Apocalyptic Transformation Elizabeth K. Rosen, 2008-02-15 Since its inception the story of the apocalypse has been used as a means by which to understand the world and one s place in it The

appeal of the apocalyptic myth is largely rooted in its ability to make sense of instances of crisis by incorporating those crises into a larger plan for history and an end of time that God has planned. Apocalypse is both an organizing principle to be imposed on an overwhelming seemingly disordered universe and a fundamentally moral story which offers hope of a new world where good and evil can be clearly delineated and addressed. But all of the traditional functions and comforts of the apocalyptic myth are challenged when the myth collides with postmodernism. The characteristics that define a work as postmodern ultimately destabilize the traits that make the apocalyptic myth unique. Using the work of Terry Gilliam, Don DeLillo, Kurt Vonnegut, and other writers in the genre, *Apocalyptic Transformation* examines the collision of the postmodern mode and the apocalyptic myth, explores the process of secularizing this religious story and the reasons for doing so, and asks the question: What happens when an author undermines the grand narrative of the apocalypse?

Fictionality and Multimodal Narratives Torsa Ghosal, Alison Gibbons, 2023. *Fictionality and Multimodal Narratives* interrogates the multimodal relationship between fictionality and factuality. The contemporary discussion about fictionality coincides with an increase in anxiety regarding the categories of fact and fiction in popular culture and global media. Today's media-saturated historical moment and political climate give a sense of urgency to the concept of fictionality, distinct from fiction, specifically in relation to modes and media of discourse. Torsa Ghosal and Alison Gibbons explicitly interrogate the relationship of fictionality with multimodal strategies of narrative construction in the present media ecology. Contributors consider the ways narrative structures, their reception, and their theoretical frameworks in narratology are influenced and changed by media composition, particularly new media. By accounting for the relationship of multimodal composition with the ontological complexity of narrative worlds, *Fictionality and Multimodal Narratives* fills a critical gap in contemporary narratology, the discipline that has to date contributed most to the conceptualization of fictionality.

Language, Literature and Critical Practice David Birch, 2005-08-18. Using a wide-ranging variety of texts, the author reviews and evaluates a broad range of approaches to textual commentary, introducing the reader to the fundamental distinction between actual and virtual worlds in critical practice.
