Bulletin of the Chicago Academy of Sciences Chicago Academy of Sciences,1953 **Species Diversity of Animals in Japan** Masaharu Motokawa,Hiroshi Kajihara,2016-11-26 This book summarizes the status quo of the knowledge about the biodiversity in terrestrial freshwater and marine animals that live in Japan Consisting of some 6 800 islands that are arrayed for approximately 3 500 km from north to south the Japanese archipelago has a complex history in a paleogeographic formation process over time and harbors rich flora and fauna This work will contribute to establishing a general biogeographic theory in archipelagoes around continental shelves Facing the ongoing extinction crisis one of the most important tasks for our generation is to bequeath this precious natural heritage to future generations As the first step toward this goal a species list has been compiled through solid steady alpha taxonomic work in each taxon Furthermore the phylogeography and population genetic structure for each species is elucidated for deeper understanding of the local fauna the scientific results of which should be the basis for establishing conservation policies and strategies Also the problem of alien or introduced species is investigated as another threat to the native fauna Each of the 27 chapters is written by the most active specialist leading the field thus readers can acquire up to date knowledge of the animal species diversity and their formation process of Japanese animals in the most comprehensive form available This book is recommended for researchers and students who are interested in species diversity biogeography and phylogeography **The Philippine Journal of Science** ,1951 **Geological Survey Professional Paper** ,1966 **Systematic Zoology** ,1956 *Geological Survey Professional Paper* Geological Survey (U.S.),1965 **U.S. Geological Survey Professional Paper** ,1964

Naturalized Reptiles and Amphibians of the World Christopher Lever,2003 This book describes how the various alien reptiles and amphibians now living in the wild throughout the world were first introduced how they subsequently became naturalized their present distribution and status in those countries to which they were introduced and their ecological and socio economic impact if any on the native biota and local economies Many species have had a more or less neutral impact being neither beneficial nor harmful However several have had a positive ecological or socio economic impact while some such as the cane toad have had an extremely destructive effect The criteria for inclusion of a species are that it should have been imported from its natural range to a new country by human agency either accidentally or deliberately and that it should currently be established in the wild in self maintaining and self perpetuating populations unsupported by and independent of mankind *Russian Journal of Herpetology* ,1999 *Tadpoles of Taiwan* Wenhao Zhou,Junyi Lin,1997 *Bulletin of Fukuoka University of Education.
