Politics Personality Social Science In:

The Qualitative-Quantitative Distinction in the Social Sciences B. Glassner, J.D. Moreno, 2013-11-27 Without of course adopting a Platonic metaphysics the eighteenth century philosophes were Grecophiles who regarded the Athenian philosophers as their intellectual forbearers and mentors So powerful was their identification with classification that ancient ideas were taken as keys to the design of the modern world but usually the ideas were taken separately and as divided from their systematic context The power of number was an idea the Enlightenment thinkers deployed with their legendary passion and vigor particularly as an instrument for social reconstruction It is no exaggeration to say that the role of quantities in contemporary social scientific theorizing cannot be understood with any depth absent a recollection of the philosophes axial development of the notion of quantification It is a commonplace that for the philosophes progress required releasing human abilities to have power over nature A prerequisite for this power was knowledge of the underlying causes of natural events knowledge that required quantitative precision Enlightenment thinkers were sufficiently aware of themselves as products of their time to appreciate the importance of a liberal social environment to the knowledge enterprise the supposition that the reverse is also the case that enhanced knowledge could advance social conditions came easily

Social Science in the Crucible Mark C. Smith, 1994 The 1920s and 30s were key decades for the history of American social science The success of such quantitative disciplines as economics and psychology during World War I forced social scientists to reexamine their methods and practices and to consider recasting their field as a more objective science separated from its historical foundation in social reform The debate that ensued fiercely conducted in books articles correspondence and even presidential addresses made its way into every aspect of social science thought of the period and is the subject of this book Mark C Smith first provides a historical overview of the controversy over the nature and future of the social sciences in early twentieth century America

and then through a series of intellectual biographies offers an intensive study of the work and lives of major figures who participated in this debate Using an extensive range of materials from published sources to manuscript collections Smith examines objectivists economist Wesley Mitchell and political scientist Charles Merriam and the more purposive thinkers historian Charles Beard sociologist Robert Lynd and political scientist and neo Freudian Harold Lasswell He shows how the debate over objectivity and social purpose was central to their professional and personal lives as well as to an understanding of American social science between the two world wars These biographies bring to vivid life a contentious moment in American intellectual history and reveal its significance in the shaping of social science in this country Managing Political Change Irene L. Gendzier, 2019-03-04 For nearly three decades policymakers and students have been concerned with Third World societies in transition Conventional interpretations of political change formalized in studies of political development have dominated approaches to analyzing such changes Yet argues the author these interpretations have been justly criticized as bankrupt and irrelevant to Third World realities Why are they reproduced How can one explain the belief that these approaches remain viable These are some of the questions addressed in this wideranging review of the literature of political development and the paradigms that have guided analysis of political change over the past thirty years Examining how political development theories are rooted in U S foreign policy domestic political trends and changes in postwar political science Dr Gendzier grounds the traditional approach to political development in recent history and politics Her analysis raises questions about how development doctrine is related to foreign policy as well as noting development theory s debt to cold war ideology and revisionist theories of liberal democracy Dr Gendzier s interpretation sheds light on the reasons for the current theoretical bias that favors approaching politics in terms of psychology and culture an approach that she states has had devastating effects on our understanding of politics Mathematical-Statistical Models and Qualitative Theories for Economic and Social Sciences Šárka Hošková-Mayerová, Fabrizio Maturo, Janusz Kacprzyk, 2017-06-20 This book presents a broad spectrum of problems related to statistics mathematics teaching social science and economics as well as a range of tools and techniques that can be used to solve these problems It is the result of a scientific collaboration between experts in the field of economic and social systems from the University of Defence in Brno Czech Republic G d Annunzio University of Chieti Pescara Italy Pablo de Olavid eUniversity of Sevilla Spain and Ovidius University in Constan a Romania The studies included were selected using a peer review process and reflect heterogeneity and complexity of economic and social phenomena They and present interesting empirical research from around the globe and from several research fields such as statistics decision making mathematics complexity psychology sociology and economics The volume is divided into two parts The first part Recent trends in mathematical and statistical models for economic and social sciences collects papers on quantitative matters which propose mathematical and statistical models for social sciences economics finance and business administration The second part Recent trends in qualitative theories for economic and social sciences includes papers on

