**Prehistoric Carrying Capacity, a Model** Ezra B. W. Zubrow, 1974      **Handbook of Archaeological Methods**

Herbert D. G. Maschner, Christopher Chippindale, 2005 The Handbook of Archaeological Methods comprises 37 articles by leading archaeologists on the key methods used by archaeologists in the field in analysis in theory building and in managing cultural resources The book is destined to become the key reference work for archaeologists and their advanced students on contemporary archaeological methods      **Advances in Archaeological Method and Theory** Michael B

Schiffer, 2014-06-30 Advances in Archaeological Method and Theory Volume 1 presents the progressive explorations in methods and theory in archeology This book discusses the strategy for appraising significance which is needed to maximize the preservation and wise use of cultural resources Organized into 10 chapters this volume begins with an overview of planning for the best long term use of cultural resources which is the essence of conservation archeology This text then examines importance of the concept in cultural ecological studies Other chapters consider the methods used in determining the density size and growth rate of human populations This book discusses as well the use of demographic variables in archeological explanation The final chapter deals with the decisions that must be made in designing a survey and to identify the alternative consequences for data recovery of various strategies This book is a valuable resource for archeologists and planners      *Quantifying Stone Age Mobility* Iwona Sobkowiak-Tabaka, Aleksandr Diachenko, Andrzej Wiśniewski, 2022-06-02 This book focuses on the analysis of different scales of mobility and addresses parameters and proxies of population movement aiming at the formation of a ground for the further development of quantitative approaches In order to do so the volume explores wide scale mobility environmental contexts and cross cultural trends seasonal mobility of Paleolithic and Mesolithic hunter gatherers and migration niche construction utilitarian and non utilitarian factors of mobility Chapters in the volume include case studies from across Europe and Asia The editors introduction addresses the current state of mobility discourse in archaeology The chapters address questions related to parameters used to describe different factors of movement and examines correlations between parameters describing environmental diversity demography and the values representing spatial movement This volume is of interest to students and researchers of mobility of human beings in the past

**Simulating Prehistoric and Ancient Worlds** Juan A. Barceló, Florencia Del Castillo, 2016-10-20 This book presents a unique selection of fully reviewed extended papers originally presented at the Social Simulation Conference 2014 in Barcelona Spain Only papers on the simulation of historical processes have been selected the aim being to present theories and methods of computer simulation that can be relevant to understanding the past Applications range from the Paleolithic and the origins of social life up to the Roman Empire and Early Modern societies Case studies from Europe America Africa and Asia have been selected for publication The extensive introduction offers a thorough review of the computer simulation of social dynamics in past societies as a means of understanding human history This book will be of great interest to

researchers in the social sciences archaeology evolutionary anthropology and social history     A Linear Programming Model of Prehistoric Subsistence Optimization Van A. Reidhead,1981     Analytical Archaeology David L. Clarke,2014-10-24 This study was well established as a pioneer work on archaeological methodology the theoretical basis of all archaeological analysis whatever the period or era The first edition of the book presented and evaluated the radical changes in methodology which derived from developments in other disciplines such as cybernetics computer science and geography during the 1950s and 60s It argued that archaeology was a coherent discipline with its own methods and procedures and attempted to define the entities attributes artefacts types assemblages cultures and culture groups rigorously and consistently so that they could be applied to archaeological data The later edition continued the same general theory which is unparalleled in its scope and depth adding notes to help understanding of the advances in method and theory to support the student and professional archaeologist Review of the original publication One might venture that this is the most important archaeological work for twenty or thirty years and it will undoubtedly influence several future generations of archaeologists The Times Literary Supplement     The Biological Bases of Economic Behaviour David McFarland,2015-11-03 Human genetics has changed little over the past 20 000 years but human economic behaviour has changed a lot These changes are probably due to human cultural evolution But studies of human hunter gatherers and of a variety of other animal species show that their micro economic behaviour is much the same Whereas the standard economic analysis focuses on money the biological approach brings time and energy into the analysis Moreover humans and other animals tested under laboratory conditions do not exhibit the complexity of the results of field studies In other words results obtained in the real world are not the same as those obtained in the laboratory The Biological Bases of Economic Behaviour invites readers to approach micro economics from a biological viewpoint in a clear and introductory manner     **The Environment in Anthropology, Second Edition** Nora Haenn,Richard Wilk,Allison Harnish,2016-04-26 Presents ecology and current environmental studies from an anthropological point of view The Environment in Anthropology presents ecology and current environmental studies from an anthropological point of view From the classics to the most current scholarship this text connects the theory and practice in environment and anthropology providing readers with a strong intellectual foundation as well as offering practical tools for solving environmental problems Haenn Wilk and Harnish pose the most urgent questions of environmental protection How are environmental problems mediated by cultural values What are the environmental effects of urbanization When do environmentalists goals and actions conflict with those of indigenous peoples How can we assess the impact of environmentally correct businesses They also cover the fundamental topics of population growth large scale development biodiversity conservation sustainable environmental management indigenous groups consumption and globalization This revised edition addresses new topics such as water toxic waste neoliberalism environmental history environmental activism and REDD Reducing Emissions from Deforestation and Forest Degradation and it situates anthropology in the multi

