is said to have been one of the most prolific reformers of its public administration Successive reforms have been accompanied by claims that the changes would make the world a better place by transforming the way government worked Despite much discussion and debate over government makeovers and reforms however there has been remarkably little systematic evaluation of what happened to cost and performance in UK government during the last thirty years A Government that Worked Better and Cost Less aims to address that gap offering a unique evaluation of UK government modernization programmes from 1980 to the present day The book provides a distinctive framework for evaluating long term performance in government bringing together the working better and costing less dimensions and presents detailed primary evidence within that framework This book explores the implications of their findings for widely held ideas about public management the questions they present and their policy implications for a period in which pressures to make government work better and cost less are unlikely to go away      The Politics of Economic Decline James E. Alt, 1979-11 This book originally published in 1979 deals with popular perceptions and expectations of economic trends popular preferences among economic policies and the relationships between these and broader aspects of political behaviour like voting attachment to the party system and political and social attitudes The economy has long been held to be a critical determinant of the ability of governments to gain election This book provides unique evidence about popular expectations of inflation evaluation of economic management and preferences among competing economic goals and policies without which the connection between economic management and electoral success cannot be understood At the same time by dealing extensively with electoral survey data for Britain since 1964 the book provides a contemporary history of electoral and political behaviour in an age of unprecedented economic management      **Making Political Choices** Harold D. Clarke, Allan Kornberg, Thomas J.

King,1997-10-05 Confidence in American government has been declining for three decades Leading Harvard scholars here explore the roots of this mistrust by examining the government s current scope its actual performance citizens perceptions of its performance and explanations that have been offered for the decline of trust

*Multi-Level Electoral Politics* Sona N. Golder,Ignacio Lago,André Blais,Elisabeth Gidengil,Thomas Gschwend,2017-10-06 National level elections receive more attention from scholars and the media than elections at other levels even though in many European countries the importance of both regional and European levels of government has grown in recent years The growing importance of multiple electoral arenas suggests that scholars should be cautious about examining single levels in isolation Taking the multilevel structure of electoral politics seriously requires a re examination of how the incentives created by electoral institutions affect the behaviour of voters and party elites The standard approach to analysing multilevel elections is the second order election SOE model in which national elections are considered to be first order elections while other elections are second order However this model does not provide micro mechanisms that determine how elections in one arena affect those in another or explain variations in individual voting behaviour The objective of this book is to explain how party and voter behaviour in a given election is affected by the existence of multiple electoral arenas It provides original qualitative and quantitative data to examine European national and subnational elections in France Germany and Spain from 2011 2015 The volume examines party mobilization efforts across multiple electoral arenas as well as decisions by individual voters with respect to turnout strategic voting and accountability This book provides the first systematic analysis of multilevel electoral politics at three different levels across multiple countries
