of government involvement in the regulation of new telecommunication technologies *A Normative Theory of the Information Society* Alistair S. Duff, 2012-03-12 There is a clear need for a systematic integrative and rigorous normative theory of the information society In this book Duff offers a prescriptive theory to help to guide the academic and policy communities as they debate the future shape of emerging post industrial information based societies He argues that information policy needs to become anchored in a left liberal philosophy which foregrounds a feasible permutation of the core ideals of freedom equality and brotherhood The information society if it is to be worth having at all cannot be allowed to be largely the outcome of the free play of market forces and technological determinism The social structure including the information economy must be subjected to a regulatory axiological system as explicated by some leading proponents of social democracy This text will be of interest to scholars and students at the cutting edge of information studies journalism and media computer science sociology politics philosophy management and law **Humane Politics and Methods of Inquiry**

Ithiel de Sola Pool, 2017-07-12 Ithiel de Sola Pool was a distinguished scholar of the political process and one of the most original thinkers in the development of an integrated social science This volume focuses upon his contributions to the development of research methods that deepen our understanding of human behavior The book is divided into five parts treating the analysis of communications computer simulation forecasting network theory and the social sciences in political contexts The first part considers the problems and possibilities of analysis raised by the unprecedented quantity of data made available by widespread and improved communications technology what should be counted and how should inferences be made Part two explores computer simulation in the study of presidential election patterns and how it can provide in depth analyses of crisis situations in history Part three focuses on strategies for predicting the future of international politics and methods to forecast the impacts of new communications technologies while part four offers a rigorous analysis of domestic and global contact networks and the so called small world phenomenon Part five is concerned with external challenges to the use of social science to create more humane politics including the question of value neutrality ideology deconstructive critical theory and threats by government to the health of universities In a concluding essay Lloyd Etheredge draws upon Pool's work to discuss several new ways in which the methods treated in this volume can be applied to contemporary social change

Apprehending Politics Marco Calavita, 2012-02-01 This groundbreaking book examines the significance of the news media for the political beliefs and behavior of contemporary Americans Relying on original in depth interviews with members of the group known as Generation X Marco Calavita analyzes the memories and understandings of these individuals political development dating back to childhood Specifically he focuses on the developmental significance of news media engagement in the context of institutions and phenomena like family peers schooling and popular culture Calavita succeeds where others have failed at exploring the inevitably contextualized and ecological nature of individual political development and the specific roles of news media in that development *Apprehending Politics* illuminates the subtle but fundamental power of news

media in who we are politically and how we got that way *New Common Ground* Amitai Etzioni, 2009-06 Toward a new consensus on rights and responsibilities

Economy of Force Patricia Owens, 2015-08-27 Retrieving the older but surprisingly neglected language of household governance *Economy of Force* offers a radical new account of the historical rise of the social realm and distinctly social theory as modern forms of oikonomikos the art and science of household rule The techniques and domestic ideologies of household administration are highly portable and play a remarkably central role in international and imperial relations In two late colonial British emergencies in Malaya and Kenya and US counterinsurgencies in Vietnam Afghanistan and Iraq armed social work was the continuation of oikonomia not politics by other means This is a provocative new history of counterinsurgency with major implications for social political and international theory Historically rich and theoretically innovative this book will interest scholars and students across the humanities and social sciences especially politics and international relations history of social and political thought history of war social theory and sociology

Entangled Evolutions Peter Gross, 2002-05-08 The revolutions of 1989 swept away Eastern Europe's communist governments and created expectations on the part of many observers that post communist media would lead the liberated societies in establishing and embracing democratic political cultures Peter Gross finds that it was utopian to hold such expectations of the media in societies in transition On the one hand those countries media professionals had all learned their jobs under the communist regimes and could not instantly transform themselves into guides for a politically enabled populace Gross argues On the other hand newcomers to the media world even those who were notable literary figures viewed themselves as social and political leaders rather than mere informers and facilitators of the resocialization required to form new democracies The

news media have remained highly politicized and partisan So how are the media civil society and political culture related in societies in transition And can changes in these relationships be anticipated To address these questions *Entangled Evolutions* examines media in post 1989 Eastern Europe It studies the effects of privatization of the media journalists relations to political figures institutional structures such as media laws professional journalistic culture and the media s relation to their market Sources include interviews with journalists and politicians sociological and political data from national surveys and media audience studies

Cult of the Irrelevant Michael C. Desch, 2021-09-28 How professionalization and scholarly rigor made social scientists increasingly irrelevant to US national security policy To mobilize America s intellectual resources to meet the security challenges of the post 9 11 world US Secretary of Defense Robert M Gates observed that we must again embrace eggheads and ideas But the gap between national security policymakers and international relations scholars has become a chasm In *Cult of the Irrelevant* Michael Desch traces the history of the relationship between the Beltway and the Ivory Tower from World War I to the present day Recounting key Golden Age academic strategists such as Thomas Schelling and Walt Rostow Desch s narrative shows that social science research became most oriented toward practical problem solving during times of war and that scholars returned to less relevant work during peacetime Social science disciplines like political science rewarded work that was methodologically sophisticated over scholarship that engaged with the messy realities of national security policy and academic culture increasingly turned away from the job of solving real world problems In the name of scientific objectivity academics today frequently engage only in basic research that they hope will somehow trickle down to policymakers Drawing on the lessons of this history as well as a unique survey of current and former national security policymakers Desch offers concrete recommendations for scholars who want to shape government work The result is a rich intellectual history and an essential wake up call to a field that has lost its way

From Warfare to Welfare Jennifer S. Light, 2005-09-19 During the early decades of the Cold War large scale investments in American defense and aerospace research and development spawned a variety of problem solving techniques technologies and institutions From systems analysis to reconnaissance satellites to think tanks these innovations did not remain exclusive accessories of the defense establishment Instead they readily found civilian applications in both the private and public sector City planning and management were no exception Jennifer Light argues that the technologies and values of the Cold War fundamentally shaped the history of postwar urban America *From Warfare to Welfare* documents how American intellectuals city leaders and the federal government chose to attack problems in the nation s cities by borrowing techniques and technologies first designed for military engagement with foreign enemies Experiments in urban problem solving adapted the expertise of defense professionals to face new threats urban chaos blight and social unrest Tracing the transfer of innovations from military to city planning and management Light reveals how a continuing source of inspiration for American city administrators lay in the nation s preparations for war

Intermediality and Media Change Juha Herkman,2012 Abstract This book is about intermediality as an approach to

analysing and understanding media change Intermediality and Media Change is critical of technological determinism that characterises new media discourse about the ongoing digitalization framed as a revolution and creating sharp contrasts between old and new media Intermediality instead emphasises paying attention to continuities between media of all types and privileges a comparative perspective on technological changes in media over time and space The concept of intermediality refers to interaction and interrelationships between media This focus is important in two ways It strengthens the mutual construction and articulation of media forms as a vital element of the research agenda In contrast to the emphasis on convergence it also permits the consideration of the parallel construction and articulation of specific features and identities that characterise a medium as well as the emergence of new divergences Intermediality and Media Change studies intermediality from both theoretical and empirical perspectives The book starts by positioning intermediality as a theory and a methodological approach The first group of articles focuses on critical reflection of media and mediation as concepts The second group deals with intermediality in discourses about media change The third group concentrates on analysis of representative cases and the fourth group focuses on media institutions and professions