disciplinary field of environmental research It also offers readers a guide for developing their own plan for environmental action This volume offers an introduction to the breadth of ecological and environmental anthropology as well as to its historical trends and current developments Balancing landmark essays with cutting edge scholarship bridging theory and practice and offering suggestions for further reading and new directions for research The Environment in Anthropology continues to provide the ideal introduction to a burgeoning field *Archaeology: The Key Concepts* Colin Renfrew, Paul Bahn, 2013-09-05 From two of the best known archaeological writers in the trade this outstanding resource provides a thorough survey of the key ideas in archaeology and how they impact on archaeological thinking and method Clearly written and easy to follow Archaeology The Key Concepts collates entries written specifically by field specialists and each entry offers a definition of the term its origins and development and all the major figures involved in the area The entries include thinking about landscape archaeology of cult and religion cultural evolution concepts of time urban societies the antiquity of humankind archaeology of gender feminist archaeology experimental archaeology multiregional evolution With guides to further reading extensive cross referencing and accessibly written for even beginner students this book is a superb guide for anyone studying teaching or with any interest in this fascinating subject *The American West* Walter Nugent, Martin Ridge, 1999-10-22 Those who appreciate the impact of history will be impressed with the selection of articles Nebraska History Designed for survey courses yet in depth enough to support intensive discussion these seventeen classic essays traverse the history of the American West from women s property rights in Spanish Mexican California to the Sand Creek Massacre of 1864 from homesteading and mining to the Great Depression and World War II Provocative and illuminating

Third Series Library of Congress. Copyright Office, 1976 Sources and Methods of Historical Demography J. Dennis Willigan, Katherine A. Lynch, 2013-10-22 Sources and Methods of Historical Demography covers the fundamental sources methods and approaches to explanatory modeling for describing analyzing and understanding demographic features of past societies The book discusses the intellectual ancestry of historical demographic research beginning in the 17th century as well as the logic of basic techniques for reconstructing and analyzing information from fundamental source materials The text also describes the full range of disciplines that have made major contributions to historical demography and examples of empirical research The book concludes by arguing the case for conducting historical demographic research with a broad interdisciplinary ideal in mind Historians and sociologists will find the book invaluable **The Foraging Spectrum** R. J. Kelly, 2007-12-31 The author wrote this book primarily for his archaeology students to show them how dangerous anthropological analogy is and how variable the actual practices of foragers of the recent past and today are His survey of anthropological literature points to differences in foraging societies patterns of diet mobility sharing land tenure exchange gender relations division of labour marriage descent and political

