Myslobodsky, 2013-06-17 Recently there has been a renewal of interest in the broad and loosely bounded range of phenomena called deception and self deception This volume addresses this interest shared by philosophers social and clinical psychologists and more recently neuroscientists and cognitive scientists Expert contributors provide timely reliable and insightful coverage of the normal range of errors in perception memory and behavior They place these phenomena on a continuum with various syndromes and neuropsychiatric diseases where falsehood in perception self perception cognition and behaviors are a peculiar sign Leading authorities examine the various forms of mythomania deception and self deception ranging from the mundane to the bizarre such as imposture confabulations minimization of symptomatology denial and anosognosia Although the many diverse phenomena discussed here share a family resemblance they are unlikely to have a common neurological machinery In order to reach an explanation for these phenomena a reliable pattern of lawful behavior must be delineated It would then be possible to develop reasonable explanations based upon the underlying neurobiological processes that give rise to deficiencies designated as the mythomanias The chapters herein begin to provide an outline of such a development Taken as a whole the collection is consistent with the emerging gospel indicating that neither the

machinery of nature nor the forces of nurture taken alone are capable of explaining what makes cognition and behaviors aberrant

Reason and Culture Ernest Gellner, 1992-08-03 Since the 17th century Western society has had a turbulent relationship with Reason Descartes set out to reorganize all his opinions in the light of Reason allowing as Pascal bitterly reproached him nothing else In the course of the centuries which followed the relationship with Reason became the object of a vigorous often passionate debate David Hume declared Reason to be impotent Immanuel Kant observed that men suffered from misology as the result of their disappointed expectations from Reason G W F Hegel declared that the main insight of philosophy consisted of the realization that Reason masterminded and guided all history The debate has not remained restricted to philosophy Max Weber the most influential modern sociologist was obsessed with the distinctive role of Reason in Western society and the part it played in engendering industrialism Social anthropologists have been preoccupied both with the universality and the diversity of conceptual thought Emile Durkheim taught them to ask why all men were rational whilst Max Weber taught sociologists to ask why some men were more rational than others This book brings together the philosophical historical and sociological discussions of rationality and strives to make clear the underlying issues and the continuity of the debate in the various disciplines

Confucian Marxism
 Weigang Chen, 2013-09-25 Buttressed by an autocratic system China's colossal economic growth over the past decades seems to have had the paradoxical effect of undermining the foundation of Western domination but at the same time invigorating Eurocentricism In particular it highlights the current relevance of the central conviction of Weber's Orient the absence of civic roots in non Western societies will create a kind of uncivic capitalist system in which one has no choice but to seek to compensate for instabilities through authoritarian institutions Does this mean that the West may alone afford to harmonize political stability with the universalistic ideal of justice as the basic structure of society If not how then is it possible to develop a notion of the primacy of social justice that transcends the limits of liberal democracy This book aims at addressing these timely questions by drawing on Confucian Marxism a distinctive perspective on civil society
