Trash Vortex Danielle Smith-Llera, 2018-01-01 Millions of tons of plastic slip into oceans every year Some floats and travels slowly with the currents endangering the health of marine animals The rest is hardly visible but is far more dangerous Tiny bits of plastic sprinkle the ocean's surface or mix into the sandy seafloor and beaches It ends up inside birds fish and other animals harming them and ultimately humans Experts struggle with fear and hope as they work to stop the flood of plastic threatening living organisms across the globe

What is the Impact of Ocean Pollution? Craig E. Blohm, 2020 Ocean pollution takes many forms In fact most pollution originates not in the oceans but on dry land The enormity of ocean pollution may be daunting but efforts are already being made to address the problem The fight against ocean pollution has begun but more work needs to be done and awareness raised of the dangers that face Earth's vital seas

Plastic Ocean: Art and Science Responses to Marine Pollution Ingeborg Reichle, 2021-07-05 Our oceans are in an ecological crisis due to their contamination with millions of tons of toxic microplastic particles In just a few years the volume of microplastic particles will exceed that of plankton in our oceans and turn them into a huge sea of plastic This publication brings together numerous international art projects related to environmental activities DIY biotechnology and science and draws attention to the irreversible destruction of our marine ecosystems the current threat posed by the loss of marine animal biodiversity for example or the decline in oxygen production due to massive plankton loss It also presents current scientific findings on sustainable alternatives to plastic
