Politics Of Transformation Local Activism In The Peace And Environmental Movements:

The Politics of Transformation Betty H. Zisk, 1992-10-30 This book is a study of local grassroots activism in two major political areas the peace and environmental movements over a period of five years Interviews with leaders of 166 different groups in five states Massachusetts Maine New Hampshire California and Oregon supplemented by personal observation and participation in several of those groups are the foundations of this analysis The major concerns are the components of group and movement successes both short run and long run and activist group adaptations to change in the larger social and political world in light of political upheaval in Eastern Europe the Gulf War and several environmental crises that occurred during the period in question Finally Zisk focuses on the growing convergence and barriers to convergence of the movements After examining short run accomplishments Zisk concludes that most of the groups in both movements are faring poorly few of their concrete goals are achieved media attention is poor and membership growth is problematic For both movements the transformational wings those that press for basic changes use consensus decision making have few paid staff members are not doing so well as the incremental wings those seeking limited goals using traditional decision techniques employing larger staffs This book should be of interest to students and teachers of political science and sociology

The Oxford Handbook of U.S. Environmental Policy Sheldon Kamieniecki, Michael Kraft, 2013 Prior to the Nixon administration environmental policy in the United States was rudimentary at best Since then it has evolved into one of the primary concerns of governmental policy from the federal to the local level As scientific expertise on the environment rapidly developed Americans became more aware of the growing environmental crisis that surrounded them Practical solutions for mitigating various aspects of the crisis air pollution water pollution chemical waste dumping strip mining and later global warming became politically popular and the government responded by gradually erecting a vast regulatory apparatus to address the issue Today politicians regard environmental policy as one of the most pressing issues they face The Obama administration has identified the renewable energy sector as a key driver of economic growth and Congress is in the process of passing a bill to reduce global warming that will be one of the most important environmental policy acts in decades The Oxford Handbook of U S Environmental Policy will be a state of the art work on all aspects of environmental policy in America Over the past half century America has been the world s leading emitter of global warming gases However environmental policy is not simply a national issue It is a global issue and the explosive growth of Asian countries like China and India mean that policy will have to be coordinated at the international level The book will therefore focus not only on the U S but on the increasing importance of global policies and issues on American regulatory efforts This is a topic that will only grow in importance in the coming years and this will serve as an authoritative guide to any scholar interested in the issue

Encyclopedia of Violence, Peace, and Conflict, 2008-09-05 The 2nd edition of Encyclopedia of Violence Peace and Conflict provides timely and useful information about antagonism and reconciliation in all contexts of public and personal life Building on the highly regarded

1st edition 1999 and publishing at a time of seemingly inexorably increasing conflict and violent behaviour the world over the Encyclopedia is an essential reference for students and scholars working in the field of peace and conflict resolution studies and for those seeking to explore alternatives to violence and share visions and strategies for social justice and social change Covering topics as diverse as Arms Control Peace Movements Child Abuse Folklore Terrorism and Political Assassinations the Encyclopedia comprehensively addresses an extensive information area in 225 multi disciplinary cross referenced and authoritatively authored articles In his Preface to the 1st edition Editor in Chief Lester Kurtz wrote The problem of violence poses such a monumental challenge at the end of the 20th century that it is surprising we have addressed it so inadequately We have not made much progress in learning how to cooperate with one another more effectively or how to conduct our conflicts more peacefully Instead we have increased the lethality of our combat through revolutions in weapons technology and military training The Encyclopedia of Violence Peace and Conflict is designed to help us to take stock of our knowledge concerning these crucial phenomena Ten years on the need for an authoritative and cross disciplinary approach to the great issues of violence and peace seems greater than ever More than 200 authoritative multidisciplinary articles in a 3 volume set Many brand new articles alongside revised and updated content from the First Edition Article outline and glossary of key terms at the beginning of each article Entries arranged alphabetically for easy access Articles written by more than 200 eminent contributors from around the world Earth First:Anti-Road Movement Derek Wall,2013-10-28 First published in 1999 Detailed accounts of major ant road campaigns both in the UK and internationally are included describing confrontations at Twyford Newbury Glasgow and the Autobahn in Germany as well as information on the globalisation of Earth First with details of protests in Australia Ireland Germany France Holland Eastern Europe and North America Earth First and the Anti Roads Movement traces the origins of the movement and the history of anti roads activism in Britain since the 1880s Showing how green social and political theory can be linked to practical struggles for environmental and social change Derek Wall investigates key topics of political and sociological interest **Transformational Politics** Stephen Woolpert,Christa Daryl Slaton,Edward W. Schwerin,1998-08-13 Argues that traditional political science is failing to identify and address fundamental political phenomena of our time and proposes an alternative value based political science

