

PREVENTING A BIOLOGICAL ARMS RACE

SUSAN WRIGHT

Preventing A Biological Arms Race

Susan Wright

Preventing A Biological Arms Race:

Preventing a Biochemical Arms Race Alexander Kelle, Kathryn Nixdorff, Malcolm Dando, 2012-10-31 Preventing a Biochemical Arms Race responds to a growing concern that changes in the life sciences and the nature of warfare could lead to a resurgent interest in chemical and biological weapons CBW capabilities By bringing together a wide range of historical material and current literature in the field of CBW arms control the book reveals how these two disparate fields might be integrated to precipitate a biochemical arms race among major powers rogue states or even non state actors It seeks to raise awareness among policy practitioners the academic community and the media that such an arms race may be looming if developments are left unattended and to provide policy options on how it and its devastating consequences could be avoided After identifying weaknesses in the international regime structures revolving around the Biological Weapons and Chemical Weapons Conventions it provides policy proposals to deal with gaps and shortcomings in each prohibition regime individually and then addresses the widening gap between them

Preventing a Biological Arms Race Susan Wright, 1990 This timely sourcebook presents the essential technical political legal and historical background needed for informed judgments about the recent expansion of military interest in the life sciences particularly in the weapons potential of the new biotechnology Beyond providing a history and analysis of trends in these areas Preventing a Biological Arms Race also develops the case for strengthening national and international commitments to biological disarmament and proposes courses of action to achieve this goal In theory Susan Wright observes the menace of biological warfare should no longer be with us Developing producing and stockpiling biological weapons are unconditionally banned by international treaty EastWest military rivalry and confrontations in the Middle East have eroded confidence in the treaty regime however The advent of genetic engineering and other new biotechnologies has revived military interest in biological weaponry generating concern about the potential weapons applications of biological research The 15 contributions by experts from a wide range of disciplines include a history of U S biological warfare policy analysis of the ethical issues posed by defensive biological warfare research case studies of alleged violations of the international legal regime prohibiting biological weapons reviews of that regime and proposals for strengthening the barriers to biological warfare A series of 14 appendices collect important data and documents related to biological weapons Susan Wright is a historian of science at the Residential College of the University of Michigan where she directs the Science and Society Program This book was prepared under the sponsorship of the Council for Responsible Genetics

Bulletin of the Atomic Scientists, 1991-09 **Biological Warfare and Disarmament** Susan Wright, 2002 This book proposes fresh approaches and concrete proposals to overcome one of the most intractable security problems of the twenty first century Visit our website for sample chapters [Chemical and Biological Warfare](#) Eric Croddy, 1997 Covers the history of this form of warfare information on chemical agents themselves as well as regulation controls and disposal policies Scientific research on CBW extending as far back as 1940 is organized under

categories of CBW agents and their corresponding subheadings *Controlling the Weapons of War* Brian Rappert, 2013-05-13 A fresh examination of the ethical and intellectual issues and dilemmas associated with attempts to establish formal humanitarian limits on weaponry This new study considers how governments non governmental organizations academics political commentators and others have responded to the predicaments associated with imposing classifications about the relative acceptability of force and what is accomplished in their strategies for doing so It develops these issues through combining thematic and conceptual analysis with the examination of varied cases of prohibitions on conventional and unconventional weapons through customary and statutory laws multilateral treaties UN resolutions and national legislation The book will appeal to students of security studies military technology peace studies international relations and discourse theory *War and Public Health* Barry S. Levy, Victor W. Sidel, 2000 *The Role and Control of Weapons in the 1990s* Frank Barnaby, 2021-05-30 This book first published in 1992 examines defence issues as the twentieth century drew to a close With the end of the Cold War many of the threats to European security such as the threat of nuclear war disappeared New ones however were emerging The rise of nationalism the spread of weapons of mass destruction to politically unstable countries the increase in world population the debt crisis all these contributed to security problems that needed to be resolved The book assesses the possibilities for future European defence and the role that the United States would play in it will it be prepared to stay in Europe under European leadership or must it dominate It also considers the capabilities offered by new military technology and the need for control of weapons of mass destruction **Molecular Politics** Susan Wright, 1994-10-17 The promise of genetic engineering in the early 1970s to profoundly reshape the living world activated a variety of social interests in its future promotion and control With public safety gene patents and the future of genetic research at stake a wide range of interest groups competed for control over this powerful new technology In this comparative study of the development of regulatory policy for genetic engineering in the United States and the United Kingdom Susan Wright analyzes government responses to the struggles among corporations scientists universities trade unions and public interest groups over regulating this new field Drawing on archival materials government records and interviews with industry executives politicians scientists trade unionists and others on both sides of the Atlantic *Molecular Politics* provides a comprehensive account of a crucial set of policy decisions and explores their implications for the political economy of science By combining methods from political science and the history of science Wright advances a provocative interpretation of the evolution of genetic engineering policy and makes a major contribution to science and public policy studies *Global Proliferation of Weapons of Mass Destruction* United States. Congress. Senate. Committee on Governmental Affairs. Permanent Subcommittee on Investigations, 1996 **Bioterrorism: The History of a Crisis in American Society** David McBride, 2022-07-30 Although at the start of the 21st century bioterrorism was newly feared by the public at large it is one threat that institutions have attempted to anticipate for years Originally published in 2003 and now

