Politics Of Telecommunications In Mexico Privatization And State Labour Relations 1982 95:

The Politics of Telecommunications In Mexico J. Clifton, 2015-12-22 This text argues that instead of leading toward greater democratization Mexico's policies of privatization in the 1980s were used for personal benefit and to lubricate the existing state labour relationship. It builds its case around the privatization of Mexico's telecommunications. **The Cambridge Economic History of Latin America: Volume 2, The Long Twentieth Century** Victor Bulmer-Thomas, John Coatsworth, Roberto Cortés Conde, 2006-01-23 An indispensable reference work for anyone interested in Latin America's economic development. **Political Conflict and Development in East Asia and Latin America** Richard Boyd, Galjart Benno, Tak-Wing Ngo, 2007-01-24 Long run processes of socio economic change generate prodigious problems of social conflict and social control and governments responsible for these processes must therefore manage the resultant conflict. Consequently the success or failure of a government's management of such conflicts is a crucial factor in development outcomes. This volume investigates the political struggle for development specifically in two vital regions East Asia and Latin America. This analysis calls into question the dominant emphasis on institutional and cultural bases for stable growth. A careful historical account of the two regions is presented which permits the rigorous testing of conventional wisdoms regarding development. Of importance to a broad range of academics in the spheres of development studies politics political economy and sociology this book will also make an interesting read for those with a general interest in these areas.

Exploring the links between institutions state business alliances and economic development in the context of tumultuous market transitions since the 1980s the book

tackles the formation and sustainability of coordination inducing institutions besides their mere existence and points out the new modalities of coordination in the age of new developmentalism Based on extensive original research in Turkey and Mexico embedded in a comparative historical analysis the book shows how state business alliances have been formed collapsed and re formed between the respective states and shifting business actors since the launching of market transitions It demonstrates how both the state and business actors and their cohesiveness vs fragmentation play crucial roles in the making and sustainability of the institutions which are central to state business alliances It explores the emergence of new actors the diversification of the organizational landscape and the evolution of the ways in which the states interact with businesses throughout major economic and political transformations that helped transform the respective states and their interactions with the non state actors It draws on the meandering developmental trajectories of Turkey and Mexico from the 1970s to the present and goes on to draw some lessons for institution building and market reforms in selected countries in North Africa *La reconversión regulatoria de la telecomunicaciones* Ana Luz Ruelas, 2005

Competition and Cooperation James Alt, Margaret Levi, Elinor Ostrom, 1999-10-29 What can the disciplines of political science and economics learn from one another Political scientists have recently begun to adapt economic theories of exchange trade and competition to the study of legislatures parties and voting At the same time some of the most innovative and influential thinkers in economics have crossed the boundaries of their discipline to explore the classic questions of political science *Competition and Cooperation* features six of these path breaking scholars all winners of the Nobel Prize for Economics in a series of conversations with more than a dozen distinguished political scientists The discussions analyze adapt and extend the Nobelists seminal work showing how it has carried over into political science and paved the way for fruitful cooperation between the two disciplines The exchanges span all of the major conceptual legacies of the Nobel laureates Arrow s formalization of the problems of collective decisions Buchanan s work on constitutions and his critique of majority rule Becker s theory of competition among interest groups North s focus on insecure property rights and transaction costs Simon s concern with the limits to rationality and Selten s experimental work on strategic thinking and behavior As befits any genuine dialogue the traffic of ideas and experiences runs both ways The Nobel economists have had a profound impact upon political science but in addressing political questions they have also had to rethink many settled assumptions of economics The standard image of economic man as a hyper rational self interested creature acting by and for for himself bears only a passing resemblance to man as a political animal Several of the Nobelists featured in this volume have turned instead to the insights of cognitive science and institutional analysis to provide a more recognizable portrait of political life The reconsideration of rationality and the role of institutions in economics as in politics raises the possibility of a shared approach to individual choice and institutional behavior that gives glimmers of a new unity in the social sciences *Competition and Cooperation* demonstrates that the most important work in both economics and political science reflects a marriage of the

two disciplines Historical Abstracts ,1999 **State-Owned Enterprises in the Middle East and North Africa** Merih Celasun,2013-01-11 In the rapid world wide spread of privatization progress in the Middle East and North Africa region has been markedly slow This volume argues that a high level of overstaffing in public enterprises and the inability of economies to create jobs fast enough is mainly responsible for this An in depth study of the facts and a well supported conclusion makes this an impressive collection of work on a very pertinent subject **Logics of Resistance** Steve Dubb,2014-02-04 This study examines how unions representing telephone workers one in Mexico and one in British Columbia Canada have responded to changes in technology work organization and government policy stemming from the rise of a more global economy Some business writers have suggested that globalization will compel unions to cooperate with managers as workers are more exposed to international competition By analyzing the actual record of two unions in the highly internationalized telecommunications industry however a different picture emerges Entreprises et histoire ,2004 *The Oxford Handbook of Transformations of the State* Stephan Leibfried,Evelyne Huber,Matthew Lange,Jonah D. Levy,Frank Nullmeier,John D. Stephens,2015 This Handbook offers a comprehensive treatment of transformations of the state from its origins in different parts of the world and different time periods to its transformations since World War II in the advanced industrial countries the post Communist world and the Global South Leading experts in their fields from Europe and North America discuss conceptualizations and theories of the state and the transformations of the state in its engagement with a changing international environment as well as with changing domestic economic social and political challenges The Handbook covers different types of states in the Global South from failed to predatory rentier and developmental in different kinds of advanced industrial political economies corporatist statist liberal import substitution industrialization and in various post Communist countries Russia China successor states to the USSR and Eastern Europe It also addresses crucial challenges in different areas of state intervention from security to financial regulation migration welfare states democratization and quality of democracy ethno nationalism and human development The volume makes a compelling case that far from losing its relevance in the face of globalization the state remains a key actor in all areas of social and economic life changing its areas of intervention its modes of operation and its structures in adaption to new international and domestic challenges *The Best Books for Academic Libraries: Social sciences* ,2002 Books recommended for undergraduate and college libraries listed by Library of Congress Classification Numbers