American Anti-Nuclear Activism, 1975-1990 K. Harvey,2014-10-28 Looking at national peace organizations alongside lesser known protest collectives this book argues that anti nuclear activists encountered familiar challenges common to other social movements of the late twentieth century *Where We Live, Work and Play* Patrick Novotny,2000-08-30 Numerous studies have revealed that the poor disproportionately bear the burden of environmental problems in America today Issues range from higher levels of poisonous wastes carbon dioxide and ozone to greater than normal incidences of asthma and lead poisoning The environmental justice movement which has emerged in working class and low income African American and Latino communities since the early 1990s is an effort that is reinterpreting the definition of the environment as where we live

work and play to connect new constituencies traditionally outside of the postwar environmental movement Novotny documents this expanding constituency through case studies of four community groups ranging from South Central Los Angeles to Louisiana Environmental racism is understood as yet another type of discrimination which results in a high incidence of environmental concerns in poorer communities due to what many activists see as discriminatory land use practices decisions by industry that intentionally locate hazardous wastes in these communities and the uneven enforcement of environmental regulations by federal state and local officials Community leaders have added environmental causes to their fight against unemployment impoverishment and substandard housing This study explores various attempts to put a halt to illegal practices and to broaden public awareness of the issues involved Peace and Conflict Studies David P. Barash, Charles P. Webel, 2013-03-26 Peace and Conflict Studies Third Edition sets the standard for an accessible introduction and comprehensive exploration of this vital subject The authors share their vast knowledge and analysis of 21st century world events Including new chapters on research methods and democracy as well as timely topics such as nuclear proliferation models of conflict analysis outcomes and solutions the Non Proliferation Treaty the rise of the BRICs countries and much more With an broad and authoritative scope this introductory text chronicles a plethora of important global topics from pre history to the present Key Features Includes updated chapters and examines current conflicts including the latest developments in Iran and North Korea Explores the important aspects of positive peace individual violence nationalism and terrorism Provides numerous visual aids questions for further study and suggested readings Furnishes a comprehensive range of material to enlighten and enrich future discussion and encourage further academic pursuit **The Role of an Environmental NGO in the Landmark Florida Everglades Restoration** Barbara K. Pryor, 2005-03 in a region unlike any other place on Earth Since the turn of the twentieth century the American conflict between economic development and environmental conservation has been epitomized by the struggles between those who seek to develop and those who seek to protect the Everglades In recent years the region has embraced the daunting challenge of protecting nearly 70 endangered or threatened species and restoring an ecosystem which has been profoundly altered while still trying to meet growing human needs for space and natural resources This environmental conflict centers around the successful implementation of an unprecedented 38 year 7.8 billion federal state Comprehensive Everglades Restoration Plan CERP Dr Pryor demonstrates that most of the ecological benefits for the Everglades promised in the historic CERP are riddled with conflict over many uncertainties and decades of delays which must still be resolved in order to restore this fragile River of Grass to the highest possible level The Role of an Environmental NGO in the Landmark Florida Everglades Restoration sheds a beacon of light on this daunting challenge providing much needed fresh insight into the largest and most expensive environmental restoration effort in history Dr Pryor clearly illuminates the critical role that an environmental NGO can play as it seeks to influence the process of resolving multiparty environmental conflict such as the historic crusade to resurrect our fragile River of Grass Dr

