Polycentric Governance And Development Readings From The Workshop In Political Theory And Policy Analysis:

Polycentric Governance and Development Michael Dean McGinnis, 1999 How communities transcend the tragedy of the commons *Elinor Ostrom and the Bloomington School of Political Economy* Daniel H. Cole, Michael D. McGinnis, 2017-03-21 In addition to winning the 2009 Nobel Prize in Economic Sciences for her path breaking research on economic governance especially the commons Elinor Lin Ostrom also made important contributions to other fields of political economy and public policy This four volume compendium of papers written by Lin often with coauthors most notably her husband Vincent along with papers by others expanding on her work brings together the strands of her entire empirical analytical theoretical and methodological research program Together with Vincent's important theoretical contributions they defined a distinctive Bloomington School of political economic thought Volume 3 explores the historical development of the Institutional Analysis and Development IAD framework illustrates its application to a wide range of specific policy problems and highlights recent extensions that ensure it will remain a vibrant focus of research for years to come The IAD framework emerged from a long series of interdisciplinary collaborative research projects but the guiding figure in its development was Elinor Ostrom Anyone familiar with the full range of her research will recognize common presuppositions and themes for which she used the IAD framework as an organizing device This book collects examples of policy relevant applications of IAD to a wide range of policy sectors In a fundamental sense the IAD framework helps us understand how Ostrom's mind worked when she approached a particular problem of policy and it highlights those factors that she asserted needed to be considered in any complete analysis Unfortunately she did not leave us a complete or definitive guidebook on how to apply this framework This volume collects important components of such a guidebook from a wide range of sources including previously unpublished papers and as such it should help anyone seeking to use this framework to analyze a variety of policy areas Polycentricity, Islam, and Development Anas Malik, 2017-12-26 Development analysts often focus on the role of the state in making the right rules by which to govern society assuming that governance is exclusively or mainly the work of the central government authority The reality in many developing countries particularly those with weak central government authorities is that governance happens through diverse rules and in many centers of decision making in ways that are formal and informal official and unofficial This real world polycentricity can be dysfunctional or productive depending in part on shared understandings between decision making entities about how to relate to each other Those shared understandings come from cultural backgrounds historical interactions and other sources Political economist Anas Malik argues that well functioning polycentricity in developing countries depends in part on the shared understandings between official government entities and unofficial units that provide collective choice in particular arenas In Muslim majority contexts the Islamic tradition contrary to the image of a top down single voiced religious law provides ample resources supporting shared understandings that accommodate diverse rules and collective choice units Pakistan the largest Muslim majority country at

its founding provides an important case After building on the development literature to suggest a typology of collective choice units in developing countries Malik explores resources in the Islamic tradition that support polycentric governance The book then examines major deliberations in Pakistan s history particularly through documented inquiries into serious political crises such as sectarian religious agitation and civil war and through a selective survey of types of jurisdictions and collective choice units Malik argues that there are significant polycentric understandings in Pakistan s historical lineage but that these are heavily contested While there is potential for polycentric development in Pakistan the viability of polycentric order is constrained by countering forces and contextual factors

Public Governance and the Classical-liberal

Perspective Paul Dragos Aligica, Peter J. Boettke, Vlad Tarko, 2019 Drawing on classical liberalism develops a systematic framework of principles regarding public governance

New Public Governance, the Third Sector, and Co-Production

Victor Pestoff, Taco Brandsen, Bram Verschuere, 2013-06-19 In recent years public management research in a variety of disciplines has paid increasing attention to the role of citizens and the third sector in the provision of public services Several of these efforts have employed the concept of co production to better understand and explain this trend This book aims to go further by systematizing the growing body of academic papers and reports that focus on various aspects of co production and its potential contribution to new public governance It has an interdisciplinary focus that makes a unique contribution to the body of knowledge in this field at the cross roads of a number of disciplines including business administration policy studies political science public management sociology third sector studies etc The unique presentation of them together in this volume both allows for comparing and contrasting these different perspectives and for potential theoretical collaboration and development More particularly this volume addresses the following concerns What is the nature of co production and what challenges does it face How can we conceptualize the concept of co production How does co production works in practice How does co production unfold in reality What can be the effects of co production And more specific firstly how can co production contribute to service quality and service management in public services and secondly what is the input of co production on growing citizen involvement and development of participative democracy

