## **Politics Process And American Trade Policy:**

**Politics, Process, and American Trade Policy** Sharyn O'Halloran, 1994 Relying on the New Economics of Organizations NEO or New Institutionalism Politics Process and American Trade Policy shows why conventional models do not adequately describe the formation of American trade policy Rejecting both the pressure group model and the presidential ascendancy model this study's institution based approach emphasizes the influence Congress has in setting trade policy connecting theories of institutional design with the procedural details of regulating trade policy To reach her conclusions Sharyn O'Halloran uses time series data and econometric analysis to test a set of propositions concerning trade policy She examines detailed case studies and provides a comprehensive history of the institutions that govern trade policy making Unlike most scholars who see trade policy as disparate and ad hoc O'Halloran is able to explain both early and contemporary American trade policy in a consistent and integrated fashion She argues that a single set of procedures may lead to apparently different outcomes under differing initial conditions therefore the key is to identify the common logic derived from constitutional imperatives that underlies all policy outcomes

**The Political Economy of American Trade Policy** Anne O. Krueger, 2007-12-01 Exploring the political and economic determinants of trade protection this study provides a wealth of information on key American industries and documents the process of seeking and conferring protection Eight analytical histories of the automobile steel semiconductor lumber wheat and textile and apparel industries demonstrate that trade barriers rarely have unequivocal benefits and may be counterproductive They show that criteria for awarding protection do not take into account the interests of consumers or other industries and that political influence and an organized lobby are major sources of protection Based on these findings a final essay suggests that current policy fails to consider adequately economic efficiency the public good and indirect negative effects This volume will interest scholars in economics business and public policy who deal with trade issues

American Trade Politics I. M. Destler, 2005-06-08 In this comprehensive revision of the most influential widely read analysis of the US trade policymaking system Destler addresses how globalization has reshaped trade politics weakening traditional protectionism but intensifying concern about trade's societal impacts Entirely new chapters treat the deepening of partisan divisions and the rise of trade and issues especially labor and the environment The author concludes with a comprehensive economic and political strategy to cope with globalization and maximize its benefits The original edition of American Trade Politics won the Gladys Kammerer Award of the American Political Science Association for the best book on US national policy

**Constituent Interests and U.S. Trade Policies** Alan Verne Deardorff, Robert Mitchell Stern, 2010-05-25 The contributors to this volume economists and political scientists from academic institutions the private sector and the Ways and Means Committee of the U S House of Representatives came together to discuss an important topic in the formation of U S international trade policy the representation of constituent interests In the resulting volume they address the objectives of groups who participate in the policy process and examine

how each group's interests are identified and promoted. They look at what means are used for these purposes and the extent to which the groups' objectives and behavior conform to how the political economy of trade policy is treated in the economic and political science literature. Further, they discuss how effective each group has been. Each of the book's five parts offers a coherent view of important components of the topic. Part I provides an overview of the normative and political economy approaches to the modeling of trade policies. Part 2 discusses the context of U.S. trade policies. Part 3 deals with the role of sectoral producing interests, including the relationship of trade policy to auto, steel, textile, semiconductor, aircraft, and financial services. Part 4 examines other constituent interests, including the environment, human rights, and the media. Part 5 provides commentary on such issues as the challenges that trade policy poses for the new administration and the 105th Congress. The volume ultimately offers important and more finely articulated questions on how trade policy is formed and implemented. Contributors are Robert E. Baldwin, Jagdish Bhagwati, Douglas A. Brook, Richard O. Cunningham, Jay Culbert, Alan V. Deardorff, I. M. Destler, Daniel Esty, Geza Feketekuty, Harry Freeman, John D. Greenwald, Gene Grossman, Richard L. Hall, Jutta Hennig, John H. Jackson, James A. Levinsohn, Mustafa Mohatarem, Robert Pahre, Richard C. Porter, Gary R. Saxonhouse, Robert E. Scott, T. N. Srinivasan, Robert M. Stern, Joe Stroud, John Sweetland, Raymond Waldmann, Marina v. N. Whitman, and Bruce Wilson. Alan V. Deardorff and Robert M. Stern are Professors of Economics and Public Policy, University of Michigan.