Pryor offers a unique ethnography for those working with nongovernmental organizations NGOs academicians and other tireless researchers conflict facilitators environmentalists ethnographers policymakers scientists students and countless other stakeholders The Everglades is a test If we pass we may get to keep the planet Marjorie Douglass Visit Dr Pryor's website at www.drbarbarakpryor.com **Making Sense of the Americas** Jan Hansen, Christian Helm, Frank

Reichherzer, 2015-11-12 From anti Reagan riots in West Berlin to pictures of revolutionary Nicaragua it is often impossible to grasp social protest movements of the 1980s without referring to how they imagined the Americas This edited volume is aimed at historicizing the representations of the United States and of Latin America among Western European protesters around that decade By researching dominant interpretation patterns practices and symbols within these movements this book offers a fresh and compelling look at protest in the second half of the 20th century Page 4 of cover **Peace and**

Conflict Studies Ho-Won Jeong, 2017-07-05 Ho Won Jeong explains and assesses major approaches to dealing with ethnic conflict communal violence inter state war and social injustice The book analyses not only the sources of violence and conflict but also how to manage and prevent them As peace is relevant to improvement in human well being and the future survival of humanity the volume encompasses a variety of themes ranging from alternative security policies methods of peaceful settlement human rights self determination environmental politics global governance and non violence Reflecting on the current thinking and drawing lessons from the past the book can be considered as the most authoritative introduction to the field since the end of the Cold War **New Perspectives on the Vietnam War** Andrew A. Wiest, Mary Barbier, Glenn

Robins, The Vietnam War was one of the most heavily documented conflicts of the twentieth century Although the events themselves recede further into history every year the political and cultural changes the war brought about continue to resonate even as a new generation of Americans grapples with its own divisive conflict America and the Vietnam War Re examining the Culture and History of a Generation reconsiders the social and cultural aspects of the conflict that helped to fundamentally change the nation With chapters written by subject area specialists America and the Vietnam War takes on subjects such as women's role in the war the music and the films of the time the Vietnamese perspective race and the war and veterans and post traumatic stress disorder *Dams and Development* Sanjeev Khagram, 2018-08-06 Big dams built for

irrigation power water supply and other purposes were among the most potent symbols of economic development for much of the twentieth century Of late they have become a lightning rod for challenges to this vision of development as something planned by elites with scant regard for environmental and social consequences especially for the populations that are displaced as their homelands are flooded In this book Sanjeev Khagram traces changes in our ideas of what constitutes appropriate development through the shifting transnational dynamics of big dam construction Khagram tells the story of a growing but contentious world society that features novel and increasingly efficacious norms of appropriate behavior in such areas as human rights and environmental protection The transnational coalitions and networks led by nongovernmental

