and resolve conflicts among them **The Case for Case Studies** Jennifer Widner, Michael Woolcock, Daniel Ortega Nieto, 2022-05-26 This book seeks to narrow two gaps first between the widespread use of case studies and their frequently loose methodological moorings and second between the scholarly community advancing methodological frontiers in case study research and the users of case studies in development policy and practice It draws on the contributors' collective experience at this nexus but the underlying issues are more broadly relevant to case study researchers and practitioners in all fields How does one prepare a rigorous case study When can causal inferences reasonably be drawn from a single case When and how can policy makers reasonably presume that a demonstrably successful intervention in one context might generate similarly impressive outcomes elsewhere or if massively scaled up No matter their different starting points disciplinary base epistemological orientation sectoral specialization or practical concerns readers will find issues of significance for their own field and others across the social sciences This title is also available Open Access *Handcuffs and Chain Link* Benjamin Gonzalez O'Brien, 2018-07-25 *Handcuffs and Chain Link* enters the immigration debate by addressing one of its most controversial aspects the criminalization both of extralegal immigration to the United States and of immigrants themselves in popular and political discourse Looking at the factors that led up to criminalization Benjamin Gonzalez O'Brien points to the alternative approach of the Immigration Reform and Control Act of 1986 and how its ultimate demise served to negatively reinforce the fictitious association of extralegal immigrants with criminality Crucial to Gonzalez O'Brien's account thus is the concept of the critical policy failure a piece of legislation that attempts a radically different approach to a major issue but has shortcomings that ultimately further entrench the approach it was designed to supplant The IRCA was just such a piece of legislation It highlighted the contributions of the

undocumented and offered amnesty to some while attempting to stem the flow of extralegal immigration by holding employers accountable for hiring the undocumented. The failure of this effort at decriminalization prompted a return to criminalization with a vengeance leading to the stalemate on immigration policy that persists to this day.

De-Centering State Making Jens Bartelson, Martin Hall, Jan Teorell, 2018. Bridging the gap between international relations and comparative politics, this book transposes Eurocentric theories and narratives of state making to new historical and geographical contexts in order to probe their scope conditions. In doing this, the authors question received explanations of the historical origins and geographical limits of state making, questioning the unilinear view of the emergence of the modern state and the international system. Theoretically and methodologically eclectic, the volume explores a range of empirical cases not often discussed in the literature.

Advances in Comparative-Historical Analysis James Mahoney, Kathleen Thelen, 2015-07-02. This book situates comparative historical analysis within contemporary debates in political science and explores the latest theoretical and conceptual advances.

Ordering Violence Paul Staniland, 2021-12-15. In *Ordering Violence*, Paul Staniland advances a broad approach to armed politics, bringing together governments, insurgents, militias, and armed political parties in a shared framework to argue that governments' perception of the ideological threats posed by armed groups drive their responses and interactions. Staniland combines a unique new dataset of state group armed orders in India, Pakistan, Burma, Myanmar, and Sri Lanka with detailed case studies from the region to explore when and how this model of threat perception provides insight into patterns of repression, collusion, and mutual neglect across nearly seven decades. Instead of straightforwardly responding to the material or organizational power of armed groups, Staniland finds regimes assess how a group's politics align with their own ideological projects. Explaining, for example, why governments often use extreme repression against weak groups even while working with or tolerating more powerful armed actors, *Ordering Violence* provides a comprehensive overview of South Asia's complex armed politics embedded within an analytical framework that can also speak broadly beyond the subcontinent.

Memory, Politics and Identity C. McGrattan, 2012-10-10. The question of how to move beyond contentious pasts exercises societies across the globe. Focusing on Northern Ireland, this book examines how historical injustices continue to haunt contemporary lives and how institutional and juridical approaches to dealing with the past often give way to a silencing consensus or re-marginalising victims.

Responsive States Andrew Karch, Shanna Rose, 2019-11-28. The US Constitution did not establish a clear division of responsibilities between the national government and state governments, so the distribution of policymaking authority is subject to constant renegotiation and debate. When national lawmakers introduce policy initiatives that implicate the states in important ways, why do state leaders sometimes respond with strong support and other times with indifference or outright hostility? Moving beyond the conventional story that state officials simply want money and autonomy from their national counterparts, this book explains how the states' responses over the short, medium, and long term are shaped by policy design, timing, and the interaction

between the two Reaching across different historical eras with in depth case studies of policies such as Superfund the No Child Left Behind Act and the Patient Protection and Affordable Care Act the book shows how federalism has influenced and continues to influence the evolution of American public policy

The Oxford Handbook of Comparative Environmental Politics Jeannie Lynn Sowers, Stacy D. VanDeveer, Erika Weinthal, 2023 Including 42 chapters organized across 9 sections The Oxford Handbook of Comparative Environmental Politics explores some of the most important environmental issues through the lens of comparative politics including energy climate change food health urbanization waste and sustainability The chapters delve into more traditional forms of comparative environmental politics CEP the political economy of natural resources and the role of corporations and supply chains while also showcasing new trends in CEP scholarship particularly the comparative study of environmental injustice and intersectional inequities The Handbook highlights scholarship from a broader range of regions and includes approaches from political science anthropology sociology geography gender theory law human rights and development studies
