Etzel,2013-11-15 Over the past four decades the prevalence of autism asthma ADHD obesity diabetes and birth defects have grown substantially among children around the world Not coincidentally more than 80 000 new chemicals have been developed and released into the global environment during this same period Today the World Health Organization attributes 36% of all childhood deaths to environmental causes Children s environmental health is a new and expanding discipline that studies the profound impact of chemical and environmental hazards on child health Amid mounting evidence that children are exquisitely sensitive to their environment and that exposure during their developmental windows of susceptibility can trigger cellular changes that lead to disease and disability in infancy childhood and across the life span there is a compelling need for continued scientific study of the relationship between children s health and environment The Textbook of Children s Environmental Health codifies the knowledge base and offers an authoritative and comprehensive guide to this important new field Edited by two

internationally recognized pioneers in the area this volume presents up to date information on the chemical biological physical and societal hazards that confront children in today s world pesticides indoor and outdoor air pollution lead arsenic phthalates bisphenol A brominated flame retardants ionizing radiation electromagnetic fields and the built environment It presents carefully documented data on rising rates of disease in children offers a critical summary of new research linking pediatric disease with environmental exposures and explores the cellular molecular and epigenetic mechanisms underlying diseases of environmental origin With this volume s emphasis upon integrating theory and practice readers will find practical approaches to channeling scientific findings into evidence based strategies for preventing and identifying the environmental hazards that cause disease in children It is a landmark work that will serve as the field s benchmark for years to come