**American Trade Politics, 4th Edition** , In this comprehensive revision of the most influential widely read analysis of the US trade policymaking system, Destler addresses how globalization has reshaped trade politics, weakening traditional protectionism but intensifying concern about trade's societal impacts. Entirely new chapters treat the deepening of partisan divisions and the rise of trade and issues, especially labor and the environment. The author concludes with a comprehensive economic and political strategy to cope with globalization and maximize its benefits. The original edition of *American Trade Politics* won the Gladys Kammerer Award of the American Political Science Association for the best book on US national policy.

**Ideas, Interests, and American Trade Policy** Judith Goldstein, 2019-05-15 To citizens and political analysts alike, United States trade law is an incoherent conglomeration of policies, both liberal and protectionist. Seeking to understand the contradictions in American policy, Judith Goldstein offers the first book to demonstrate the impact of the political past on today's trade decisions. As she traces the history of trade agreements from the antebellum era through the 1980s, she addresses a fundamental question: What effects do shared ideas about economics, as opposed to national power or individual self-interest, have on the institutions that make and enforce trade law? Goldstein argues that successful ideas become embedded in institutions and typically outlive the time during which they served social interests. She sets the stage with a discussion of the shifting commercial policy of the first half of the nineteenth century. After examining the consequences of the Republican party's decision to promote high tariffs between 1870 and 1930, she then considers in detail the political aftermath of the Great Depression when the Democratic party settled on a reciprocal trade platform. Because the Democrats did not

completely dismantle the existing system however the combined legacies of protection and openness help explain the intricacies in the forms of protectionism that political leaders have advocated since World War II Readers in such fields as political science political economy policy studies and law international relations and American history will welcome Ideas Interests and American Trade Policy *National Politics in a Global Economy* Philip A. Mundo,1999-10-20 In our increasingly globalized world U S trade policy stands at the intersection of foreign and domestic affairs This book explains trade policy in terms of domestic politics presenting a concise account of its origins and political significance Although trade policy is a component of foreign policy Philip A Mundo explains how it is rooted in the domestic policy process and carries with it enormous implications for domestic affairs He reviews the growing importance of trade policy since World War II particularly over the past twenty years and shows how recent policies like NAFTA are shaped by the domestic agenda Mundo explains trade policy as the product of a three stage process comprising agenda setting program adoption and implementation He reviews this process in terms of the ideas that inform trade policy the interests that seek to influence it and the institutions that shape it He also addresses the importance of specific measures such as administrative relief and trade sanctions This book distills the essence of the trade policy process into a concise innovative framework accessible to students and general readers With the growing importance of trade policy it makes explicit many of the subtleties surrounding policymaking while fully explicating the legal and international context in which trade operates *The New Politics of American Trade* I. M. Destler,Peter J. Balint,1999 Imports pour into the United States up by 79 percent in six years The trade deficit more than doubles The House of Representatives solidly rejects a bill that would liberalize global and regional trade and endorses import quotas for a major manufactured product by a two to one margin Although at first glance these events of the 1990s might sound like past chapters of US trade politics in fact the political dynamics have changed in significant ways As the impact of globalization comes into focus politically important constituencies have begun to resist trade liberalization Labor and environmental groups in particular demanding that their concerns be addressed have succeeded in fracturing the long standing bipartisan protrade coalition in Congress and in the process have undercut US leadership in liberalizing global trade This new study reexamines the landscape of trade politics It shows how trade advocates and labor and environmental skeptics differ significantly in both their substantive views and their political and organizational cultures The authors demonstrate how this new challenge differs from that of traditional trade protectionism likening it instead to the debate a century ago over whether and how to regulate American capitalism for social purposes The analysis leads to a set of recommendations aimed at constructive compromise and a new political foundation for US trade policy leadership **American Trade Politics and the Triumph of Globalism** Orin Kirshner,2014-05-09 A deep and unresolved tension exists within American trade politics between the nation s promotion of an open world trading system and the operations of its democratic domestic political regime Whereas most scholarly attention has focused on how domestic

