Politics Of British Arms Sales Since 1964 To Secure Our Rights:

The Politics of British Arms Sales Since 1964 Mark Phythian, 2000 Drawing on documents this is an analysis of British arms sales policy It provides an overview of the course of British arms sales policy sets the related issues in context and explains Britain's continuing addiction to the arms sales fix **The British left and the defence economy** Keith Mc Loughlin, 2022-03-29 Forty years before COVID 19 socialists in Britain campaigned for workers to have the right to make socially useful products from hospital equipment to sustain the NHS to affordable heating systems for the impoverished elderly This movement held one thing responsible above all else for the nation's problems the burden of defence spending In the middle of the Cold War the left put a direct challenge to the defence industry the Labour government and trade unions The response it received revealed much about a military industrial state that prioritised the making and exporting of arms for political favour and profit Looking at peace activism from the early 1970s to Labour's landslide defeat in the 1983 general election this book examines the conflict over the cost of Britain's commitment to the Cold War and asserts that the wider left presented a comprehensive and implementable alternative to the stark choice between making weapons and joining the dole queue

The regulation of standards in British public life David Hine, Gillian Peele, 2016-03-02 This is an analysis of the revolution of the last two decades that has built an extensive new regulatory apparatus governing British public ethics The book sets the new machinery in the wider institutional framework of British government Its main purpose is to understand the dilemmas of regulatory design that have emerged in each area examined **Law and the Arms Trade** Laurence Lustgarten, 2020-09-03 This ground breaking book offers an extensive legal analysis grounded in public EU and international law of arms trade regulation integrated with insights drawn from international relations The sale of weapons and related technologies is globally one of the most politically controversial and ethically contentious forms of commerce Intimately connected with sustaining repressive governments and violations of international human rights and humanitarian law arms exports are also a central element in the economic and strategic policies of the governments of all large industrial states They have also been the source of abundant corruption and of serious challenges to the norms and effectiveness of constitutional accountability in democratic states On paper the arms trade is heavily regulated national legislation and international treaties are in place which purport to prohibit certain transactions and limit others Yet despite its importance legal and international relations scholarship on the subject has been surprisingly limited This book fills this gap in the literature by examining and comparing the export control regimes of eight leading nations USA Russia the UK France Germany Sweden China and India with chapters contributed by leading experts in the field of law and international relations

External Powers and the Gulf Monarchies Jonathan Fulton, Li-Chen Sim, 2018-09-03 The Gulf monarchies have been generally perceived as status quo actors reliant on the USA for their security but in response to regional events particularly the Arab Spring of 2011 they are pursuing more activist foreign policies which has allowed other international powers to play

a larger role in regional affairs This book analyses the changing dynamic in this region with expert contributors providing original empirical case studies that examine the relations between the Gulf monarchies and extra regional powers including the USA Russia China India Brazil Turkey Japan South Korea France and the United Kingdom At the theoretical level these case studies explore the extent to which different international relations and international political economy theories explain change in these relationships as the regional political and security environment shifts Focusing on how and why external powers approach their relationships with the Gulf monarchies contributors ask what motivates external powers to pursue deeper involvement in an unstable region that has seen three major conflicts in the past 40 years Addressing an under analysed yet important topic the volume will appeal to scholars in the fields of international relations and international political economy as well as area specialists on the Gulf and those working on the foreign policy issues of the extra regional powers studied

Sovereign Emergencies Patrick William Kelly, 2018-05-10 The concern over rising state violence above all in Latin America triggered an unprecedented turn to a global politics of human rights in the 1970s Patrick William Kelly argues that Latin America played the most pivotal role in these sweeping changes for it was both the target of human rights advocacy and the site of a series of significant developments for regional and global human rights politics Drawing on case studies of Brazil Chile and Argentina Kelly examines the crystallization of new understandings of sovereignty and social activism based on individual human rights Activists and politicians articulated a new practice of human rights that blurred the borders of the nation state to endow an individual with a set of rights protected by international law Yet the rights revolution came at a cost the Marxist critique of US imperialism and global capitalism was slowly supplanted by the minimalist plea not to be tortured

Ghana News , 1969 The Falklands War Ezequiel Mercau, 2019-05-16 Panoramic transnational history of the Falklands War and its imperial dimensions which explores how a minor squabble mushroomed into war

