disciplinary perspectives from the social and biological sciences to art history and epigraphy creating a work comprehensive in scope which reveals our increasing understanding of the various roles of foods and cuisines in Mesoamerican cultures The volume is organized thematically into three sections Part 1 gives an overview of food and feasting practices as well as ancient economies in Mesoamerica Part 2 details ethnographic epigraphic and isotopic evidence of these practices Finally Part 3 presents the metaphoric value of food in Mesoamerican symbolism ritual and mythology The resulting volume provides a thorough interdisciplinary resource for understanding food feasting and cultural practices in Mesoamerica

Maya Christian Murals of Early Modern Yucatán Amara Solari, Linda K. Williams, 2024-11-12 The first study of Christian murals created by indigenous artists in sixteenth and seventeenth century Yucatán In the sixteenth and seventeenth centuries Maya artists painted murals in churches and conventos of Yucatán using traditional techniques to depict iconography brought from Europe by Franciscan friars The fragmentary visual remains and their placement within religious structures embed Maya conceptions of sacredness beyond the didactic imagery Mobilizing both cutting edge technology and tried and true analytical methods art historians Amara Solari and Linda K Williams reexamine the Maya Christian murals centering the agency of the people who created them The first volume to comprehensively document the paintings *Maya Christian Murals of Early Modern Yucatán* collects new research on the material composition of the works made possible by cutting edge imaging methods Solari and Williams investigate pigments and other material resources as well as the artists and historical contexts of the murals The authors uncover numerous local innovations in form and content including images celebrating New World saints celestial timekeeping and ritual processions Solari and Williams argue that these murals were not simply vehicles of coercion but of cultural grafting that allowed Maya artists to shape a distinctive and polyvocal legacy in their communities

Reconsidering Olmec Visual Culture Carolyn E. Tate, 2012-01-18 Recently scholars of Olmec visual culture have identified symbols for umbilical cords bundles and cave wombs as well as a significant number of women portrayed on monuments and as figurines In this groundbreaking study Carolyn Tate demonstrates that these subjects were part of a major emphasis on gestational imagery in Formative Period Mesoamerica In *Reconsidering Olmec Visual Culture* she identifies the presence of women human embryos and fetuses in monuments and portable objects dating from 1400 to 400 BC and originating throughout much of Mesoamerica This highly original study sheds new light on the prominent roles that women and gestational beings played in Early Formative societies revealing female shamanic practices the generative concepts that motivated caching and bundling and the expression of feminine knowledge in the 260 day cycle and related divinatory and ritual activities *Reconsidering Olmec Visual Culture* is the first study that situates the unique hollow babies of Formative Mesoamerica within the context of prominent females and the prevalent imagery of gestation and birth It is also

the first major art historical study of La Venta and the first to identify Mesoamerica's earliest creation narrative. It provides a more nuanced understanding of how later societies including Teotihuacan and West Mexico as well as the Maya either rejected certain Formative Period visual forms, rituals, social roles, and concepts or adopted and transformed them into the enduring themes of Mesoamerican symbol systems.

Made to Order Cynthia Conides, 2018-10-18 The ancient city of Teotihuacan, North America's first metropolis, flourished for nearly eight centuries in central Mexico until its demise in 650 C.E. Known primarily for its massive architecture and monumental wall paintings, the city and its dazzling artwork inspired awe in its time and continues to do so today. *Made to Order*, the first systematic study of more than 150 painted portable artworks produced in Teotihuacan, offers a unique, deeply informed perspective on the cultural practices and artistic techniques of the largest urban community in pre-Hispanic Mesoamerica. The painted vessels Cynthia Conides considers, featured here in finely reproduced full-color photographs, constitute nearly the entire body of material now available for analysis. With attention to their origins and provenance wherever possible, the author views these objects from a range of vantage points, using ceramic chronologies to measure the changing characteristics and cultural significance of pictorial paintings on portable media. Her approach, ranging from stylistic analysis and narrative theory to theoretical perspectives on artistic exchange among artisans living and working in a thriving urban setting, reveals the importance of such objects to a city where social status and the acquisition and display of its symbols were paramount. This perspective is in turn grounded in new interpretations of the religious, social, and ritual contexts in which the objects functioned. The most complete analysis of both ceramics from excavations at Teotihuacan and those held in museum collections worldwide, *Made to Order* will become a standard source for specialists and students of pre-Columbian visual culture and archaeology and a vital resource for those interested in cross-cultural ceramic studies.

The Life Within Stephen Houston, 2014-03-25 Beautifully written and illustrated, *The Life Within* is the first full study of the vitality and materiality of Classic Maya art and writing and the quest for transcendence and immortality.

