consultants to convert and adapt their homes Or course there are also people who intend to manage a project themselves while others may undertake work on a DIY basis and the secret then is getting the right kind of help This book will be invaluable in either situation because it explains how to perform certain functions yourself yet clarifies the roles and responsibilities of the professionals who may be needed to help with the processes of buying altering and selling a house The economic factors in development are not overlooked since for people who wish to develop in order to sell or let property market conditions will be paramount as will the forecasting and control of costs This book provides practical guidance on these matters it avoids theory but does suggest further reading It is also highly illustrated with over 100 illustrations clarifying parts of the text The main theme of this book is altering houses but in practice the differences between some alterations schemes and building a new house can be relatively small As a result much of the material will be useful for those who wish to acquire a plot of land and undertake a modest residential development Altering or building houses and selling them can be a complex business covering a wide range of interrelated factors This book will make these processes easier
