Prehistoric Slavic Contraction:

Prehistoric Slavic Contraction Jiří Marvan, 1979 This book outlines the origin and process of contraction as it took place in the proto dialects of the future Czech Serbian Polish Slovak Slovenian and Serbo Croatian languages in about the ninth to eleventh centuries The author's conception differs from the traditional attitude to the available data mainly in the assumption that the discriminative treatment of contraction by different proto dialects is not a handicap but rather an efficient and safe means of reconstructing territorial chronological and structural stratification This factor also replaces a flat one level description of contraction with a process consisting of several consecutive stages Although many gaps remain to be filled in the study of prehistoric Slavic contraction the author hopes that his work will open the way to further inquiry into the subject by dialectologists and historians of language

Slavic Prosody Christina Y. Bethin, 1998-07-13 In *Slavic Prosody* first published in 1998 Professor Bethin gives a coherent account of the Slavic languages at the time of their differentiation and relates these developments to issues in phonological theory First Professor Bethin argues that the syllable structure of Slavic changed before the fall of the jers and suggests that intrasyllabic and intersyllabic reorganization in Late Common Slavic was far more significant for Slavic prosody than the loss of weak jers She then makes a case for the existence of a bisyllabic prosodic domain in Late Common Slavic and trochaic metrical organization Finally she explores the implications of Slavic data for phonological theory discussing sonority skeletal structure the representation of length and prominence and language typology in some detail

and Prehistoric Development of the Irish Language Frederik Kortlandt, 2007-01-01 This volume offers a discussion of the phonological and morphological development of Old Irish and its Indo European origins The emphasis is on the relative chronology of sound changes and on the development of the verbal system Special attention is devoted to the origin of absolute and relative verb forms to the rise of the mutations to the role of thematic and athematic inflexion types in the formation of present classes preterits subjunctives and futures and to the development of deponents and passive forms Other topics include infixed and suffixed pronouns palatalization of consonants and labialization of vowels and the role of Continental Celtic in the reconstruction of Proto Celtic The final chapter provides a detailed analysis of the Latin and other Italic data which are essential to a reconstruction of Proto Italo Celtic The appendix contains a full reconstruction of the Old Irish verbal paradigms which renders the subject more easily accessible to a wider audience The book is of interest to Celticists Latinists Indo Europeanists and other historical linguists

Selected Writings on Slavic and General Linguistics Frederik Kortlandt, 2011-01-01 The larger part of the present volume is about Slavic historical linguistics while the second part is about more general issues and methodological aspects

The initial chapters contain a revision of the author's Slavic Accentuation and a discussion of the Slovene evidence for the Late Proto Slavic accentual system and of the Kiev Leaflets. These are complemented by an extensive review of Garde's theory and an introductory article about the work of earlier authors for those who are unfamiliar with the subject. Then follows a discussion of changes in the vowel system, Bulgarian developments, final syllables in Slavic, early changes in the consonant system and of Halle and Kiparsky's review of Garde's book. This results in a relative chronology of 70 stages from Proto Indo-European to Slavic. The following chapters deal with the progressive palatalization, the accentuation of West and South Slavic languages, various aspects of the Old Slovene manuscripts, the chronology of nominal paradigms and other issues under discussion in recent publications. The second part of the present volume contains a number of case studies exemplifying specific theoretical problems, most of them of a semantic nature. The synchronic studies deal with Russian and Japanese syntax and semantics, the diachronic studies with tonogenesis in different languages and with semantic reconstruction in Altaic and Chinese.

Handbook of Comparative and Historical Indo-European Linguistics Jared Klein, Brian Joseph, Matthias Fritz, 2018-06-11. This book presents the most comprehensive coverage of the field of Indo-European Linguistics in a century, focusing on the entire Indo-European family and treating each major branch and most minor languages. The collaborative work of 120 scholars from 22 countries, *Handbook of Comparative and Historical Indo-European Linguistics* combines the exhaustive coverage of an encyclopedia with the in-depth treatment of individual monographic studies.

Recent Advances in the Reconstruction of Common Slavic (1971-1982) Henrik Birnbaum, Peter Tristram Merrill, 1985.

Indo-Slavic Lexical Isoglosses and the Prehistoric Dispersal of Indo-Iranian Axel I. Palmér, 2025-05-29. During the past decade, the ancient DNA revolution has had a massive impact on the scholarly debates on the origins and dispersals of language families. Now linguists are asking the question: does linguistic and genetic evidence paint the same picture of the human past? This book sheds new light on an old hypothesis on the relatedness of Indo-Iranian and Balto-Slavic languages by studying unique lexical correspondences of these branches. It argues that their common Indo-Slavic origin supports an emerging picture based on ancient DNA, which shows a genetic relationship between prehistoric populations of Eastern Europe and Central Asia.
