Prehistoric Avebury:

Prehistoric Avebury Aubrey Burl, 2002-01-01 This magnificent book is a fascinating account of the prehistoric stone circles at Avebury which not only II date from an earlier era but are also larger than the more famous sarsen stone circle of Stonehenge Written by a leading archaeologist the book considers every aspect of Avebury s history and construction and discusses the probable purpose of these massive structures in the process creating a vivid and moving picture of their creators a primitive people whose lives were brief savage and fearful *Prehistoric Monuments of Avebury* Caroline Malone, 1994 Avebury stone circle is over 4000 years old It is one of the largest prehistoric henges in Britain and has been designated as a World Heritage Site This is an account of Avebury s ceremonial sites ancient avenues and barrows

Prehistoric Britain from the Air Timothy Darvill, 1996-07-04 This book provides a bird s eye look at the monumental achievements of Britain s earliest inhabitants Arranged thematically it illustrates and describes a wide selection of archaeological sites and landscapes dating from between 500 000 years ago and the Roman conquest Timothy Darvill brings to life many of the familiar sites and monuments that prehistoric communities built and exposes to view many thousands of sites that simply cannot be seen at ground level Throughout the book he makes a unique application of social archaeology to the field of aerial photography *Prehistoric London* Elizabeth Oke Gordon, 1914 *Ancient Astronomy* Clive L.N. Ruggles, 2005-10-21 An authoritative introduction to the fascinating topic of archaeoastronomy ancient peoples understanding and use of the skies *Ancient Astronomy An Encyclopedia of Cosmologies and Myth* draws on archaeological evidence and oral traditions to reveal how prehistoric humans perceived the skies and celestial phenomena With over 200 entries it offers a number of ways to approach ancient astronomy from key examples and case studies worldwide Stonehenge Mexican and Egyptian pyramids Chaco Canyon New Mexico the Nazca lines in Peru to general themes cosmologies calendars ancient ideas of space and time origin myths to fundamental concepts and methods how the sky has changed over the centuries how to survey a site and to the field s most frequently asked questions How did ancient peoples navigate the ocean using the stars How does astrology relate to ancient astronomy Can ancient sites be dated astronomically By revealing the astronomical significance of some of the world s most famous ancient landmarks and enduring myths and by showing how different themes and concepts are connected *Ancient Astronomy An Encyclopedia of Cosmologies and Myth* brings a unique authoritative perspective to an area too often left to speculation and sensationalism **Haunted Spaces, Sacred Places** Brian Haughton, 2008-06-17 The author of *Hidden History* explores the archaeology legends and strange sightings at 32 ancient sites around the world from Stonehenge to Angkor Wat In *Haunted Spaces Sacred Places* historian Brian Haughton takes readers on a revealing tour of ancient landmarks that are rich in mystery and unexplained phenomena Organized by region this book takes readers from the mysterious megaliths of Britain and Ireland to the haunted tombs of the Etruscans the Pagan origins of Germany s Aachen Cathedral the ancient Native American city of Cahokia the enigmatic Cambodian

Temple of Angkor Wat and the sacred Aboriginal rock formation of Uluru In Haunted Spaces Sacred Places you will discover The history of ancient sites such as Stonehenge Chartres Cathedral Delphi Cuzco and the Ohio Serpent Mound The relationship between ancient Native American sites and unexpected phenomena in Colorado s San Luis Valley The truth behind the legends of the mausoleum of the First Qin Emperor in China home of the Terracotta Warriors The prevalence of modern encounters with ghosts UFOs spook lights Bigfoot and phantom dogs at ancient sacred places With more than 25 photographs and illustrations this is the ideal reference work for those interested in the connections between ancient places folklore and unexplained phenomena **The Book of Unconformities** Hugh Raffles,2022-04-18 From the author of Insectopedia a powerful exploration of loss grief endurance and the absences that permeate the present Unconformities are gaps in the geological record physical evidence of breaks in time For Hugh Raffles these holes in history are also fissures in feeling knowledge memory and understanding In this endlessly inventive riveting book Raffles enters these gaps drawing together threads of geology history literature philosophy and ethnography to trace the intimate connections between personal loss and world historical events and to reveal the force of absence at the core of contemporary life Through deeply researched explorations of Neolithic stone circles Icelandic lava mica from a Nazi concentration camp petrified whale blubber in Svalbard the marble prized by Manhattan s Lenape and a huge Greenlandic meteorite that arrived in New York City along with six Inuit adventurers in 1897 Raffles shows how unconformities unceasingly incite human imagination and investigation yet refuse to conform heal or disappear A journey across eons and continents The Book of Unconformities is also a journey through stone this most solid ancient and enigmatic of materials it turns out is as lively capricious willful and indifferent as time itself **Exploring Megalithic Europe** Julian Heath,2019-11-07 Abundant prehistoric remains survive in the wide landscapes of Europe but none are arguably as fascinating or awe inspiring as the megalithic after the Greek megas great and lithos stone monuments built by the people who lived here during the three hugely important periods of European prehistory known respectively as the Neolithic the Copper Age and the Bronze Age These huge prehistoric stone structures can still be found scattered in their thousands across Europe and provide a tentative but evocative link to their builders and to Europe s distant past From the Mediterranean islands to the colder climes of Scandinavia Exploring Megalithic Europe takes readers to many European countries examining both famous and lesser known megalithic monuments and looking at what insights these remarkable reminders of prehistoric life may provide into the ancient communities responsible for their construction **Ancient Britain** Mr James Dyer,James Dyer,2002-11-01 This book is for anyone starting out to understand the prehistoric life of Britain from the first human occupation 450 000 years ago until the Roman conquest in AD 43 James Dyer here succeeds in bringing to life a thriving picture of the people and customs of the Stone Bronze and Iron Ages based on the sometimes sparse clues presented by prehistoric archaeological sites across Britain For many readers Ancient Britain will provide the first chance to get to grips with the present state of our knowledge of

