Politics Of Dependency Urban Reform In I:

The Politics of Dependency Steven Rosenthal,1980-05-29 *The Dependency Movement* Robert A. Packenham,1992 In the first comprehensive scholarly treatment of dependency theory Robert Packenham describes its origins substantive claims and methods He analyzes the movement comparatively and sociologically as a significant episode in inter American and North South cultural relations In his account the positive intellectual contributions of dependency ideas as well as their role in the costly politicization of U S scholarship become evident and comprehensible *The Emergence of Modern Istanbul* Murat Gül,2009-08-30 In its transition from 18th century capital of the Ottoman Empire to economic powerhouse of the Turkish Republic the city of Istanbul has been transformed beyond recognition After the establishment of the Republic Turkey increasingly turned to the West for ideas about how to create shape and direct the development of a modern culture This desire was felt most strongly in Istanbul Turkey s most populous city Its status as the capital of the Ottoman Empire and later the economic hub of Turkey made Istanbul a forum for the different regimes to display their political ideological and social policies in the context of the built environment Some modernisation policies never came to fruition such as the unsuccessful late nineteenth century attempt by young Ottoman bureaucrats to initiate planning reforms at a time when the Empire was on the verge of collapse The new Turkish Republic at first neglected the old Ottoman capital and later attempted to make it conform to its secular political ideology After World War II Istanbul entered a new era in modernisation with the Democratic Party government conducting a large scale re design of Istanbul s urban form in order to show Turkey as a major political and economic force in post war Europe and the Middle East The scale of this modernisation process mirrored the spectacular transformation of Paris a century before thousands of buildings were demolished boulevards were carved out within the old city and whole new residential neighbourhoods were created In telling the story of this dramatic transformation Murat G l investigates and traces the impact of these changing policies on the very fabric of the city itself in its streets buildings and landscapes and in the process provides new insights into the history of Turkey **The Remaking of Istanbul** Zeynep Çelik,2023-11-15 Zeynep elik examines the changing face of Istanbul during the period when European cultural and economic influence intensified integrating architectural analysis with discussion of broader issues of urban design and historical change Zeynep elik examines the changing face of Istanbul during the period when European cultural and economic influence intensified integrating architectural analysis with discussion of broader issues of urban design and historical change Outcasting Armenians Talin Suciyan,2023-10-25 The history of Tanzimat in the Ottoman Empire has largely been narrated as a unique period of equality reform and progress often framing it as the backdrop to modern Turkey Inspired by Walter Benjamin s exhortation to study the oppressed to understand the rule and the ruler Talin Suciyan reexamines this era from the perspective of the Armenians In exploring the temporal and territorial differences between the Ottoman capital and the provinces Suciyan brings the unheard voices of Armenians into the present Drawing upon the rich

archival materials in both the Archives of the Armenian Patriarchate of Constantinople and the Ottoman Archives Suciyan uses these to show the integral role Armenians played in all aspects of Ottoman life and argues that accounts of their lives are vital to accurate representation of the Tanzimat era In shedding much needed light on the lives of those who were vulnerable disadvantaged and otherwise oppressed Suciyan takes a significant step toward a more inclusive Ottoman history

Architecture and the Turkish City Murat Gül, 2017-05-30 Architecture and urban planning have always been used by political regimes to stamp their ideologies upon cities and this is especially the case in the modern Turkish Republic By exploring Istanbul s modern architectural and urban history Murat Gul highlights the dynamics of political and social change in Turkey from the late Ottoman period until today Looking beyond pure architectural styles or the physical manifestations of Istanbul s cultural landscape he offers critical insight into how Turkish attempts to modernise have affected both the city and its population Charting the diverse forces evident in Istanbul s urban fabric the book examines late Ottoman reforms the Turkish Republic s turn westward for inspiration Cold War alliances and the AK Party s reaffirmation of cultural ties with the Middle East and the Balkans Telltale signs of these moments revivalist architecture drawing on Ottoman and Seljuk styles 1930s Art Deco

post war International Style buildings and the proliferation of shopping malls luxurious gated residences and high rise towers for example are analysed and illustrated in extensive detail Connecting this rich history to present day Istanbul whose urban development is characterised anew by intense social stratification the book will appeal to researchers of Turkey its architecture and urban planning

Urban Lighting, Light Pollution and Society Josiane Meier,Ute Hasenöhl,Katharina Krause,Merle Pottharst,2014-10-24 After decades in the shadows urban lighting is re emerging as a matter of public debate Long standing truths are increasingly questioned as a confluence of developments affects lighting itself and the way it is viewed Light has become an integral element of place making and energy saving initiatives alike Rapidly evolving lighting technologies are opening up new possibilities but also posing new challenges to planners and awareness is growing that artificial illumination is not purely benign but can actually constitute a form of pollution As a result public policy frameworks incentives and initiatives are undergoing a phase of innovation and change that will affect how cities are lit for years to come The first comprehensive compilation of current scientific discussions on urban lighting and light pollution from a social science and humanities perspective Urban Lighting Light Pollution and Society contributes to an evolving international debate on an increasingly controversial topic The contributions draw a rich panorama of the manifold discourses connected with artificial illumination in the past and present from early attempts to promote new lighting technologies in the late 19th and early 20th centuries to current debates on restricting its excessive usage in public space and the protection of darkness By bringing together a cross section of current findings and debates on urban lighting and light pollution from a wide variety of disciplines it reflects that artificial lighting is multifaceted in its qualities utilisation and interpretation Including case studies from the United States Europe and the UK Urban Lighting Light Pollution and Society is one of the first to take a serious assessment of light pollution and places and is a valuable resource for planners policy makers and students in related subjects

Hybrid Urbanism Nezar AlSayyad,2001-03-30 Despite strong forces toward globalization much of late 20th century urbanism demonstrates a movement toward cultural differentiation Such factors as ethnicity and religious and cultural heritages have led to the concept of hybridity as a shaper of identity Challenging the common assumption that hybrid peoples create hybrid places and hybrid places house hybrid people this book suggests that hybrid environments do not always accommodate pluralistic tendencies or multicultural practices In contrast to the standard position that hybrid space results from the merger of two cultures the book introduces the concept of a third place and argues for a more sophisticated understanding of the principal In contributed chapters the book provides case studies of the third place enabling a comparative and transnational examination of the complexity of hybridity The book is divided into two parts Part one deals with pre 20th century examples of places that capture the intersection of modernity and hybridity Part two considers equivalent sites in the late 20th century demonstrating how hybridity has been a central feature of globalization

contracts for the buildings to the remarkable visual and social impact on their host cities Wharton offers a theoretically sophisticated critique of one of the Cold War s first international businesses and demonstrates that the Hilton s role in the struggle against Communism was as Conrad Hilton declared significant though in ways that he could not have imagined Many of these postwar Hiltons still flourish Those who stay in them will learn a great deal about their experience from this new assessment of hotel space *Material Evidence and Narrative Sources* Daniella J.
