Rebels And Reformers Of The Airways:

REBEL & REFORMER OF AIRWAYS Ronald Edward George Davies, 1987-06-17 Twenty five profiles of airline pioneers
Airline Executives and Federal Regulation Walter David Lewis, 2000 This book is a collection of eight case studies of relationships between airline executives and federal regulatory agencies from the passage of the Air Commerce Act in 1926 to the Airline Deregulation Act of 1978 By focusing on the lives and personalities of individual entrepreneurs W David Lewis and his contributors hope to explore the interaction between technology government regulation and entrepreneurship Each essay in the book focuses on a particular airline executive such as Eddie Rickenbacker Robert Six and Donald Nyrop Lewis has been careful to give a variety of perspective Airlines of various types are represented large and small scheduled and unscheduled Some of the executives profiled were known for having adversative relationships with federal regulators whereas others wholeheartedly accepted regulation and thrived under it There have been public calls for a return to airline regulation and Lewis thinks it is not inconceivable that regulation may ultimately return if problems continue and conditions deteriorate further But he says it is well to remember that deregulation occurred because there were flaws in the regulatory system it replaced This collection of essays scholarly and well documented but written in a lively style suitable for specialists and nonspecialists alike provides a long range perspective on the issue of airline deregulation **Rebels and Reformers of**

the Airways Ronald Edward George Davies, 1987-01-01 Beretter om 25 kendte personligheder og foregangsmand inden for den civile luftfart i USA Canada Storbritannien Europa Latinamerika Asien og Australien Over Empires and Oceans Robert Bluffield, 2014-11-19 This a story of pioneers intrepid aviators adventurers tycoons and innovators It is also a story of dedication and determination for despite fixed wing aircraft proving their value over the battlefields of the Western Front during the First World War convincing governments and public alike that they had a role in peacetime proved far more challenging The Americans as inventors of heavier than air powered flight had briefly courted with a passenger airline across Tampa Bay in 1914 yet it took a further nine years for mail to be flown coast to coast In 1919 a British company made the first international scheduled flight between London and Paris but the continuation of regular services was thwarted by a less than enthusiastic government that allowed its generously subsidised French competition for a short time at least to fly cross Channel passenger schedules unimpeded The British eventually realized that fast links with their Empire were vital followed the example of the French and Dutch who had forged air links with their cousins in North Africa and the Far East Meanwhile in South America the Germans forbidden under the Versailles Treaty from any major aircraft building were establishing cunning supremacy by forming airlines throughout South America and in China While America awaited a transcontinental passenger service Juan Trippe's Pan American Airways was crossing swords with Ralph O'Neill of New York Rio Buenos Aires Line NYRBA for air supremacy between the US Brazil Argentina and elsewhere in Latin America that led to the formation of arguably the world's greatest airline In Russia Igor Sikorsky had built a vast passenger carrying aircraft the Il ya Muromets

and politicians debated whether giant airships or fixed wing aircraft should rule the skies an issue that was put firmly to bed when the mighty German airship Hindenburg exploded while mooring at Lakehurst in 1937 Robert Bluffield's highly researched and detailed account tells the dramatic stories of explorers such as Kingsford Smith Lindbergh and Cobham and flamboyant entrepreneurs some well known others forgotten who risked fortunes and reputations to follow their dreams of reaching and ruling the skies over empires continents and oceans Against bewildering adversity corruption underhanded deals and dwindling resources these tenacious individuals braved the elements using primitive entirely unsuitable equipment to establish earth shrinking aerial services that criss crossed the great oceans and the globe's most inhospitable territories These are the stories of those pioneers of A ropostale CNAC Air Orient Imperial Airways KLM Deutsche Luft Hansa Pan Am SCADTA The Condor Syndicat Qantas and others that had a far reaching impact on the way the modern world would travel