Understanding Institutional

Diversity Elinor Ostrom, 2009-11-13 The analysis of how institutions are formed how they operate and change and how they influence behavior in society has become a major subject of inquiry in politics sociology and economics A leader in applying game theory to the understanding of institutional analysis Elinor Ostrom provides in this book a coherent method for undertaking the analysis of diverse economic political and social institutions Understanding Institutional Diversity explains the Institutional Analysis and Development IAD framework which enables a scholar to choose the most relevant level of interaction for a particular question This framework examines the arena within which interactions occur the rules employed by participants to order relationships the attributes of a biophysical world that structures and is structured by interactions and the attributes of a community in which a particular arena is placed The book explains and illustrates how to use the IAD

in the context of both field and experimental studies Concentrating primarily on the rules aspect of the IAD framework it provides empirical evidence about the diversity of rules the calculation process used by participants in changing rules and the design principles that characterize robust self organized resource governance institutions

Co-Production and Public Service Management Victor Pestoff, 2018-10-03 This volume compiles a dozen essays by one of the most prolific proponents of co production as a solution for many of the challenges facing public services and democratic governance at the outset of the 21st Century Co production is considered a partnership between citizens and public service providers that is essential for meeting a growing number of social challenges since neither the government nor citizens can solve them on their own These challenges include among other things improving the efficiency and effectiveness of public services in times of financial strain increasing the legitimacy of the public sector after decades of questioning its ability with the spread of New Public Management promoting social integration and cultural pluralism in increasingly diverse societies when millions of refugees and immigrants are on the move tackling the threat of burgeoning populism following the rise of anti immigrant and anti global parties in many countries in recent years and finally finding viable solutions for meeting the growing needs of aging populations in many parts of the world This volume addresses issues related to the successful development and implementation of a policy shift toward greater citizen participation in the design and delivery of the services they depend on in their daily lives and greater citizen involvement in resolving these tenacious problems facilitated by the active support of governments across the globe Moreover it explores participatory public service management that empowers the front line staff providing public services Together with users citizens they can insure the democratic governance of public service provision

Assessing Treaty Performance in China Pitman B. Potter, 2014-03-10 This volume outlines a new approach for understanding China s treaty performance around international standards on trade and human rights using the paradigms of selective adaptation and institutional capacity Selective adaptation reveals how local interpretation and implementation of international treaty standards are affected by normative perspectives derived from perception complementarity and legitimacy Institutional capacity explains how operational dimensions of legal performance are affected by structural and relational dynamics of institutional purpose location orientation and cohesion The author also offers policy suggestions for more effective engagement with China on trade and human rights issues

[Encyclopedia of Biodiversity](#), 2013-02-05 The 7 volume Encyclopedia of Biodiversity Second Edition maintains the reputation of the highly regarded original presenting the most current information available in this globally crucial area of research and study It brings together the dimensions of biodiversity and examines both the services it provides and the measures to protect it Major themes of the work include the evolution of biodiversity systems for classifying and defining biodiversity ecological patterns and theories of biodiversity and an assessment of contemporary patterns and trends in biodiversity The science of biodiversity has become the science of our future It is an interdisciplinary field spanning areas of both physical and life

sciences Our awareness of the loss of biodiversity has brought a long overdue appreciation of the magnitude of this loss and a determination to develop the tools to protect our future Second edition includes over 100 new articles and 226 updated articles covering this multidisciplinary field from evolution to habits to economics in 7 volumes The editors of this edition are all well respected instantly recognizable academics operating at the top of their respective fields in biodiversity research readers can be assured that they are reading material that has been meticulously checked and reviewed by experts Approximately 1 800 figures and 350 tables complement the text and more than 3 000 glossary entries explain key terms

Governing the Environment Albert Breton,2009-01-01 This volume the second by this editorial team addresses many of the issues to be resolved if we are to manage environmental public goods efficiently and sustainably What is the right scale of governance What makes for effective public private partnership What makes governance systems effective When do we need supranational governance Given the complex nature of social ecological systems these are hard questions Breton and his collaborators answer them in ways that are both convincing and insightful A very valuable contribution Charles Perrings Arizona State University US Environmental policy focusing on the control of pollution and on over exploitation easily overlooks the extensive range of interconnections between economic activities and natural systems In this timely book a number of specialists examine how crucial aspects of complex environmental problems and policy can be dealt with in decentralized governmental systems Bridging the gap between the conventional environmental federalism literature and advances in environmental and ecological economics that have been made over the last two decades this innovative book explores alternative solutions to the problem of assigning powers over the environment It deals with important issues in environmental governance including interjurisdictional contracting discounting risk management eliciting compliance and environmental accounting in each case concentrating on the comparative advantage of governments at different jurisdictional levels in implementing optimal policies Offering a comprehensive approach to environmental policy this book will be a valuable resource for researchers and students in environmental economics environmental politics governance and decentralization It will also benefit practitioners and policy makers with responsibilities over the environment *Governing*