organisation By considering the actual not imagined reasons behind diverse behaviour this book argues for a revision of many archaeological models of prehistory From the reviews A n excellent overview of key issues in hunter gatherer studies Alan Barnard in *American Ethnologist* Not since *Man the Hunter* has there been such a synthesis and such a mix of stimulating ideas This will be the authoritative work on hunter gatherers for a good number of years Brian Hayden in *Canadian Journal of Archaeology* A uthoritative comprehensive and highly readable A well worn and heavily annotated copy should be the companion of anyone claiming an interest or expertise in present or past hunter gatherers Bruce Winterhalder in *American Antiquity* Prepublication praise The *Foraging Spectrum* is a well written scrupulously researched synthesis of modern approaches to foraging behavior both past and present David Hurst Thomas American Museum of Natural History A tour de force of scholarship in behavioral ecology Mathias Guenther Wilfred Laurier University

**Models in Archaeology** David L. Clarke, 2014-10-24 This major study reflects the increasing significance of careful model formation and testing in those academic subjects that are struggling from intuitive and aesthetic obscurantism toward a more disciplined and integrated approach to their fields of study The twenty six original contributions represent the carefully selected work of progressive archaeologists around the world covering the use of models on archaeological material of all kinds and from all periods from Palaeolithic to Medieval Their common theme is archaeological generalisation by means of explicit model building testing modification and reapplication The contributors seek to show that it is the use of certain models in particular ways that defines archaeology as the practice of one discipline with a set of general tenets that are as applicable in Peru as in Persia Australia as Alaska Sweden as Scotland on material from the second millennium B C to the second millennium A D They assert that careful model formulation within archaeology and the cautious exchange and testing of models within and beyond the discipline provides the only route to the formation of the common internationally valid body of theory which defines a vigorous and coherent discipline and distinguishes it from being a collection of merely regionally applicable special cases

*Prehistory in the Pacific Islands* John Terrell, 1986 How asks John Terrell in this richly illustrated and original book can we best account for the remarkable diversity of the Pacific Islanders in biology language and custom Traditionally scholars have recognized a simple racial division between Polynesians Micronesians Melanesians Australians and South east Asians peoples allegedly differing in physical appearance temperament achievements and perhaps even intelligence Terrell shows that such simple divisions do not fit the known facts and provide little more than a crude static picture of human diversity

**Demography in Archaeology** Andrew T. Chamberlain, 2006-07-06 Demography in Archaeology first published in 2006 is a review of current theory and method in the reconstruction of populations from archaeological data Starting with a summary of demographic concepts and methods the book examines historical and ethnographic sources of demographic evidence before addressing the methods by which reliable demographic estimates can be made from skeletal remains settlement evidence and modern and ancient biomolecules Recent debates in palaeodemography are evaluated new

statistical methods for palaeodemographic reconstruction are explained and the notion that past demographic structures and processes were substantially different from those pertaining today is critiqued. The book covers a wide span of evidence from the evolutionary background of human demography to the influence of natural and human induced catastrophes on population growth and survival. This is essential reading for any archaeologist or anthropologist with an interest in relating the results of field and laboratory studies to broader questions of population structure and dynamics.

**The Archaeology of the McCain Valley Study Area in Eastern San Diego County, California**, 1981

*Caribbean Paleodemography* L. Antonio Curet, 2005-06-05

A high significant discussion of Caribbean archaeology and a fascinating introduction to paleodemography. According to the European chronicles at the time of contact the Greater Antilles were inhabited by the Taino or Arawak Indians who were organized in hierarchical societies. Since its inception Caribbean archaeology has used population as an important variable in explaining many social, political and economic processes such as migration, changes in subsistence systems and the development of institutionalized social stratification. In *Caribbean Paleodemography* L. Antonio Curet argues that population has been used casually by Caribbean archaeologists and proposes more rigorous and promising ways in which demographic factors can be incorporated in our modeling of past human behavior. He analyzes a number of demographic issues in island archaeology at various levels of analysis including inter and intra island migration, carrying capacity, population structures, variables in prehistory, cultural changes and the relationship with material culture and social development. With this work Curet brings together the diverse theories on Greater Antilles island populations and the social and political forces governing their growth and migration.
