Foreign Policy Advocacy and Entrepreneurship Jeffrey S Lantis,2019-05-01 Foreign Policy Advocacy and Entrepreneurship shows how new and dynamic leaders in Congress are becoming highly influential in policymaking Capturing the spirit of change in Washington DC it explores original case studies of eight US policymakers who challenged authority during the Obama administration from war veterans and fundamentalist Christian activists to former spies and minority legislators Newly elected representatives in both parties dove into issues that sometimes seemed well beyond the interests of their constituents and that defied their own party leadership Setting the course for a new generation of lawmakers junior entrepreneurs studied here employed a combination of formal legislative strategies for successful influence and informal networking policy narratives and communication strategies While some congressional initiatives have succeeded in changing US foreign policy and others have failed committed entrepreneurs appear to be gaining greater influence over US foreign policy in the polarized atmosphere of Washington DC Cases of entrepreneurship by junior members of Congress represent a puzzle for traditional foreign policy studies that focus on seniority party discipline and rigid institutional systems on Capitol Hill By melding entrepreneurship and policy advocacy literature this book advances a new typology of foreign policy entrepreneurship recognizing the impact of multidimensional strategies of influence The arrival of new members of the 116th Congress the most diverse in history provides an exciting laboratory to further test these propositions

Useful Adversaries Thomas J. Christensen,2020-05-05 This book provides a new analysis of why relations between the United States and the Chinese Communists were so hostile in the first decade of the Cold War Employing extensive documentation it offers a fresh approach to long debated questions such as why Truman refused to recognize the Chinese Communists why the United States aided Chiang Kai shek s KMT on Taiwan why the Korean War escalated into a Sino American conflict and why Mao shelled islands in the Taiwan Straits in 1958 thus sparking a major crisis with the United States Christensen first develops a novel two level approach that explains why leaders manipulate low

level conflicts to mobilize popular support for expensive long term security strategies By linking grand strategy domestic politics and the manipulation of ideology and conflict Christensen provides a nuanced and sophisticated link between domestic politics and foreign policy He then applies the approach to Truman s policy toward the Chinese Communists in 1947-50 and to Mao s initiation of the 1958 Taiwan Straits Crisis In these cases the extension of short term conflict was useful in gaining popular support for the overall grand strategy that each leader was promoting domestically Truman s limited containment strategy toward the USSR and Mao s self strengthening programs during the Great Leap Forward Christensen also explores how such low level conflicts can escalate as they did in Korea despite leaders desire to avoid actual warfare

The Mind of Empire Christopher A. Ford, 2010-05-28 In the last century no other nation has grown and transformed itself with such zeal as China With a booming economy a formidable military and a rapidly expanding population China is emerging as a twenty first century global superpower China s prosperity has increased dramatically in the last two decades propelling the nation to a prominent position in the international community Yet China s ancient history still informs and shapes its understanding of itself in relation to the world As a highly developed and modern nation China is something of a paradox Though China is an international leader in modern business and technology its past remains a source of guiding principles for the nation s foreign policy In *The Mind of Empire: China s History and Modern Foreign Relations* Christopher A. Ford demonstrates how China s historical awareness shapes its objectives and how the resulting national consciousness continues to influence the country s policymaking Despite its increasing prominence among modern developed nations China continues to seek guidance from a past characterized by Confucian notions of hierarchical political order and a moral geography that places China at the center of the civilized world *The Mind of Empire* describes how these attitudes have clashed with traditional Western ideals of sovereignty and international law Ford speculates about how China s legacy may continue to shape its foreign relations and offers a warning about the potential global consequences He examines major themes in China s conception of domestic and global political order describes key historical precedents and outlines the remarkable continuity of China s Sinocentric stance Expertly synthesizing historical philosophical religious and cultural analysis into a cohesive study of the Chinese worldview Ford offers revealing insights into modern China *The Mind of Empire* tracks China s astonishing development within the framework of a national ideology that is intrinsically linked to the distant past Ford s perspective is both pertinent and prescient at a time when China is expanding into new areas of power both economically and militarily As China s power and influence continue to grow its reliance on ancient philosophies and political systems will shape its approach to foreign policy in idiosyncratic and perhaps highly problematic ways