Complexity Andreas Thiel,Dustin E. Garrick,William A. Blomquist,2019-10-03 This book explains why governance is polycentric and what that means in practice using examples of complex natural resource management Reconsidering REDD+ Julia Dehm,2021-06-03 REDD operates to reorganise social relations and to establish new forms of global authority over forests in the Global South **Institutional Diversity in Self-Governing Societies** Dario Castiglione,Filippo Sabetti,2016-12-27 The work of Elinor and Vincent Ostrom represents a distinctive contribution to the study of political economy public policy and administration collective action and governance theory Efforts to present a comprehensive overview of the Bloomington School that grew around the Workshop in Political Theory and Policy Analysis now renamed the Ostrom Workshop which they founded more than 40 years ago received new impetus with the award of the Nobel Memorial

Prize in Economic Science to Elinor Ostrom in 2009 Since then renewed attempts have been made to map the Ostroms contributions to theories of polycentric governance and collective action and to multi methods and comparative institutional analysis of ways of managing social and ecological systems common pool resources public economies and metropolitan reform The open ended and multiform nature of the Ostroms research program defies a single comprehensive overview yet it is a stimulus towards both creativity and disciplinary cross fertilization in social science research What sets this volume apart is that it brings together theory and practice models and work on the ground design and creativity empirics and norms to outline the significance of the Ostroms research program for the future Each contribution to the volume takes the Ostromian perspective as the point of departure amplifies it and explores the ground for future work by engaging with other approaches and areas of research with which the Bloomington School has some affinities This way of testing and extending the ideas and methods of the Ostroms is particularly appropriate since their research program initiated and nurtured through the Workshop has always been in between different fields and sub fields in the social sciences political science economics public administration law history anthropology cultivating a strong interdisciplinary way of doing research and exploiting the virtuous circle between theory analysis model building and empirical research Engaging in a creative dialogue with ideas and methods of other research programs is a way of sharpening one s analytic tools while renovating one s own vision of social research This volume is a way of thinking through and beyond the Bloomington School

Social Enterprise and the Third Sector Jacques Defourny,Lars Hulgård,Victor Pestoff,2014-06-05 The concepts of social enterprise and social entrepreneurship are rapidly attracting increased attention in academic spheres and from policy makers as well as field workers who are setting up new initiatives or reshaping their organizations These concepts are perceived as defining innovative and dynamic responses to major global challenges in today s societies The debate about social enterprise is now world wide with lively exchanges between American and European scholars However the research and landscapes still differ significantly in different regions and diversity also exists within specific regions such as Europe This book presents the most comprehensive set of contributions reflecting the European wide debate but with frequent connections to developments in other parts of the world This book is a result of work carried out by members of the EMES International Research Network which is a pioneer in this field Social Enterprise and the Third Sector will appeal to all researchers who focus on the third sector social economy and social enterprise to MBA and postgraduate students as well as to intellectual social enterprise leaders and practitioners It will soon become a key reference for all those who want to explore the full richness of these concepts and follow this important academic debate

Beyond Collective Action Problems Atul Pokharel,2024-02-16 Human history is full of examples of continuously maintained shared infrastructure Our ability to survive and prosper depends on cooperation at some level from the irrigation systems that enabled ancient humans to abandon their nomadic lifestyle to the free and open source software that undergirds the internet Thus understanding the conditions under which community

governance can be both equitable and sustainable is of critical importance to scholars and policymakers alike In *Beyond Collective Action Problems* Atul Pokharel argues that sustained cooperation depends on user perceptions that the cooperative arrangement is fair Pokharel elaborates a different way to think about sustained cooperation over decades based on a follow up of 233 long running community managed irrigation systems in Nepal the same cases that were used to understand how groups can overcome collective action problems Covering nearly forty years of history through these cases Pokharel introduces the idea of fairness problems to capture the many forms in which the perceived fairness of a form of governance comes to matter to continued cooperation As he shows the longer individuals cooperate the more they become aware of how far their cooperative arrangement has diverged from the initial promise of fairness This perception of fairness affects their commitment to maintaining the shared resource and participating in the institutions for governing it Highlighting why eventually perceived fairness matters to sustained cooperation this book illustrates how the fairness problem underlies successful cooperation over time making it necessary to look beyond collective action problems

