Prediction Of Adjustment Outcomes Of Rural Migrants To The City:

Prediction of Adjustment Outcomes of Rural Migrants to the City Gabino Rendon,1976 **Prediction of Adjustment Outcomes of Rural Migrants to the City** Gabino Rendon,1968 *Prediction of Adjustment Outcomes of Rural Migrants to the City, By Gabino Rendon, Jr* Gabino Rendon,1968 **The Devil in Silicon Valley** Stephen J. Pitti,2018-06-05

This sweeping history explores the growing Latino presence in the United States over the past two hundred years. It also debunks common myths about Silicon Valley, one of the world's most influential but least understood places. Far more than any label of the moment, the devil of racism has long been Silicon Valley's defining force, and Stephen Pitti argues that ethnic Mexicans rather than computer programmers should take center stage in any contemporary discussion of the new West. Pitti weaves together the experiences of disparate residents: early Spanish Mexican settlers, Gold Rush miners, farmworkers transplanted from Texas, Chicano movement activists, and late twentieth-century musicians to offer a broad reevaluation of the American West. Based on dozens of oral histories as well as unprecedented archival research, *The Devil in Silicon Valley* shows how San Jose, Santa Clara, and other northern California locales played a critical role in the ongoing development of Latino politics. This is a transnational history. In addition to considering the past efforts of immigrant and U.S.-born miners, fruit cannery workers, and janitors at high-tech firms, many of whom retained strong ties to Mexico, Pitti describes the work of such well-known Valley residents as Cesar Chavez. He also chronicles the violent opposition ethnic Mexicans have faced in Santa Clara Valley. In the process, he reinterprets not only California history but the Latino political tradition and the story of American labor. This book follows California race relations from the Franciscan missions to the Gold Rush, from the New Almaden mine standoff to the Apple janitorial strike. As the first sustained account of Northern California's Mexican American history, it challenges conventional thinking and tells a fascinating story. Bringing the past to bear on the present, *The Devil in Silicon Valley* is counter history at its best.

Studies in Behavioral Anthropology Theodore D. Graves,2004. *Studies in Behavioral Anthropology* is a unique collection of essays illustrating the author's distinctive approach to cross-cultural research. It is a valuable companion volume to Graves's *Behavioral Anthropology*, elaborating on the methodological principles outlined in that book. Graves and his co-authors offer fifteen research essays as supplemental readings in research methodology to convey the challenge and excitement of conducting systematic behavioral science research cross-culturally. For those concerned with a behavioral and scientific approach to anthropology, this book will be a valuable reference and teaching tool. *The Making of Psychological Anthropology* George Dearborn Spindler,1980-01-01

Work in Non-Market and Transitional Societies Herbert A. Applebaum,1984-01-01. In industrialized cultures, what we do to earn a living is usually divorced from what we do the rest of the time. This contrasts with non-market cultures where work is an intimate part of life. People of such cultures perceive a unity between hunting and raising a family, between making pots and training children, between the building of houses and the practice of religion. Often there is no separate word for

work because work is such an all encompassing activity Work in Non Market and Transitional Societies is an overview of the organization of work in diverse societies the division of labor the notions of time that affect work and working and the kinds of adaptations people make when transplanted from one society to another The groundbreaking study encompasses pre industrial and non market societies as well as cultures in the process of change and modernization This double focus provides an unusual and stimulating perspective for both anthropology and the social sciences This book features a broad theoretical introduction delineating the major issues and aspects of investigation in this field It then presents twenty essays that show how work is carried on by women and men in varied societies and cultures The authors provide guidelines for understanding the different value systems and discuss why each approach to work is appropriate in its specific societal structure
