The Archaeology of Iberia Margarita Díaz-Andreu, Simon Keay, 2013-12-02 For many archaeologists Iberia is the last great unknown region in Europe. Although it occupies a crucial position between South Western Europe and North Africa, academic attention has traditionally been focused on areas like Greece or Italy. However, Iberia has an equally rich cultural heritage and archaeological tradition. This ground-breaking volume presents a sample of the ways in which archaeologists have applied theoretical frameworks to the interpretation of archaeological evidence, offering new insights into the archaeology of both Iberia and Europe from prehistoric time through to the tenth century. The contributors to this book are leading archaeologists drawn from both countries. They offer innovative and challenging models for the Paleolithic, Neolithic, Copper Age, Bronze Age, Iron Age, Roman, Early Medieval and Islamic periods. A diverse range of subjects are covered, including urban transformation, the Iron Age peoples of Spain, observations on historiography and the origins of the Arab domains of Al Andalus. It is essential reading for advanced undergraduates and those researching the archaeology of the Iberian Peninsula.
