Satellite Newsgathering Jonathan Higgins, 2012-08-06 Praise for the first edition It is a wonderful source of information and has the merit of going straight to the subject being technically precise although very easy to understand There are numerous pictures photographs diagrams which make the reading a real pleasure European Broadcasting Union Technical Review The complexity of a satellite newsgathering system could be a four month long college course with a high tuition rate and an enrolment number so large you have to watch your professor on a TV screen Jonathan Higgins might have saved the independent learner a few attendance point deductions by fitting it into one book Satellite Broadband magazine An ideal introduction for anyone working or interested in satellite newsgathering SNG The new edition of this popular book builds upon the success of the first an important and valuable work that is extremely easy to read comprehensive in its treatment and detailed where necessary SNG used to be an immensely complex and expensive affair where broadcasting organizations were at the mercy of an expert who sat in a lonely corner until needed Things have changed everyone in a global news organization needs to know about it now This is not only because of the high costs of mistakes but because now even non technical journalists on the ground have to operate their own equipment Learn the skills basics of equipment cutting edge technology and critical safety issues of satellite newsgathering

The Media Effect Jim Willis, 2007-06-30 In a postmodern age where the media s depictions of reality serve as stand ins for the real thing for so many Americans how much government policy is being made on the basis of those mediated realities and on the public reaction to them When those mediated depictions deviate from the truth of the actual situation how serious a situation is that Time and again both anecdotal evidence and scientific research seem to confirm that the news media often influence government action At the least they speed up policy making that would otherwise take a slower more reasoned course Sometimes the media serve as the communication link among world leaders who may be ideological enemies Because of the enduring popularity of television news government leaders monitor the networks story selections and track public opinion trends generated by interviews done in these stories These then become the substance of proposed legislation and or executive action as politicians strive to prove themselves able listeners to the heartland of America and also prove themselves worthy of re election This book examines many specific events that show how major news operations either painted a truthful or distorted picture of national and international events and how governmental leaders responded following those representations

were at a low point in June of 2001 when President Bush came to Europe the first time All of that changed overnight with the terror attacks of September 11 2001 Millions of Europeans demonstrated their solidarity with the American people In Berlin for example approximately 200 000 people took part in a demonstration in front of the Brandenburg Gate on September 14 to show their solidarity with the American people International terrorism was the new common challenge For several months it seemed like the old trans atlantic quarrels would be forgotten There was a new spirit in transatlantic relations a new commitment to fight common enemies and protect common values The question was how long would it last