prehistoric agriculture settlement trade and ritual The rise of power with the development of a class system at the hands of the first metal users is charted through to the growth of wealth and the emergence of a warlike and advanced Iron Age society a society that was nonetheless unable to withstand the might of Rome With over 130 illustrations and photographs including a number of specially drawn reconstructions this highly visual book is an ideal primer for all students of prehistory and all those who are simply interested in the subject

The Presented Past B. L. Molyneux, P. G. Stone, 2003-09-02 The Presented Past is concerned with the differences between the comparatively static well understood way in which the past is presented in schools museums and at historic sites compared to the approaches currently being explored in contemporary archaeology It challenges the all too frequent representation of the past as something finished understood and objective rather than something that is constructed and therefore open to co existing interpretations and constant re interpretation Central to the book is the belief that the presentation of the past in school curricula and in museum and site interpretations will benefit from a greater use of non documentary sources derived from archaeological study and oral histories The book suggests that a view of the past incorporating a larger body of evidence and a wider variety of understanding will help to invigorate the way history is taught The Presented Past will be of interest to teachers archaeologists cultural resource managers in fact anyone who is concerned with how the past is presented

Neolithic Britain Rodney Castleden, 2014-10-24 The climax of the Stone Age in Britain the Neolithic period 4700 2000BC was a period of startling achievement The British Isles are rich in Neolithic sites which give us evidence of a complex and surprisingly developed archaic society The author surveys 1100 secular and ceremonial sites in Britain selecting some for detailed explanation from these a sense of the diversity and dynamism of the living Neolithic communities emerges He presents a comprehensive profusely illustrated and up to date view of the Neolithic organised by county Archaeologists and prehistorians will find this book of interest and it should prove indispensable to students of archaeology as a source of information about the British Neolithic

Ancient Stone Circles Kaia Stonebrook, 2025-03-29 Ancient Stone Circles explores the purpose and significance of these ancient monuments in societies worldwide It argues that stone circles were not merely primitive relics but sophisticated centers for astronomical observation social gatherings and ceremonial practices Intriguingly archaeological findings suggest deliberate designs incorporating celestial alignments reflecting advanced knowledge of astronomy and social organization The book delves into the cultural context of stone circles examining the belief systems social structures and technological capabilities of the indigenous societies that built them It challenges previous interpretations by integrating quantitative astronomical data with qualitative cultural interpretations offering a nuanced understanding of these enigmatic structures Case studies from the British Isles Africa and the Americas showcase the astronomical alignments architectural features and associated artifacts revealing potential uses in maintaining social cohesion and transmitting knowledge Structured methodically Ancient Stone Circles introduces archaeoastronomy and social archaeology before exploring specific

examples and their social contexts The book uses historical records archaeological findings and astronomical research to build its argument providing a comprehensive overview of major sites and theoretical frameworks ultimately revealing the ingenuity and cultural complexity encoded within these ancient monuments *Talk of Many Things* Margaret

Wharton,2005-09 In her fourth book of memoirs Margaret Wharton continues her G I bride reminiscences as she paints a picture of life in England before during and after World War II Emphasizing the years from her arrival in the United States until her retirement in Chapel Hill North Carolina she tells of her initial homesickness as she is assimilated into a new way of life and describes her years as a housewife in a small suburban town as she raises two sons and resumes her teaching career She relates the many travels that she and her husband made together the accounts taken from the detailed journals she assiduously kept of the trips She also tells something of the Southern family she married into and goes on to talk of the retirement life she and her husband lead in Chapel Hill Her book is a highly polished piece of work comprising an ingenious blend of people places history geography and literature Mrs Wharton has a vast knowledge of history and excellent control of language along with a vivid descriptive flair She reproduces her experiences with clarity and conviction *Talk of Many Things* offers a colorful informative and individual account of a unique experience shared by a number of young women not only from England but from many other countries in the immediate post war years *The Stonehenge People* Rodney

