McMahon, 2009-08-31 What does it take to win the White House This book helps students understand both the issues and how and why people vote for one candidate After discussing the dynamics of the primary campaigns the authors examine three broad sets of issues that play a key role in voting foreign policy domestic policies and the culture wars This sets the foundations for an examination of regional similarities and differences in voting patterns as the varying salience and valence of issues whether general or specific is explored across and within regions Special attention is paid to battleground states Drawing on concepts from political science this book advances students understanding both of the field and the phenomenon

series of policy measures that should be pursued to move the United States toward more equitable distributions of both income and wealth Part One of the book examines the distribution of income during the period 1960-88 Part Two looks at the changing distribution of wealth in the United States The work concludes with an examination of the effects of the distribution of wealth on the distribution of income a review of the causes of the patterns of distribution as seen in the data and a discussion of the effects of these changes upon American society Individuals associated with policy planning groups both in government and in the private sector including advocacy groups should find this book quite useful to their work It should also appeal to academics concerned with the issues of economics of poverty the economics of discrimination human capital theory and urban economics *American Book Publishing Record* ,2003 Paperbound Books in Print ,1992