with a new introduction this unique 2 volume collection provides a multi disciplinary resource on the challenges bioterrorism poses for American society and institutions from both legal and political institutions on one hand to public health and medical institutions on the other Volume one documents and analyses the challenge bioterrorism poses to these political economic and legal institutions putting bioterrorism into its historical context as a problem discussed and anticipated by government for decades Volume two documents the challenges bioterrorism poses to public health and public policy as a weapon of disease and fear The materials in these volumes provide case histories and discourse by specialists relating to the ways that the bioterrorism threat has been perceived and approached by US health and law institutions

Governance of Biotechnology in Post-Soviet Russia Tatyana Novossiolova, 2017-07-19 This book provides an up to date analysis of the governance of biotechnology in post Soviet Russia The rapid advancement of the life sciences over the past few decades promises to bring tremendous benefits but also raises significant social ethical legal and security risks Nations adaptability to the twin challenges of attempting to secure the benefits while reducing the risks and threats is a large and still burgeoning governance challenge Here Novossiolova cuts across several sets of literature bringing together elements of the anthropological study of culture history of science and technology management and international governance and Soviet history and politics Due to its multidisciplinary approach in depth analysis accessible style and extensive reference list this text offers invaluable insights into the normative dimensions of the governance of biotechnology unpacking both the formal and intangible attributes and artefacts of biotechnology policy and practice in Russia

Rethinking the Unthinkable Ivo H. Daalder, Terry Terriff, 2014-02-04 Rethinking the Unthinkable examines the future direction of nuclear arms control in the post Cold War security environment Believing that the new environment requires a radical rethinking of the purpose and role of nuclear weapons in international politics the contributors address many fundamental issues influencing further US Russian and European nuclear arms reductions This volume is a product of the Project on Rethinking Arms Control sponsored by the Center for International and Security Studies in Maryland

Bulletin of the Atomic Scientists, 1991-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world

Science, History and Social Activism Garland E. Allen, Roy M. MacLeod, 2013-03-14 To earn a degree every doctoral candidate should go out to Harvard Square find an audience and explain his or her dissertation Everett Mendelsohn s worldly advice to successive generations of students whether apocryphal or real has for over forty years spoken both to the essence of his scholarship and to the role of the scholar Possibly no one has done more to establish the history of the life sciences as a recognized university discipline in the United States and to inspire a critical concern for the ways in which science and technology operate as central features of Western society This book is both an act of homage and of commemoration to Professor Mendelsohn on his 70th birthday As befits its subject the work it presents is original comparative wide ranging and

new Since 1960 Everett Mendelsohn has been identified with Harvard University and with its Department of the History of Science Those that know him as a teacher will also know him as a scholar In 1968 he began and after 30 years has just bequeathed to others the editorship of the Journal of the History of Biology among the earliest and one of the most important publications in its field At the same time he has been a pioneer in the social history and sociology of science He has formed particularly close working relationships with colleagues in Sweden and Germany as witnessed by his editorial presence in the Sociology of Science Yearbook **The Use of Animals in Research by the Department of Defense** United States.

Congress. House. Committee on Armed Services. Research and Technology Subcommittee,1995 **Terrorism and Public Health** Barry S. Levy M.D.,Victor W. Sidel M.D.,2002-11-14 In a wide ranging timely discussion of urgent issues this volume examines the health consequences of the recent terrorist attacks in the United States and systematically reviews information on explosives incendiaries and small arms as well as biologic chemical nuclear radiologic and other radioactive weapons that may be used by terrorists In a constructive approach the authors discuss what needs to be done to improve the public health and medical care systems in preparation for possible future terrorist attacks and threats and for addressing widespread public health problems more effectively They also explore the origins of terrorism and discuss the civil rights and human rights issues related to government responses to terrorism Well written well organized and up to date the book should be essential reading for many health professionals students and others concerned with terrorism and its health consequences

Bulletin of the Atomic Scientists ,1991-09 *Prevention of a Biological and Toxin Arms Race and the Responsibility of Scientists* Erhard Geissler,Robert H. Haynes,1991 *APAIS 1991: Australian public affairs information service* ,