Castleden,2002-01-31 First published in 1990 Of all the monuments left by the past Stonehenge is the most evocative the most memorable and the most mysterious Whilst the monuments of other cultures have gradually surrendered their mysteries Stonehenge alone seems to stimulate endless conjecture Rodney Castleden s vivid presentation of the world of the megaliths answers many of the most baffling questions about Stonehenge There are he stresses few absolute certainties but from the vast body of evidence assembled during the last hundred years it is now possible to get much closer to the truth than ever before Who built the monuments and for what purpose How were the bluestones moved from the sacred mountains of the west to Salisbury Plain Who were the people responsible for this amazing undertaking and what did they think and believe **Engineering the Ancient World** Dick Parry,2005-09-29 How high were the walls of Jericho Where did

Nebuchanezzar get hold of all the bitumen he needed for the millions of bricks required to build Babylon Was the ancient Suez canal really 200km long and did 120 000 Egyptians die in the course of its construction The ancient historian Herodotus had answers to all these questions and filled many pages of his famous histories with descriptions of the wonders and marvels that he saw on his extensive travels through Egypt Greece Mesopotamia and Persia from the hanging gardens of Babylon to the temple of Diana at Ephesus In *Engineering the Ancient World* engineering expert Dick Parry goes back over Herodotus s footsteps and compares his accounts of the extraordinary achievements of ancient engineers builders and designers with what archaeologists and historians have since discovered In a fascinating interplay between ancient writer and modern scientist we learn that though we often have to take Herodotus with a pinch of salt he was not far short of the

truth With Dick Parry to guide us through the places that Herodotus visited we can appreciate the extraordinary technological genius which brought about these impressive monuments **The Secret Lives of Ghosts** Paul Gater,2013-11-18 This is the third book in Paul Gater's investigation of the supernatural Living with Ghosts and Ghosts at War were both popularly successful paperbacks Large Print and E book editions Paul has interviewed hundreds of ordinary people as well as psychics mediums and ghost hunters He reveals how far from being cold and inhuman the phantoms which haunt our towns and countrysides live busy passionate lives They are involved in love tangles vendettas jealous plots remorseful penitence fascinating tales of desire hate revenge and death covering many centuries Paul writes regular features on the supernatural for newspapers and magazines His books are critically acclaimed as absorbing and fascinating reads Here he also includes interviews with his wife Dilys Gater and friend Jaine Francis both professional mediums *Before the Delusion* William Gleeson,2020-06-16 In this thrilling novel Dr Liam Kelly PhD SJ is a renowned scholar of Biblical history who has spent a lifetime researching pre Christian documents in the Vatican archives With his knowledge of a dozen ancient languages he compiles a dossier of the secrets of the archives and uncovers startling linked secret meaning of the Pyramids Stonehenge But he learns the story can never be told because twisted through the threads of pagan history are other dark secrets the Church does not want to reveal Dr Kelly wrestles with his inner demons torn between loyalty to his Church and the temptation of telling the truth At risk to his personal safety he defies Church hierarchy to find a way to reveal the old knowledge of pagan mysteries *Fodor's England 2012* Fodor's Travel Publications, Inc. Staff,2011-12-20 Presents a travel guide to England and Wales providing recommendations on hotels restaurants shopping local transportation sights of interest and nightlife *The Stones and the Stars* Duncan Lunan,2012-11-28 There are at least 48 identified prehistoric stone circles in Scotland In truth very little is known about the people who erected them and ultimately about what the stone circles were for Most stone circles are astronomically aligned which has led to the modern debate about why the alignment was significant The megaliths certainly represented an enormous co operative effort would at the very least have demonstrated power and wealth and being set away from any dwellings probably served a ceremonial or perhaps religious purpose Observations at the site of the stone circles of solar lunar and stellar events have already cast light on some of the questions about the construction and use of ancient megalithic observatories In his capacity as manager of the Parks Department Astronomy Project author Duncan Lunan designed and built the first astronomically aligned stone circle in Britain in over 3 000 years The Stones and the Stars examines the case for astronomical alignments of stone circles and charts the development of a fascinating project with a strong scientific and historical background The work was documented in detail by the artist and photographer Gavin Roberts and this archive has been added to since so an appropriate selection of illustrations will bring the project vividly to life Stone Tools & Society Mark Edmonds,2012-11-12 Stone tools are the most durable and in some cases the only category of material evidence that students of prehistory have at their disposal

Exploring the changing character and context of stone tools in Neolithic and Bronze Age Britain Mark Edmonds examines the varied ways in which these artefacts were caught up in the fabric of past social life Key themes include stone tool procurement and production the nature of technological traditions stone tools and social identity the nature of exchange and the significance of depositional practices As well as contributing to current debate about the interpretation of material culture Dr Edmonds uses the evidence of stone tools to reconsider some of the major horizons of change in later British prehistory From the production of tools at spectacularly located quarries to their ceremonial burial or destruction at ritual monuments this well illustrated study demonstrates that our understanding of these varied and sometimes enigmatic artefacts requires a concern with their social as well as their practical dimensions