politics has interfered with the United States global economic leadership Orin Kirshner offers here an analysis of the ways in which U S leadership in the arena of global trade has affected American democracy and the domestic political regime By participating in multilateral trade agreements the U S Congress has transferred its trade policymaking authority to the president and through international trade negotiations from the American state to the GATT WTO regime This reorganization of policymaking authority has resulted in the triumph of globalism and fundamentally alters the citizen state relationship assumed in democratic theory Kirshner illustrates this process through four case studies The Reciprocal Trade Agreements Act of 1945 The Trade Expansion Act of 1962 The Trade Act of 1974 The Omnibus Trade and Competitiveness Act of 1988 and further examines the impact of the Uruguay Round Agreements Act of 1994 on the political and institutional structure of American trade politics up to the current period American Trade Politics and the Triumph of Globalism makes a significant contribution to the study of both international trade and domestic American politics This is essential reading for students and scholars of trade policy international political economy American politics and democratic theory **Fundamentals Of U.s. Foreign Trade Policy** Stephen D Cohen,Joel Richard Paul,Robert A Blecker,1996-02-08 A study of how trade operates and how trade policy is made The authors start with a brief review of the history of US trade policy explain key economic principles and theories and then outline political processes and participants and examine the laws **Politics, Process, and American Trade Policy** Sharyn O'Halloran,1990 **Domestic Structures and International Trade** Candido Tomas Garcia Molyneux,2001-02 The author a lawyer in Brussels and lecturer at the College of Europe in Natolin places international trade law within an economic political and sociological context focusing on the US and the European Union Contending that despite globalization societies organize themselves differently and have diverse expectations of their governments and market actors he explores how these differences affect the trading partners policies in an age when nearly everything can be considered a matter of commerce He also examines how domestic structures affect trade policy when the external world has a strong impact on the domestic sphere Distributed by ISBS c Book News Inc **Trade Policy Issues** Ms.Naheed Kirmani,Mr.Chorng-Huey Wong,1997-04-15 This book edited by Chorng Huey Wong and Naheed Kirmani examines a wide range of trade policy issues relevant in the 1990s that were the subject of a seminar organized by the IMF in 1996 The topics include the design and implementation of trade reform trade liberalization in industrial and transition economies regional trading arrangements the impact of the Uruguay Round the role of the World Trade Organization and post Uruguay Round issues **Negotiating the Free Trade Area of the Americas** Z. Arashiro,2011-05-09 The first detailed historical account of the Free Trade Area of the Americas FTAA negotiations this book covers the genesis of the project in the early 1990s to its demise in late 2003 It examines how the FTAA an Inter American policy idea was incompatible with the predominant ideas and beliefs of Brazilian and American decision makers as to how they could and should conduct their countries foreign trade policy in the Western Hemisphere **Handbook of International Economics**

**Power Shifts** John A. Dearborn, 2021-09-10 The extraordinary nature of the Trump presidency has spawned a resurgence in the study of the presidency and a rising concern about the power of the office In Power Shifts Congress and Presidential Representation John Dearborn explores the development of the idea of the representative presidency that the president alone is elected by a national constituency and thus the only part of government who can represent the nation against the parochial concerns of members of Congress and its relationship to the growth of presidential power in the 20th century Dearborn asks why Congress conceded so much power to the Chief Executive with the support of particularly conservative members of the Supreme Court He discusses the debates between Congress and the Executive and the arguments offered by politicians scholars and members of the judiciary about the role of the president in the American state He asks why so many bought into the idea of the representative and hence strong presidency despite unpopular wars failed foreign policies and parochial actions that favor only the president's supporters This is a book about the power of ideas in the development of the American state
