paralyzed and polarized But across the country environmental pragmatism is gaining ground The Morning after Earth Day explores how policymakers business executives and citizen groups are fighting novel political battles and sometimes making peace with surprising compromises After a generation of progress in reducing large sources of industrial and municipal pollution and in improving management of public lands today's environmental conflicts are more complex They involve controlling pollution caused by farmers small businesses drivers of aging cars and homeowners as well as minimizing ecological threats on private land Remedies often lie in politically treacherous territory persuading ordinary people to change their daily routines rather than ordering big business to adopt new technology or government officials to manage land differently As Mary Graham shows practical approaches are resolving immediate disputes and providing clues for future policy But core dilemmas remain They include how to reconcile environmental protection with respect for private property how to balance federal and state authority and how much to rely on behavioral versus technological change Only by reclaiming the debate about these dilemmas from extremists and confronting them head on will the nation build a solid foundation for the next generation of environmental policy

**The Politics of Ecology** James Ridgeway, 1970 The premise of this book is that the source of pollution is actually concentrated corporate power Therefore the author presents proposals that are not meant as adjustments or reforms but as different ways of attacking that concentrated corporate power thereby opening up possibilities for change

*State and Local Politics* David Berman, 2015-02-18 Politics at the state and local level has never been more interesting than in our devolutionary age This popular text is the most concise readable and current introduction to the field Now in its ninth edition the book keeps its focus on the varied and changing political and economic environments in which state and local governments function and their strengths and weaknesses in key areas of public policy The text is enlivened by boxed sections that relate individual experiences or highlight particular issues and developments Topics covered in this edition include the drive toward devolution in the federal system fiscal constraints political accountability affirmative action majority minority districts and changing approaches to welfare education land use and law enforcement

*Environmental Protection at the State Level* Evan J. Ringquist, 1993 Why do some states enact stronger pollution control programmes than others And do stronger controls have identifiable impacts on environmental quality in these states This work seeks to answer these question by means of combining data methods and theory from the natural and social sciences
