Big Cats Tom Brakefield, Combines photography research and personal observations of the worlds eight big cats One for the Road Bjørn Christian Tørrissen, 2008-01-07 Building on experience from 60 countries worth of independent travel the author takes you on three journeys to places you may never have considered visiting although you probably should and you definitely could Learn about a low budget cruise to Antarctica understand what the Trans Siberian Railway really is like enjoy the natural wonders of Southern Africa The book is a fun read but you will also learn about far away destinations and about how to travel independently anywhere It s not a travel guide or a travel journal it s both More details including free downloads available from <http://bjornfree.com> *Write from the Start! Writing Lessons Grd 5* Kristine Brown, 2008-04 Teach students different types of writing including narratives poems reports explanations and more Sample texts and a variety of activities help guide students and give them practice in writing similar types of text Additional activities for grammar punctuation vocabulary and spelling are also included **Zoo-A-Logical Math** Thomas Kearney, 2012-04 The work for this book began with a course I created and taught called Animal Behavior I always knew that there was a strong magnetic bond between people and animals but it wasn t until I began working on my curriculum that I truly found out how strong this bond really was Millions of people young and old will visit zoos and aquariums each year People stand in front of the animals hypnotized by the every movement of the animal People seemed to be looking not just at the animal but almost as if they were looking inside these animals wondering and questioning about the lives of some of our most distant animal relatives In my classroom I found the exact same kinds of responses The discussions and questions of my students motivated me to share with you the lives and abilities of some of the most amazing living creatures in the world People realize that humans are also animals but the belief that we have superior intelligence and problem solving abilities makes us think we are far superior to all of the rest of our Animal World As I began to learn more and lead my student discussions I soon realized that maybe our intelligence was the only thing that we really did have in our superiority over the rest of our animal relatives I began to look into the idea of comparing humans to animals in a wide variety of behaviors and activities and soon a brand new window into the REAL world of animals began to open up I soon realized that even the most insignificant animals in our world were really superstars when compared to humans By using math we are able to truly get a comparison of animals and how they relate to our own human abilities As I began to create the problems and do the math it became very evident that I began to get the responses that I had hoped for I soon began to call these responses the Wow factor A number of times the teachers that have worked on the problems would actually go back and do the problems a second time because there has to be a mistake or no way that this can be true There were no mistakes and the math did not lie The math allowed us to look at the animals in a totally different way I hope that you too will be amazed and wowed by some of these amazing animals that we share our world with *Shamanism and the Origin of States* Sarah Milledge Nelson, 2019-07-23 Sarah Milledge Nelson s bold thesis is

that the development of states in East Asia China Japan Korea was an outgrowth of the leadership in smaller communities guided by shamans Using a mixture of historical documents mythology archaeological data and ethnographic studies of contemporary shamans she builds a case for shamans being the driving force behind the blossoming of complex societies More interesting shamans in East Asia are generally women who used their access to the spirit world to take leadership roles This work challenges traditional interpretations growth of Asian states which is overlaid with later Confucian notions of gender roles Written at a level accessible for undergraduates this concise work will be fascinating reading for those interested in East Asian archaeology politics and society in gender roles and in shamanism *Hearing on H.R. 2376, the National Fish and Wildlife Foundation Establishment Act Amendments of 1997* United States. that it is possible to live with and truly understand bears in the wild And for five years now Russell and his partner artist and photographer Maureen Enns have spent summers on the Kamchatka peninsula located on the northeast coast of Russia and home of the densest population of brown bears in the world Grizzly Heart tells the remarkable story of how Russell and Enns have defied the preconceptions of wildlife officials and the general public by living unthreatened and respected among the grizzlies of Kamchatka In an honest and immediate style Russell tells of the trials and successes of their years in the field from convincing Russian officials to allow them to study to adopting three bear cubs left orphaned when their mother was killed by a hunter and teaching these cubs how to survive in the wild to raising environmental awareness through art Through a combination of careful study and personal dedication Russell and Enns are persuading people to reconsider the age old image of the grizzly bear as a ferocious man eater and perpetual threat Through their actions they demonstrate that it is possible to forge a mutually respectful relationship with these majestic giants and provide compelling reasons for altering our culture We have been able to live beautifully with these animals with no serious threat because of what we ve learned Hopefully sharing what we learn will help people and be a big help to our bears too
