Rebuilding The House:

Rebuilding the Houses of Parliament Henrik Schoenefeldt, 2020-12-30 Rebuilding the Houses of Parliament explores the history of the UK Houses of Parliament in Westminster from an environmental design perspective and the role David Boswell Reid played in the development of the original ventilation and climate control system in parliament This book retraces and critically examines the evolution of the environmental principles underlying the design of the Houses of Parliament engaging with fundamental questions about air quality energy efficiency and thermal comfort This yields insights into the historic methods of environmental design that were characterised by physical experimentation and post occupancy evaluation Rebuilding the Houses of Parliament examines the history of the buildings operation studying the practical reality of its performance in use and offers the opportunity to reflect on current challenges faced by architects and engineers adapting to the realities of climate change This book is an ideal read for academics politicians and practitioners with an interest in architectural history and heritage theory engineering and conservation

Renovations John Marchese, 2001 An award winning journalist recounts the grand adventure of rebuilding a house with his father of finding new faith in their relationship and of living out the American Dream A thoughtful sensitive funny mid life odyssey Carol Saline author of *Sisters and Mothers* it s about a father and son tackling a project that seems woefully ill advised and through humorous and oftentimes touching situations emerging from it with a deeper understanding of each other *Renovations* is about the ambiguous influences of family history and the enduring inspiration of the American Dream

Rebuilding Asia Following Natural Disasters Patrick Daly, R. Michael Feener, 2016-04-06 Providing a detailed and comparative assessment of the humanitarian responses to a series of major disasters in Asia over the past two decades including massive earthquakes volcanic eruptions and tsunamis this book explores complex and changing understandings and practices of relief recovery and reconstruction These critical investigations raise questions about the position and responsibilities of a growing range of stakeholders and provide in depth explorations of the ways in which local communities are transformed on multiple levels not only by the impact of disaster events but also by the experiences of rebuilding This timely volume highlights how the experiences of Asia can contribute towards post disaster responses globally to safeguard future communities and reduce vulnerabilities This is a valuable resource for academic researchers interested in post disaster transformations and development studies practitioners in NGOs and government officials dealing with disaster response and disaster risk reduction

London Bridge and its Houses, c. 1209-1761 Dorian Gerhold, 2021-10-31 London Bridge lined with houses from end to end was one of the most extraordinary structures ever seen in London It was home to over 500 people perched above the rushing waters of the Thames and was one of the city s main shopping streets It is among the most familiar images of London in the past but little has previously been known about the houses and the people who lived and worked in them This book uses plentiful newly discovered evidence including detailed descriptions of nearly every house to tell the story of

the bridge and its houses and inhabitants With the new information it is possible to reconstruct the plan of the bridge and houses in the seventeenth century to trace the history of each house back through rentals and a survey to 1358 revealing the original layout to date most of the houses which appear in later views and to show how the houses and their occupants changed during five and half centuries The book describes what stopped the houses falling into the river how the houses were gradually enlarged what their layout was inside what goods were sold on the bridge and how these changed over time the extensive rebuilding in 1477 1548 and 1683 96 and the removal of the houses around 1760 There are many new discoveries about the structure of the bridge the width of the roadway the original layout of the houses how the houses were supported the size and internal planning of the houses the quality of their architecture and the trades practised on the bridge The book includes five newly commissioned reconstruction drawings showing what we now know about the bridge and its houses