Winged Crusade, 2003 This bibliography lists a selected portion of the McDermott Cadet Library's holdings on the American experience of manned powered flight during the twentieth century Excluded are newspaper articles most pictorial works works dealing with lighter than air flight and studies of rotorcraft *The Flight of the Starling* Iain Hutchison, 1992 Eric Starling shot to fame landing a two seater bi plane on a Calais street in darkness From this inauspicious start he became one of that select breed who pioneered commercial flying in Scotland This is his story **Hard Landing** Thomas Petzinger, Jr., 2010-12-01 In this updated paperback edition of a rich readable and authoritative Fortune book Wall Street Journal reporter Petzinger tells the dramatic story of how a dozen men including Robert Crandall of American Airlines Frank Borman of Eastern and Richard Ferris of United battled for control of the world's airlines **Come Fly the World** Julia Cooke, 2021 A lively unexpected portrait of the jet age stewardesses serving on iconic Pan Am airways between 1966 and 1975

Aviator of Fortune Erik Benson, 2006 To understand Yerex's remarkable career Erik Benson focuses on the uniqueness of the entrepreneur's background one that enabled him to empathize with both Great Britain and the United States and to foster working relationships with these rivals Yerex's dealings with the two countries shed new light on the development of aviation in the 1930s and 1940s at a time when Pan American ruled the skies of the western hemisphere when revolutions and coups rocked governments and when fortunes waited to be made and lost **Flying Across America** Daniel L. Rust, 2012-11-20 Americans who now endure the inconveniences of crowded airports packed airplanes and missed connections might not realize that flying was once an elegant exhilarating adventure In this colorful history Daniel L. Rust traces the evolution of commercial air travel from the first transcontinental expeditions of the 1920s through the luxurious airline environments of the 1960s to the more hectic fatiguing experiences of flying in the post 9 11 era In the beginning flying coast to coast was an exciting yet uncomfortable journey of nearly forty eight hours that required numerous stops and overnight travel by train With time and technical innovation passengers became increasingly removed both physically and psychologically from the raw experience of flying Faster planes pressurized cabins onboard amenities and stronger safety

precautions made flying more convenient and predictable but also less evocative and sensational Prior to the 1980s Americans dressed for air travel in their formal best and enjoyed such luxurious onboard amenities as delicious meals and ample cabin space What made air travel glamorous however also made it more expensive With deregulation in 1978 cost reductions reduced flying to a more tedious and after 9 11 more regimented experience Rust's narrative brims with firsthand accounts from such celebrities as Will Rogers and from ordinary Americans Enlivened by more than 100 illustrations including vintage brochures posters and photographs *Flying Across America* reminds today's airline passengers of what they have gained and what they have lost in the transcontinental flying experience *The Hump* John D. Plating, 2011-02-08

Chronicling the most ambitious airlift in history Carried out over arguably the world's most rugged terrain in its most inhospitable weather system and under the constant threat of enemy attack the trans-Himalayan airlift of World War II delivered nearly 740 000 tons of cargo to China making it possible for Chinese forces to wage war against Japan This operation dwarfed the supply delivery by land over the Burma and Ledo Roads and represented the fullest expression of the U S government's commitment to China In this groundbreaking work the first concentrated historical study of the world's first sustained combat airlift operation John D. Plating argues that the Hump airlift was initially undertaken to serve as a display of American support for its Chinese ally which had been at war with Japan since 1937 However by 1944 with the airlift's capability gaining momentum American strategists shifted the purpose of air operations to focus on supplying American forces in China in preparation for the U S's final assault on Japan From the standpoint of war materiel the airlift was the precondition that made possible all other allied military action in the China Burma India theater where Allied troops were most commonly inserted supplied and extracted by air Drawing on extensive research that includes Chinese and Japanese archives Plating tells a spellbinding story in a context that relates it to the larger movements of the war and reveals its significance in terms of the development of military air power The Hump demonstrates the operation's far reaching legacy as it became the example and prototype of the Berlin Airlift the first air battle of the Cold War The Hump operation also bore significantly on the initial moves of the Chinese Civil War when Air Transport Command aircraft moved entire armies of Nationalist troops hundreds of miles in mere days in order to prevent Communist forces from being the ones to accept the Japanese surrender Department of the Interior and Related Agencies Appropriations for 1989: Justification of the budget estimates, Department of Energy United States. Schwantes, 2003-03-10 How trains cars and planes helped tame and transform the American West Reconsidering a Century of Flight Roger D. Launius, Janet R. Daly Bednarek, 2015-12-01 On December 17 1903 Orville and Wilbur Wright soared into history during a twelve second flight on a