women on the inside make a difference in how policy is formulated or how the departments are managed Are women by nature more peaceful than men Will they alter the face of foreign policy Or are they more likely to hold the same views as men This title provided an important insight into these questions and would have been provocative reading at the time of publication **The Dynamics of Israeli-Palestinian Relations** B. National Security Entrepreneurs and the Making of American Foreign Policy Vincent Boucher, Charles-Philippe David, Karine Prémont, 2020-11-12 Since the advent of the contemporary US national security apparatus in 1947 entrepreneurial public officials have tried to reorient the course of the nation's foreign policy Acting inside the National Security Council system some principals and high ranking officials have worked tirelessly to generate policy change and innovation on the issues they care about These entrepreneurs attempt to set the foreign policy agenda frame policy problems and solutions and orient the decision making process to convince the president and other decision makers to choose the course they advocate In **National Security Entrepreneurs and the Making of American Foreign Policy** Vincent Boucher Charles Philippe David and Karine Prémont develop a new concept to study entrepreneurial behaviour among foreign policy advisers and offer the first comprehensive framework of analysis to answer this crucial question why do some entrepreneurs succeed in guaranteeing the adoption of novel policies while others fail They explore case studies of attempts to reorient US foreign policy waged by National Security Council entrepreneurs examining the key factors enabling success and the main forces preventing the adoption of a preferred option the entrepreneur's profile presidential leadership major players involved in the policy formulation and decision making processes the national political context and the presence or absence of significant opportunities By carefully analyzing significant diplomatic and military decisions of the Johnson Nixon Reagan and Clinton administrations and offering a preliminary account of contemporary national security entrepreneurship under presidents George W Bush Barack Obama and Donald Trump this book makes the case for an agent based explanation of

foreign policy change and continuity **The Crisis of American Foreign Policy** Howard J. Wiarda, Esther M. Skelley, 2006
In *The Crisis of American Foreign Policy* noted scholar Howard J. Wiarda argues that the foreign policy of the United States reflects the divisions and dysfunctions we see in our domestic culture and society. This text tackles such critical issues as ethnocentrism in foreign policy as well as U.S. efforts to extend democracy, human rights and civil society in other countries. Key areas covered include Europe, Asia, Africa, Latin America and the Middle East. Concise, clearly written, well organized, challenging and provocative, this is a text that students and professors alike will appreciate. *Positional Realism* Wei Song, 2022-11-30
This book adopts the rationalist research path to bring forward an innovative theory of foreign policy and the central question is: How can we define the overall national interests of great powers appropriately and thus help states make consistent and rational grand strategies? The answer cannot be found among existing Foreign Policy Analysis and other theoretical research. In this book, Positional Realism is proposed as a new theory to define the overall national interests from the power position and order position perspectives and specify the four kinds of positional interests of hegemonic states, contending states, potential contending states and non-contending states. Different great powers have different positional power and order objectives. Based on these positional interests, Positional Realism brings different foreign policy hypotheses and suggestions. The book also examines the six great powers in the nineteenth century to verify these hypotheses and finds that Positional Realism can not only convincingly explain the success or failure of their acts but also give useful and important directions for strategy making of great powers. *Armed Coexistence* Stephen P. Westcott, 2022-02-04
This book is the first to comprehensively explore the origins and reasons behind the Sino-Indian border dispute's intractability. Utilising an array of accurate maps, tables, archival and scholarly research, this book shows how an ambiguous frontier became a contested border and how it has become relatively pacified yet remaining unresolved. Unlike previous examinations, however, this book also provides a theoretically based explanation as to why it is so difficult for an interstate border dispute to be resolved. By examining a wide range of salient actors from state leaders to the individual governing organisations to the State itself, it is shown that it is usually in their interest to maintain the status quo rather than seek some form of resolution, thereby ensuring that the border dispute remains intractable. With both China and India shaping up to be major powers throughout the twenty-first century, a detailed examination of the major issue of contention between them is more pertinent now than ever.
