comparative overview of classical integration theories for studying and analysing current crisis situations the EU faces Second the book connects theories to current debates through an in depth discussion of recent crises that hit European integration since 2009 with a particular focus on the financial crisis Brexit refugee crisis illiberal tendencies in some member states and the Coronavirus pandemic This book will be of key interest to scholars and students of European integration European Union politics political theory and more broadly to European studies Coping with Crisis: Europe's Challenges and Strategies Jale Tosun, Anne Wetzels, Galina Zapryanova, 2016-03-17 How has the economic and financial crisis that started in 2007 affected European integration Observers have been speculating about whether the crisis will ultimately lead to a strengthening or weakening of the European Union This book studies the effects of the crisis on EU policy making and institutional arrangements on one hand and citizens EU attitudes and political parties electoral strategies on the other It concludes that at least in the short run the crisis has overall created an opportunity for European integration rather than an obstacle First it has triggered events of proposed and actual far reaching policy and institutional change Second negative effects on public opinion have not yet systematically translated into tendencies of stagnation or disintegration The book brings together established scholars of European integration whose diverse research expertise contributes to an improved theoretical and empirical understanding of how the economic and financial crisis has affected EU policies institutions and citizens This book was published as a special issue of the Journal of European Integration Challenges and Barriers to the European Union Expansion to the Balkan Region Costa, Bruno Ferreira, 2022-01-21 Despite all efforts to create a political union capable of improving European citizens quality of life there are several barriers to the European Union's EU expansion to the Balkan Region The EU enlargement and expansion to the Balkan Region is one of the Union's greatest challenges and political objectives in recent years In the turmoil of economic social and sanitarian crises where is the space to debate the enlargement of the EU Challenges and Barriers to the European Union Expansion to the Balkan Region presents the EU's structure the process of enlargement and the challenges related to the Balkan region This book addresses critical issues and challenges in the EU and the emerging trends for the EU's future Covering topics such as enlargement policy integration NATO and political challenges this book is a valuable resource for post grad students of political science and international affairs faculty of higher education researchers academicians politicians world leaders and policymakers Is the European Union Capable of Integrating Diverse Models of Capitalism? Alison Johnston, Aidan Regan, 2021-03-30 The 2009 European sovereign debt crisis and the EU's policy response to it have prompted scholars to re think whether diverse national models of capitalism can thrive within the European Union EU Are some national economic systems better suited to adapt to European integration than others and if so why Contributions within this volume provide a qualified yes to these questions raised concluding that the EU favors export led growth models while it penalizes and discourages domestic consumption oriented growth paths particularly those that are financed by debt accumulation The book questions whether the EU is

capable of integrating these diverse capitalist regimes This volume adds a comparative capitalism perspective to EU integration scholarship in order to demonstrate that ever closer union is not capable of accommodating diversity in national economic institutions Chapters in this volume provide an innovative framework for understanding what factors related to European integration impede the economic and political integration of diverse European market economies While recent comparative capitalism literature highlights that European monetary integration has favored export led growth regimes contributions in this volume outline that the EU's prioritization of export led growth over domestic demand led growth is present in other facets of integration including EU accession financial integration the free movement of people fiscal governance and the Europe 2020 growth strategy The chapters in this book were originally published as a special issue of *New Political Economy*
