Peter Gibilisco,2014-07-23 We are confronted by neoliberalism and the inhumane consequences of its economic policies The claim that there is no alternative to profit making simply denies basic features of everyday reality The Politics of Disability asks Just where does all of this leave people with disabilities What are their alternatives They are among the most downtrodden people frequently treated as losers for not trying hard enough This meritocratic principle is antiquated and yet as a basic element of a political system it means that there is at most a little left over welfare for those with disabilities In The Politics of Disability the author suggests that there are alternatives and points to what he believes is a better way

Becoming Citizens Susan Schwartzenberg, 2016-06-01

Following the Second World War a generation of Seattle parents went against conventional medical wisdom and chose to bring up their children with developmental disabilities in the community This book presents a stunning visual narrative of thirteen of these remarkable families With a rich array of interviews photographs newspaper clippings official documents and personal mementos photographer Susan Schwartzenberg captures moving recollections of the struggle and perseverance of these parents Becoming Citizens traces their dogged determination to make meaningful lives for their children in the face of an often hostile system Breaking the silence that characterizes the history of disability in the United States Becoming Citizens is a substantive contribution to social and regional history It demonstrates the ways in which personal experiences can galvanize communities for political action The centerpiece of the book is the story of four mothers turned activists who coauthored Education for All a crucial piece of Washington State legislation that was a precursor to the national law securing educational rights for every person with a disability in America Becoming Citizens is a deeply compassionate testament to the experience of family life and disability as it is to the ways in which ordinary citizens become activists It will be important to anyone interested in disability studies including teachers friends and families of those with disabilities

Disability & the Politics of Education Susan Lynn Gabel, Scot Danforth, 2008 Disability and the Politics of Education An International Reader is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education For nearly two decades global attention has been given to education as a human right through global initiatives such as Education for All EFA and the Salamanca Statement Yet according to UNESCO reaching the goals of EFA remains one of the most daunting challenges facing the global community Today millions of the world's disabled children cannot obtain a basic childhood education particularly in countries with limited resources Even in the wealthiest countries many disabled children and youth are educationally segregated from the nondisabled particularly if they are labeled with significant cognitive impairment International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness This McDonaldization of education reproduces the labeling resource allocation and social dynamics long criticized in disability studies The authors in this volume explore these subjects and other complexities of disability and the politics of education In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches
