Recent Urban And Regional Developments In Poland And The Netherlands:

Spatial Planning and Urban Development in the New EU Member States Uwe Altröck, Simon Güntner, 2017-03-02

Accession to the EU in May 2004 was a historic milestone for the spatial and urban development of the new member states. Meanwhile the social and economic transition during the pre accession phase already brought about radical changes in national urban systems and new challenges for regional development. In this edited volume a carefully selected and specially commissioned set of articles written by experts from both the new and the old EU member states presents a comprehensive assessment of emerging political and planning solutions at local, regional, national and EU levels. Topics include brownfield redevelopment in the Czech Republic, urban sprawl in Hungary, the upgrading and integration of marginalized Roma settlements in Eastern Slovakia and sustainable coastal management in Cyprus.

Foreign Direct Investment and Regional Development in East Central Europe and the Former Soviet Union David Turnock, 2017-11-28. With the achievement of further EU and NATO enlargement a critical political and economic lens is now focused on East Central Europe and to a lesser extent the other former communist states. Economic growth in each transition state and more broadly the region pivots around the prospects for foreign direct investment (FDI) with decisions on where foreign investors will locate their projects now vitally important. This book, the first one devoted to a geographical survey concentrating specifically on FDI in the region, brings together a wide range of prominent authors from the US and Europe including the late Frank Carter to provide a timely and critical examination of the importance of foreign investment. It presents a detailed analysis of location patterns and their significance for regional development with particular emphasis given to the important socioeconomic and political consequences of uneven distribution of FDI across the region and its constituent countries. Divided into two parts, the book first deals with general overarching themes and issues before applying these to more specific country case studies. The second part deals with regional studies focusing broadly on the Western Balkans and Bulgaria before looking at specific economic sectors in individual countries.

Entrepreneurial Neighbourhoods Maarten van Ham, Darja Reuschke, Reinout Kleinhans, Colin Mason, Stephen Syrett, 2017-07-28. Despite the growing evidence on the importance of the neighbourhood, entrepreneurship studies have largely neglected the role of neighbourhoods. This book addresses the nexus between entrepreneurship, neighbourhoods and communities, confirming not only the importance of the local in entrepreneurship but also filling huge gaps in the knowledge base regarding this tripartite relationship.