secluded North Carolina beach Commemorating the 100th anniversary of the first flight these essays chart the central role that aviation played in twentieth century history and capture the spirit of innovation and adventure that has characterized the history of flight The contributors all leading aerospace historians consider four broad themes relating to the development of flight technology innovation and the technology of flight civil aeronautics and government policy aerial warfare and aviation in the American imagination Through their attention to the political economic military and cultural history of flight the authors establish that the Wrights invention and all that followed in both air and space was one of the most significant technologies of the twentieth century fundamentally reshaping our world Supported by the First Flight Centennial Commission The contributors are Janet R Daly Bednarek Tami Davis Biddle Roger E Bilstein Hans Joachim Braun David T Courtwright Anne Collins Goodyear Roger D Launius William M Leary David D Lee W David Lewis John H Morrow Dominick A Pisano and A Timothy Warnock

Transport Regulation Matters J. McConville, 1997-01-01 Transport has become a major concern on both social and economic grounds in the late twentieth century This concern arises from a perception of the industry s failure to respond to the rapid growth in demand and to the threat of congestion and environmental pollution A solution has been sought in economic policies dominated by ideas of liberalization and deregulation

Transport in Britain Philip Bagwell, Peter J. Lyth, 2002-01-01 British transport 1750 2000

Taking Flight M. Houston Johnson, 2019-02-21 Taking Flight explores the emergence of commercial aviation between the world wars and in the midst of the Great Depression to show that the industry s dramatic growth resulted from a unique combination of federal policy technological innovations and public interest in air travel Historian M Houston Johnson V traces the evolution of commercial flying from the US Army s trial airmail service in the spring of 1918 to the passage of the pivotal Air Commerce Act of 1938 Johnson emphasizes the role of federal policy particularly as guided by both Herbert Hoover and Franklin Roosevelt to reveal the close working relationship between federal officials and industry leaders as well as an increasing dependence on federal assistance by airline airframe and engine manufacturers Taking Flight highlights the federal government s successful efforts to foster a nascent industry in the midst of an economic crisis without resorting to nationalization a path taken by virtually all European countries during the same era It also underscores an important point of continuity between Hoover s policies and Roosevelt s New Deal a sharp departure from many interpretations of Depression era business history and shows how both governmental and corporate actors were able to harness America s ongoing fascination with flying to further a larger economic agenda and facilitate the creation of the world s largest and most efficient commercial aviation industry This glimpse into the golden age of flight contributes not only to the history of aviation but also to the larger history of the United States during the Great Depression and the period between the world wars

Flying the Flag H. Dienel, P. Lyth, 1999-01-12 Since the end of World War II European airlines have revealed their own operational style By analyzing seven European flag carriers Dienel and Lyth provide a comparative study of the airline business covering government policy

aircraft procurement network growth commercial performance and collaboration with other airlines and transport modes This study also seeks to explain why national flag carriers have survived in an age of globalization and strategic alliances A concluding chapter views the contrasting American air transport industry **Transforming the Skies** Peter Reese, 2018-02-16 Following the Armistice of 1918 the British Air Industry and the newly founded RAF held a low place in national priorities The RAF was rapidly run down with the infant airlines being given the least possible help and this neglect continued during the 1920s The RAF's role was questioned and civilian air travel remained a dream for most and the province of the well heeled few But the breakdown of the Geneva Disarmament Talks led to renewed interest in the National Air Force and the rise of the European dictators brought calls for rapid modernisation and interceptor aircraft together with the development of further European civilian air routes Here Peter Reese charts the dramatic changes that swept aviation across the dynamic interwar period revealing the transformative last minute preparations for defence in a world where much depended on the contributions of some outstanding individuals
