The Juvenile Sex Offender Assessment Protocol II J SOAP II is a checklist whose purpose is to aid in the systematic review of risk factors that have been identified in the professional literature as being associated with sexual and criminal offending It is designed to be used with boys in the age range of 12 to 18 who have been adjudicated for sexual offenses as well as nonadjudicated youths with a history of sexually coercive behavior Decisions about reoffense risk should not be based exclusively on the results from J SOAP II J SOAP II should always be used as part of a comprehensive risk assessment Like any scale that is intended to assess risk J SOAP II requires ongoing validation and possible revision as we learn more about how J SOAP II works and about how best to assess the risk of youths who have sexually offended Because the revised J SOAP is a new scale and we are just beginning to collect predictive validity data on it *Using Logistic Regression Modeling to Predict Sexual Recidivism* Grant Duwe, Pamela J.