qualitative matters which discuss social economic and teaching issues It is an ideal reference work for all those researchers interested in recent quantitative and qualitative tools Covering a wide range of topics it appeals in equal measure to mathematicians statisticians sociologists philosophers and specialists in the fields of communication social and political sciences *Verbal Behavior and Politics* Doris Appel Graber, 1976 Revitalizing Political Psychology William Ascher, Barbara Hirschfelder-Ascher, 2004-11-16 The goal of this book is to recapture the diminished roles of affect psychological needs and the psychodynamic mechanisms that are crucial for understanding political behavior by explaining and extending the contributions of Harold D Lasswell the dominant figure in political psychology in the mid twentieth century Although Lasswell was best known for applying psychodynamic theories to politics this book also demonstrates how his framework accommodated for cognitive processes and social interactions ranging from communications to policy making The authors use Lasswell s contributions and the debates over his ideas as a springboard for examining current policy political and leadership issues *Revitalizing Political Psychology* presents and extends four aspects of Lasswell s contributions to the field the psychodynamic mechanisms drawn from psychoanalytic theory the use of symbol associations to understand political propaganda the analysis of democratic character for both the public and the elites and the structure of belief systems In so doing the authors link personality and political communication theory to democratic practice The authors also critique leadership studies using Lasswell s concerns over the risks to democratic accountability and the current preoccupation with strengthening the roles of charismatic and transformational leaders Intended for researchers practitioners and students in the areas of political and historical psychology political strategy and political communication the book s emphasis on psychodynamics also appeals to psychoanalysts and the material on leadership appeals to professionals in management and industrial organizational psychology **The Idea of Culture in the Social Sciences** Louis Schneider, Charles M. From Small Talk to Microaggression Michael Lempert, 2024-12-06 A provocative and eye opening history of how we have studied and theorized social interaction In this ambitious wide ranging book anthropologist Michael Lempert offers a conceptual history that explores how why and with what effects we have come to think of interactions as scaled Focusing on the sciences of interaction in midcentury America Lempert traces how they harnessed diverse tools and media technologies from dictation machines to 16mm film to study communication microscopically In looking closely many hoped to transform interaction to improve efficiency grow democracy curb racism and much else Yet their descent into a microworld created troubles with some critics charging that these scientists couldn t see the proverbial forest for the trees Exploring talk therapy and group dynamics studies social psychology and management science conversation analysis micropolitics and more Lempert shows how scale became a defining problem across the behavioral sciences Ultimately he argues if we learn how our objects of study have been scaled in advance we can better understand how we think and interact with them and with each other across disciplinary and ideological divides Even as once fierce debates over micro and macro have largely

subsidized Lempert shows how scale lives on and continues to affect the ethics and politics of language and communication today

Grounding Social Sciences in Cognitive Sciences Ron Sun, 2012

Exploration of a new integrative intellectual enterprise the cognitive social sciences *Dead Men's Propaganda* Terhi Rantanen, 2024-05-07 In *Dead Men's Propaganda* Ideology and Utopia in Comparative Communications Studies Terhi Rantanen investigates the shaping of early comparative communications research between the 1920s and 1950s notably the work of academics and men of practice in the United States Often neglected this intellectual thread is highly relevant to

understanding the 21st century's challenges of war and rival streams of propaganda. Borrowing her conceptual lenses from Karl Mannheim and Robert Merton, Rantanen draws on detailed archival research and case studies to analyse the extent and importance of work outside and inside the academy, illuminating the work of pioneers in the field. Some of these were well-known academics such as Harold Lasswell and the authors of the seminal book *Four Theories of the Press*. Others operated in the world of news agencies such as Associated Press's Kent Cooper or were marginalised as migrant scholars, notably Paul Kecskemeti and Nathan Leites. Her study shows how comparative communications from its very beginning can be understood as governed by the Mannheimian concepts of ideology and utopia and the power play between them. The close relationship between these two concepts resulted in a bias in knowledge production that contributed to dominant narratives of generational conflicts and to the demarcation of Insiders and Outsiders. By focusing on a generation at the forefront of comparative communications at this pivotal time in the 20th century, this book challenges orthodoxies in the intellectual histories of communication studies.

Middle Class: An Intellectual History through Social Sciences Matteo Battistini, 2022-07-18

Matteo Battistini offers a critical deconstruction of the fetish that social sciences have forged for legitimising American capitalism. The intellectual history of the middle class provides the social history of a political concept that assumes a specific scientific content, acquiring an ideological centrality that has no equal in European history. The social sciences have freed the middle class from its historical relationship with work in an attempt to emancipate it from the tension into which it was continually dragged by class conflict. In this way, the social sciences overturn the image of opposing forces of labour and capital into a consensual order whereby capitalism and democracy would coexist without tension. This book was originally published as *Storia di un feticcio. La classe media americana dalle origini alla globalizzazione* by Mimesis Milan, Italy, 2020.