In Search of Ancient North America Heather Pringle, 1996-04-20 Almost unimaginably immense, North America stretches from a few degrees short of the North Pole to a few degrees shy of the equator. Archaeologists are now racing to unravel the mysterious past of the forgotten peoples who once inhabited this sprawling land. *In Search of Ancient North America* explores many of these scientists' most fascinating findings as Heather Pringle chronicles her journeys among the ancient sites of Canada and the United States. Her enthralling voyage of discovery uncovers the richness of now vanished cultures and illuminates the intriguing world of archaeology itself. Journeying from the mosquito-infested forests of the far north to the bleak deserts of the American Southwest, Pringle accompanies leading archaeologists and their crews into the field. At the Bluefish Caves in the northern Yukon, Jacques Cinq Mars chases down clues to an Ice Age mystery at the immense geometric riddle that is Hopewell Earthworks. Mark Lynott scours the countryside for vestiges of ancient village life in the thorny wilderness of the Lower Pecos. Solveig Turpin deciphers the enigmatic rock art painted more than 3,000 years ago.

What emerges from Pringle's accounts are surprising portraits of long lost cultures: the rapacious mariners of southern California who nearly wiped out one of the world's most productive ecosystems; the wealthy nobles of British Columbia who wore salmon skin shoes and counted their wealth in bottles of salmon oil; the powerful lords of the Mississippi River who won the adoration of their followers with a mysterious medicinal tonic. Equally intriguing are the controversial new theories that the author presents on a host of subjects from the origins of art and hallucinogenic drugs to the rise of private property, the identities of the earliest New World migrants and the astonishing extent of trade in prehistoric North America. Complemented by superb color and black and white photographs, *In Search of Ancient North America* blends incisive science journalism with evocative travel writing to bring the latest archaeological findings and interpretations to light. Delving into the previously unmined saga of this vast continent's lost and extinct cultures, this captivating book is a thrilling invitation to endless discovery. Drawing on some of the latest archaeological research, Pringle's book is vivid, witty, and responsible in a field too often filled by cranks and bores. All who are curious about life in North America before the European invasion will find the book a stimulating introduction. Ronald Wright, author of *Stolen Continents*. *In Search of Ancient North America* brings the distant past much closer and its inhabitants almost become neighbors to us once again. A first rate examination of the mystery and fascination of modern archaeological research in North America. Farley Mowata, author of *The People of the Deer*. *Captures* the essence of what archaeologists are learning about North American prehistory. The book is a pleasure to read and will inspire a new awareness of the importance of the history of North America prior to European contact. Bruce Trigger, author of *The Children of Aataentsic*.

Archaeologies of Cosmoscapes in the Americas J. Grant Stauffer, Bretton T. Giles, Shawn P. Lambert, 2022-09-08 This volume examines how pre-Columbian societies in the Americas envisioned their cosmos and iteratively modeled it through the creation of particular objects and places. It emphasizes that American societies did this to materialize overarching models and templates for the shape and scope of the cosmos, the working definition of cosmospace. Noting a tendency to gloss over the ways in which ancestral Americans envisioned the cosmos as intertwined and animated, the authors examine how cosmoscapes are manifested archaeologically in the forms of objects and physically altered landscapes. This book's chapters therefore offer case studies of cosmoscapes that present themselves as forms of architecture, portable artifacts, and transformed aspects of the natural world. In doing so, it emphasizes that the creation of cosmoscapes offered a means of reconciling people's experiences of the world with their understandings of them.

Ancient Origins of the Mexican Plaza Logan Wagner, Hal Box, Susan Kline Morehead, 2013-04-04 The plaza has been a defining feature of Mexican urban architecture and culture for at least 4,000 years. Ancient Mesoamericans conducted most of their communal life in outdoor public spaces, and today the plaza is still the public living room in every Mexican neighborhood. Town and city: the place where friends meet, news is shared, and personal and communal rituals and celebrations happen. The site of a community's most important architecture: church, government buildings, and marketplace. The plaza is both sacred

and secular space and thus the very heart of the community This extensively illustrated book traces the evolution of the Mexican plaza from Mesoamerican sacred space to modern public gathering place The authors led teams of volunteers who measured and documented nearly one hundred traditional Mexican town centers The resulting plans reveal the layers of Mesoamerican and European history that underlie the contemporary plaza The authors describe how Mesoamericans designed their ceremonial centers as embodiments of creation myths the plaza as the primordial sea from which the earth emerged They discuss how Europeans even though they sought to eradicate native culture actually preserved it as they overlaid the Mesoamerican sacred plaza with the Renaissance urban concept of an orthogonal grid with a central open space The authors also show how the plaza s historic architectural social and economic qualities can contribute to mainstream urban design and architecture today
