## **Precognition And The Philosophy Of Science:**

*Precognition and the Philosophy of Science* Bob Brier, 1974      **Philosophy of Science and Occult, 1st Ed.** Patrick Grim, 1983-06-30 Philosophy of Science and the Occult has two aims to introduce the philosophy of science through an examination of the occult and to examine the occult rigorously enough to raise central issues in philosophy of science Patrick Grim has compiled selections by authors with divergent views on astrology parapsychology and UFO s to emphasize topics standard to the philosophy of science He discusses issues such as confirmation and selection for testing possibility and a priori probabilities causality and time explanation and the nature of scientific laws the status of theoretical entities the problem of demarcation theory and observation and science and values A sketch of where these arise in the collection accompanies the table of contents The context of the occult serves to make the initial introduction of these issues immediately understandable and forcefully compelling      Philosophy of Science and the Occult Patrick Grim, 1990-07-17 This book both introduces the philosophy of science through examination of the occult and examines the occult rigorously enough to raise central issues in the philosophy of science Placed in the context of the occult philosophy of science issues become immediately understandable and forcefully compelling Divergent views on astrology parapsychology and quantum mechanics mysticism emphasize topics standard to the philosophy of science Such issues as confirmation and selection for testing causality and time explanation and the nature of scientific laws the status of theoretical entities the problem of demarcation theory and observation and science and values are discussed Significantly revised this second edition presents an entirely new section of quantum mechanics and mysticism including instructions from N David Mermin for constructing a device which dramatically illustrates the genuinely puzzling phenomena of quantum mechanics A more complete and current review of research on astrology has been included in this new edition and the section on the problem of demarcation has been broadened      **Parapsychology, Philosophy, and Spirituality** David Ray Griffin, 1997-01-09 In this book David Ray Griffin best known for his work on the problem of evil turns his attention to the even more controversial topic of parapsychology Griffin examines why scientists philosophers and theologians have held parapsychology in disdain and argues that neither a priori philosophical attacks nor wholesale rejection of the evidence can withstand scrutiny After articulating a constructive postmodern philosophy that allows the parapsychological evidence to be taken seriously Griffin examines this evidence extensively He identifies four types of repeatable phenomena that suggest the reality of extrasensory perception and psychokinesis Then on the basis of a nondualistic distinction between mind and brain which makes the idea of life after death conceivable he examines five types of evidence for the reality of life after death messages from mediums apparitions cases of the possession type cases of the reincarnation type and out of body experiences His philosophical and empirical examinations of these phenomena suggest that they provide support for a postmodern spirituality that overcomes the thinness of modern religion without returning to supernaturalism      **Divine Foreknowledge and Human Freedom**

William Lane Craig,1991 The ancient problem of fatalism more particularly theological fatalism has resurfaced with surprising vigour in the second half of the twentieth century Two questions predominate in the debate 1 Is divine foreknowledge compatible with human freedom and 2 How can God foreknow future free acts Having surveyed the historical background of this debate in The Problem of Divine Foreknowledge and Future Contingents from Aristotle to Suarez Brill 1988 William Lane Craig now attempts to address these issues critically His wide ranging discussion brings together a thought provoking array of related topics such as logical fatalism multivalent logic backward causation precognition time travel counterfactual logic temporal necessity Newcomb s Problem middle knowledge and relativity theory The present work serves both as a useful survey of the extensive literature on theological fatalism and related fields and as a stimulating assessment of the possibility of divine foreknowledge of future free acts

implications for the philosophy of science and the philosophy of mind He considers carefully the abstract presuppositions underlying leading theories of psychic phenomena and he offers bold criticisms of both mechanistic analyses of communication and psychophysical identity theories In addition he challenges the received view that experimental repeatability is the paramount criterion for evaluating parapsychological research and he exposes the deep confusions underlying Jung's concept of synchronicity

**Counter-Movements in the Sciences** H. Nowotny, H. Rose, 2012-12-06 Heretical thoughts in an orthodox series on sociology of the sciences Devils and science between the covers of one book Games with ambivalence to mask collective uncertainty We anticipate similar future reactions from readers or reviewers when assessing the way in which this volume has been assembled But writings on counter science like the history of colonialism are usually written by the winners therefore unequivocally partial and only too often lacking in social imagination In seeking to redress the balance we admit to having been fully receptive to the latter of having displayed an unmeasured degree of sympathy with heretics and outsiders including practising scientists and to letting science defend itself The antithetical relationship implied in the volume's title Counter movements in the Sciences stands for what we regard as an ongoing open ended process In collecting material for this volume we have brought together voices speaking from different quarters there are those who although modestly claiming to speak only for themselves have set out to question sacred assumptions of scientific faith or to cast doubt on well known claims scientific knowledge holds over other forms of knowledge others have undertaken to demonstrate the fragility if not untenability of attempts at demarcation between science and other systems of belief or practice or shown that demarcations between different forms of rationality rest on other than methodological grounds finally those who wish to rearrange by mapping out some meta point of surveillance familiar territory showing the need for rearrangement and

*The Only Wise God* William L. Craig, 2000-01-13 Does God know our actions before we do them And if so do human beings truly have free will Dr Craig contends that both of these notions are compatible showing how the Bible teaches divine foreknowledge of human free acts

and reveals two ways of reconciling divine omniscience with human freedom      **The Journal of Parapsychology** Joseph Banks Rhine, Charles Edward Stuart, William McDougall, 1980      Journal of the Society for Psychical Research Society for Psychical Research (Great Britain), 1998      Consciousness Unbound Edward F. Kelly, Paul Marshall, 2021-03-16 Building on the groundbreaking research of Irreducible Mind and Beyond Physicalism Edward Kelly and Paul Marshall gather a cohort of leading scholars to consider the significance of extraordinary experiences for our understanding of reality Currently emerging as a middle ground between warring fundamentalisms of religion and science an expanded science based understanding of nature finally accommodates empirical realities of spiritual sorts while also rejecting rationally untenable overbeliefs The vision sketched here provides an antidote to the prevailing postmodern disenchantment of the world and demeaning of human possibilities It not only more accurately and fully reflects our human condition but engenders hope and encourages ego surpassing forms of human flourishing It offers reasons for us to believe that freedom is real that our human choices matter and that we have barely scratched the surface of our human potentials It also addresses the urgent need for a greater sense of worldwide community and interdependence a sustainable ethos by demonstrating that under the surface we and the world are much more extensively interconnected than previously recognized      *Encyclopedia of Philosophy* Donald M.
