

The Predator ACTD

A black silhouette of a Predator unmanned aircraft is shown in flight, angled downwards and to the right. It is positioned over a map of the Balkan region, specifically near the border of North Macedonia and Albania. The map shows various geographical features, including rivers, roads, and city names like Skopje and Thessaloniki. A warning box is visible on the map, stating: "WARNING Aircraft intruding upon Non-Free Flying Territory may be fired on without warning. Consult NOTAMS and Flight Information Publications for the latest air information." The title "The Predator ACTD" is written in large, bold, blue letters at the top of the slide.

Predator Actd A Case Study For Transition Planning To The Formal Acquisition Process:

The Predator ACTD Michael R. Thirtle, Robert V. Johnson, J. L. Birkler, United States. Department of Defense. Office of the Secretary of Defense, 1997 In this analysis we closely detail the Predator Advanced Concept Technology Demonstration ACTD and also document the important demonstration and transition issues from the project that can be applied to other ACTDs

The Predator ACTD; A Case Study for Transition Planning to the Formal Acquisition Process, 1997 In July 1995 a new endurance unmanned aerial vehicle UAV flew over Bosnia to surveil and provide all weather reconnaissance and image gathering in an operational i e conflict environment Representing a new capability for the Department of Defense DoD this UAV represented above all a departure from DoD s usual way of doing acquisition business The study documented in this report was completed in support of RAND research on Advanced Concept Technology Demonstration ACTD programs for the Office of the Secretary of Defense The effort was conducted from July until December 1996 and documents research on the Medium Altitude Endurance MAE Unmanned Aerial Vehicle ACTD program also known as the Predator UAV Specifically RAND was tasked to examine two questions 1 what were the overarching lessons learned from the Predator ACTD and 2 Which lessons can be generalized and applied to other ACTD programs In this analysis we closely detail the Predator ACTD and also document the important demonstration and transition issues from the project that can be applied to other ACTDs The intent of this work is to improve the ACTD process and the transition of ACTDs to formal acquisition programs This report should be of interest to those involved in acquisition program offices and ACTD programs

Unmanned William M. Arkin, 2015-07-28 Unmanned is an in depth examination of why seemingly successful wars never seem to end The problem centers on drones now accumulated in the thousands the front end of a spying and killing machine that is disconnected from either security or safety Drones however are only part of the problem William Arkin shows that security is actually undermined by an impulse to gather as much data as possible the appetite and the theory both skewed towards the notion that no amount is too much And yet the very endeavor of putting fewer human in potential danger places everyone in greater danger Wars officially end but the Data Machine lives on forever Throughout his career Arkin has exposed powerful secrets of so called national security and intelligence Now he continues that tradition The most alarming book about warfare in years Unmanned is essential reading for anyone who cares about the future of mankind

Predator Richard Whittle, 2014-09-16 The untold story of the birth of the Predator drone a wonder weapon that transformed the American military reshaped modern warfare and sparked a revolution in aviation The creation of the first weapon in history whose operators can stalk and kill an enemy on the other side of the globe was far more than clever engineering As Richard Whittle shows in Predator it was one of the most profound developments in the history of military and aerospace technology Once considered fragile toys drones were long thought to be of limited utility The Predator itself was resisted at nearly every turn by the military establishment but a few iconoclasts refused to see this new technology smothered at birth The

remarkable cast of characters responsible for developing the Predator includes a former Israeli inventor who turned his Los Angeles garage into a drone laboratory two billionaire brothers marketing a futuristic weapon to help combat Communism a pair of fighter pilots willing to buck their white scarf fraternity a cunning Pentagon operator nicknamed Snake and a secretive Air Force organization known as Big Safari When an Air Force team unleashed the first lethal drone strikes in 2001 for the CIA the military's view of drones changed nearly overnight Based on five years of research and hundreds of interviews Predator reveals the dramatic inside story of the creation of a revolutionary weapon that forever changed the way we wage war and opened the door to a new age in aviation

The Process and Politics of Defense Acquisition David S. Sorenson, 2008-12-30 The United States government invests billions each year on equipping armed forces with the most advanced military equipment The root of the American defense acquisition system is driven by a combination of national interests and domestic political requirements While fundamentally the defense acquisition system has produced results for the United States military improvements are needed in order to continue to move forward in advancing military tactics and technology Exploring both the systemic and political levels of the system Sorenson argues that the United States will fall behind if the current defense acquisition system is not reformed This book brings together elements of this complicated system such as national security requirements and the changes that are needed in both the structural and political pillars A combination of political interests and the needs of the military serviced by an ever shrinking defense industry make a genuine acquisition reform even more difficult resulting in reform that is more symbolic than genuine

Predators Brian Glyn Williams, 2013 Predators is a riveting introduction to the murky world of Predator and Reaper drones the CIA's and U S military's most effective and controversial killing tools Brian Glyn Williams combines policy analysis with the human drama of the spies terrorists insurgents and innocent tribal peoples who have been killed in the covert operation the CIA's largest assassination campaign since the Vietnam War era being waged in Pakistan's tribal regions via remote control aircraft known as drones or unmanned aerial vehicles Having traveled extensively in the Pashtun tribal areas while working for the U S military and the CIA Williams explores in detail of the new technology of airborne assassinations From miniature Scorpion missiles designed to kill terrorists while avoiding civilian collateral damage to prairie's cigarette lightersize homing beacons spies plant on their unsuspecting targets to direct drone missiles to them the author describes the drone arsenal in full Evaluating the ethics of targeted killings and drone technology Williams covers more than a hundred drone strikes analyzing the number of slain civilians versus the number of terrorists killed to address the claims of anti-drone activists In examining the future of drone warfare he reveals that the U S military is already building more unmanned than manned aerial vehicles Predators helps us weigh the pros and cons of the drone program so that we can decide whether it is a vital strategic asset a frenemy or a little of both

Graser, 2009 The Air Force has several options for sustaining weapon systems and components but has in recent years increasingly chosen contractor logistics support CLS over organic support Still questions remain about costs and efficiency even about whether CLS is the best option The authors explored these by reviewing the relevant government and DoD documents and data and by speaking with various knowledgeable individuals The authors noted that CLS contracts have often gone to original equipment manufacturers because lacking the technical data the Air Force could not choose a third party They also noted that contracts that guarantee large annual sums limit the Air Force s ability to adjust when its own funding changes and that the reasons underpinning these decisions are not always complete or consistent across the service Centralizing and standardizing data and the related management skills would help make them available across the Air Force More important to retain all its choices for logistics services throughout a system s life cycle the Air Force should acquire the technical data or data rights near the start of the acquisition process

Innovative Development ,2002 Arms and Innovation James Hasik, 2008-09-15 With many of the most important new military systems of the past decade produced by small firms that won competitive government contracts defense industry consultant James Hasik argues in Arms and Innovation that small firms have a number of advantages relative to their bigger competitors Such firms are marked by an entrepreneurial spirit and fewer bureaucratic obstacles and thus can both be more responsive to changes in the environment and more strategic in their planning This is demonstrated Hasik shows by such innovation in military technologies as those that protect troops from roadside bombs in Iraq and the Predator drones that fly over active war zones and that are crucial to our new war on terror For all their advantages small firms also face significant challenges in access to capital and customers To overcome such problems they can form alliances either with each other or with larger companies Hasik traces the trade offs of such alliances and provides crucial insight into their promises and pitfalls This ground breaking study is a significant contribution to understanding both entrepreneurship and alliances two crucial factors in business generally It will be of interest to readers in the defense sector as well as the wider business

These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