Sanctions and Honorary Whites Masako Osada, 2002-02-28 This study critically examines for the first time the unlikely friendship between apartheid South Africa and non white Japan In the mid 1980s Japan became South Africa s largest trading partner while South Africa purportedly treated Japanese citizens in the Republic as honorary whites under apartheid Osada probes the very different foreign policy making mechanisms of the two nations and analyzes their ambivalent bilateral relations against the background of postcolonial and Cold War politics She concludes that these diplomatic policies were adopted not voluntarily or willingly but out of necessity due to external circumstances and international pressure Why did Japan exercise sanctions against South Africa in spite of their strong economic ties How effective were these sanctions What did the sensational term honorary whites actually mean When and how did this special treatment begin How did South Africa get away with apparently treating the Japanese as whites but not Chinese other Coloureds Indians and so forth By using Japan s sanctions against South Africa and South Africa s honorary white treatment of the Japanese as key concepts the author describes the development of bilateral relations during this unique era The book

also covers the fascinating historical interaction between the two countries from the mid 17th century onward

Bindi, 2019-04-23 America First is America Alone Foreign policy is like physics vacuums quickly fill As the United States retreats from the international order it helped put in place and maintain since the end of World War II Russia is rapidly filling the vacuum Federiga Bindi s new book assesses the consequences of this retreat for transatlantic relations and Europe showing how the current path of US foreign policy is leading to isolation and a sharp decrease of US influence in international relations Transatlantic relations reached a peak under President Barack Obama But under the Trump administration withdrawal from the global stage has caused irreparable damage to the transatlantic partnership and has propelled Europeans to act more independently Europe and America explores this tumultuous path by examining the foreign policy of the United States Russia and the major European Union member states The book highlights the consequences of US retreat for transatlantic relations and Europe demonstrating that America first is becoming America alone perhaps marking the end of transatlantic relations as we know it with Europe no longer beholden to the US national interest **British**

Foreign Policy in former Yugoslavia 1989-1999 John P McCumiskey, 2023-12-06 British Foreign Policy in former Yugoslavia 1989 1999 Brotherhood and Unity Lost gives a broad analysis of Britain s foreign policy during the wars of Yugoslav secessions from 1992 to 1999 Normative approaches to Britain s foreign policy during this period have tended to place it in to two halves The notion there was a new morality in Britain s foreign policy appeared after New Labour s election landslide on 1 May 1997 Robin Cook declared shortly after the victory there would be an ethical dimension to Labour s foreign policy and this appeared to chart new territory As a result this would be a departure from what former US Assistant Secretary of State James Rubin believed was the hyper realism of the traditional British kind under British Prime Minister John Major The book includes interviews with key actors provides new archive material and re examines claims by the New Orthodoxy which became prevalent after 1999 **British Defence Policy Since 1945** Ritchie Ovendale, 1994 Based on

excerpts from original sources this book provides an introduction to the controversies and dilemmas that have confronted those making and implementing British defence policy since the end of World War II Ovendale explores the policy dilemmas caused by Britain's parallel commitments to continental Europe and to a global foreign policy the legacy of her imperial past He also examines the decision in 1957 to rely on the nuclear deterrent abolish conscription and move away from a maritime strategy and the role of the Treasury in dictating the limits of British defence policy *Parliamentary Debates. Books In Print 2004-2005 Ed Bowker Staff, Staff Bowker, Ed, 2004 Democratic Socialism and the Cost of Defence Mary Kaldor, Dan Smith, Steve Vines, 2018-12-07 First published in 1979 The report of the Labour Party Defence Study Group which met from early 1975 to mid 1977 represents a unique attempt to portray defence policy in the context of disarmament and the need to restructure and control the institutions of defence in particular the defence industry The report presented the fullest study made by any British political party concerning the implications and consequences of its stated defence policy and embodied an examination of defence from the perspective of approaches of disarmament At the same time the search for a new policy in international relations was harmonised with the further development of a new industrial strategy concentrating upon the potential for converting part of military industry to civil work This work which presents a distinctive intervention in the general debate concerning defence policy industrial and technological planning economic priorities and public policy will be of considerable relevance to both specialists in each of these fields as well as the general reader