Challenging Malaria Byron B. Carson, III, 2023-09-27 Five years after Ronald Ross discovered the link between malaria and mosquitos American entomologist Leland Howard wrote of the mosquito evil that occurs when everybody s business is nobody s business Howard s insight was largely ignored but it captures what social scientists now refer to as the problem of collective action When this problem persists in the context of malaria individuals under provide prevention and suffer from a higher prevalence of malaria Imagine a group of people trying to drain a pond where mosquitoes breed Everyone in the group faces an incentive to free ride which can hinder their drainage efforts Thus when people fail to resolve issues related to collective action they submit to the mosquito evil and potentially to malaria This book explores Howard s logic the economics of collective action and the history epidemiology and public health of malaria to analyze the conditions under which people privately resolve collective action problems associated with mosquito abatement and malaria prevention Generally people are more likely to resolve these problems when the benefits of abatement and prevention outweigh the costs This logic is developed into a framework and applied to historical and modern day issues related to malaria including the lack or abundance of private prevention in the United States and in developing areas malaria s resurgence in countries like China Venezuela and Bangladesh and the difficulties of large scale insecticide treated bed net campaigns Given this framework we should develop a greater appreciation for entrepreneurial responses civil society market processes and private forms of collective action

Local Public, Fiscal and Financial Governance Brian Dollery, Harry Kitchen, Melville McMillan, Anwar Shah, 2020-06-01 This book provides a comprehensive treatment of traditional as well as newer topics in local public fiscal and financial management principles and practices It covers traditional topics of local public management local revenue administration with special emphasis on property tax administration local budgeting and accounting and methods of capital finance Newer topics covered include political economy of local government fiscal rules for local fiscal

discipline local government integrity and performance accountability and municipal mergers and inter municipal cooperation based upon relative importance and political fiscal and administrative autonomy of local governments The treatment is non technical and suitable for a wide variety of audiences including scholars instructors students policy advisors and practitioners

Elinor Ostrom and the Bloomington School Jayme Lemke,Vlad Tarko,2021-08-04 Elinor Ostrom was the first female winner of the Nobel Prize in economics and her achievement has generated renewed interest in the Bloomington School research program in institutional economics and political economy These essays showcase Ostrom s extensive and lasting influence throughout economics and the wider social sciences Contributors contextualize the Bloomington School within schools of economic thought and show how Ostrom s distinct methodology has been used in policy making and governance Case studies illustrate the value of civic involvement within public policy a method pioneered by Ostrom and the Bloomington School Elinor Ostrom and the Bloomington School provides a valuable resource for those keen to understand Ostrom s approach especially when applied to policy making and wider use in the social sciences Readers new to the Bloomington School will be introduced to its central areas of research while those already familiar with the school will appreciate its subtle connections to other disciplines and research agendas

Handbook on Hybrid Organisations David Billis,Colin Rochester,2020-02-28 Hybrid Organisations that integrate competing organisational principles have become a preferred means of tackling the complexity of today s societal problems One familiar set of examples are organisations that combine significant features from market public and third sector organisations Many different groundbreaking approaches to hybridity are contained in this Handbook which brings together a collection of empirical studies from an international body of scholars The chapters analyse and theorise the position of hybrid organisations and have important implications for theory practice and policy in a context of proliferating hybrid forms of organisation

Imagining Security Jennifer Wood,Clifford Shearing,2013-01-11 This book is concerned with the ways in which the problem of security is thought about and promoted by a range of actors and agencies in the public private and nongovernmental sectors The authors are concerned not simply with the influence of risk based thinking in the area of security but seek rather to map the mentalities and practices of security found in a variety of sectors and to understand the ways in which thinking from these sectors influence one another Their particular concern is to understand the drivers of innovation in the governance of security the conditions that make innovation possible and the ways in which innovation is imagined and realised by actors from a wide range of sectors The book has two key themes first governance is now no longer simply shaped by thinking within the state sphere for thinking originating within the business and community spheres now also shapes governance and influence one another Secondly these developments have implications for the future of democratic values as assumptions about the traditional role of government are increasingly challenged The first five chapters of the book explore what has happened to the governance of security through an analysis of the drivers conditions and processes of innovation in the context of particular empirical

developments Particular reference is made here to waves of change in security within the Ontario Provincial Police in Canada In the final chapter the authors examine the implications of nodal governance for democratic values and then suggest normative directions for deepening democracy in these new circumstances