groups that espouse such norms may seem weak in comparison with states corporations and such international agencies as the World Bank Yet they became progressively more effective at altering the policies and practices of these historically more powerful actors and organizations from the 1970s on Khagram develops these claims in a detailed ethnographic account of the transnational struggles around the Narmada River Valley Dam Projects in central India a huge complex of thirty large and more than three thousand small dams He offers further substantiation through a comparative historical analysis of the political economy of big dam projects in India Brazil South Africa and China as well as by examining the changing behavior of international agencies and global companies The author concludes with a discussion of the World Commission on Dams an innovative attempt in the late 1990s to generate new norms among conflicting stakeholders Pathways to Prohibition Ann-Marie E. Szymanski,2003-08-21 Szymanski uses the Prohibition movement as an example of the challenges facing all social reform movements International Bibliography of the Social Sciences ,1994 The IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences **Foundations and Public Policy** Joan Roelofs,2012-02-01 In this pathbreaking study of foundation influence author Joan Roelofs produces a comprehensive picture of philanthropy's critical role in society She shows how a vast number of policy innovations have arisen from the most important foundations lessening the destructive impact of global marketization Conversely groups and movements that might challenge the status quo are nudged into line with grants and technical assistance and foundations also have considerable power to shape such things as public opinion higher education and elite ideology The cumulative effect is that foundations despite their progressive goals have a depoliticizing effect one that preserves the hegemony of neoliberal institutions Teaching Democracy by Being Democratic Ted Becker,Richard A. Couto,1996-10-30 The best way to teach democracy has been the subject of an ongoing debate for 2 500 years Unlike most books about teaching democracy this one spends more time on how to teach democracy than the what and why of teaching democracy It punctures the irony of teaching democracy by lectures and superior teachers In its place this book provides a variety of illustrations for the teaching of democracy in an experiential and egalitarian fashion The introduction presents a theoretical and analytical framework of democracy and democratic pedagogy The six chapters cover topics such as structuring a democratic classroom democratic practices that empower students problem solving and community service that make the classroom a laboratory for democracy and university based programs of democratic alternatives that serve the community The volume's treatment of community organization students as collaborators personal empowerment the community of need and response and the democratic organization expresses its preference for direct democratic participation **Global Civil Society and Global Environmental Governance** Ronnie D. Lipschutz,Judith Mayer,1996-01-01 Explores the growing role of global civil society and local environmental activism in the management and protection of the environment worldwide **Democratic Institution Performance** Edward R.

McMahon, Thomas Sinclair, 2002-12-30 How do nations make successful transitions to democracies Our understanding of how democracy functions and under what circumstances it can be consolidated and strengthened remains highly uneven Recent events underscore the critical importance of expanding our understanding of democratic institutions and operations Here McMahon and his distinguished contributors demonstrate how the dynamic process of democratization is shaped by the specific contexts in which it occurs how the internal community plays a key role in the development of democracy and how the ability to understand democratization requires both internal and external perspectives The contributors seek to improve the definitions of what constitutes a democracy and to determine how the effectiveness of democratic institutions might best be judged in order to better serve the analysis of and policy approaches to building democratic institutions With fewer overtly authoritarian states in the post Cold War world a wealth of raw information and experience has begun to accumulate Our understanding of democratic institutional performance requires us to look closely at the performance of the institutions themselves The book contains chapters on public opinion civil society domestic institutions of governance elections globalization international standards of democratic development international assistance and academic research A concluding chapter summarizes what democratization processes can teach us about democracy in a broader context **The**

African Diaspora Toyin Falola, 2013 The African diaspora is arguably the most important event in modern African history From the fifteenth century to the present millions of Africans have been dispersed many of them forcibly others driven by economic need or political persecution to other continents creating large communities with African origins living outside their native lands The majority of these communities are in North America This historic displacement has meant that Africans are irrevocably connected to economic and political developments in the West and globally Among the known legacies of the diaspora are slavery colonialism racism poverty and underdevelopment yet the ways in which these same factors worked to spur the scattering of Africans are not fully understood by those who were part of this migration or by scholars historians and policymakers In this definitive study of the diaspora in North America Toyin Falola offers a causal history of the western dispersion of Africans and its effects on the modern world Reengaging old and familiar debates and framing new ones that enrich the discourse surrounding Africa Falola isolates the thread running nearly six centuries that connects the history of slavery the transatlantic slave trade and current migrations A boon to scholars and policymakers and accessible to the general reader the book explores diverse narratives of migration and shows that the cultures that migrated from Africa to the Americas have the capacity to unite and create a new pan Africanist movement within the globalized world Toyin Falola is the Jacob and Frances Sanger Mossiker Chair in the Humanities and University Distinguished Teaching Professor at the University of Texas at Austin He is the 2011 recipient of the Distinguished Africanist Award from the African Studies Association and serves as the vice president of the International Scientific Committee of the UNESCO Slave Route Project His previous books published by the University of Rochester Press include The Power of African Cultures and Nationalism
