Register Of International Rivers

R Barnett

Register Of International Rivers:

Register of International Rivers Sam Stuart, 2013-09-03 Register of International Rivers comprises international river and lake basins that form a substantial portion of the earth's water resources available for human use and consumption. This Register is prepared by the United Nations Department of Economic and Social Affairs for sessions of the Economic and Social Council's Committee on Natural Resources. This book is divided into seven sections that comprise separate river basins communicating directly with the final recipient of the water including oceans, closed inland seas and lakes. It includes all the world's separate basins shared by two or more countries and in some cases most of the basin area is confined to one country and only a small part of it extends to one or more countries. All data are organized according to five major continental divisions: Africa, North and Central America, South America, Asia and Europe. Two categories of tables are prepared for each major continental subdivision. One is a list of countries sharing river basins with other countries while the other is a list of rivers and lakes forming international boundaries and showing the approximate length of the boundary waters. **Register of International Rivers** United Nations Staff, 1978-07

REGISTER OF INTERNATIONAL RIVERS. Centre for Natural Resources, Energy, and Transport (United Nations), **Conflict and Cooperation on South Asia's International Rivers**

Salman M. A. Salman, Kishor Uprety, 2002 Conflict and Cooperation on South Asia's International Rivers traces the development of international water law. This book focuses on the hydro-politics of four countries in the South Asia region: Bangladesh, India, Nepal and Pakistan. It analyzes the problems that these countries have encountered as riparians of international rivers and how they have addressed these problems. In particular, this study reviews the treaty regimes governing the Indus River basin, the Ganges River basin and the Kosi, Gandaki and Mahakali river basins. Each of these regimes is described in depth with special attention devoted to the main problems each of these treaties sought to address. The authors also review the treaty experience and offer observations on bilateralism and multilateralism. **Register of**

International Rivers Tun Myint, 2012-01-01 Employing a sophisticated understanding of the interplay between states and nonstate actors, Tun Myint develops a convincing account of the evolution of governance systems for the Rhine and Mekong river basins. In the process, he not only adds to our knowledge of water management at the international level but also deepens our appreciation of the various roles that nonstate actors play in international environmental governance. Oran Young, University of California, Santa Barbara. US Comparative studies of great river systems and the politics of their regulation are rare. Far rarer still are comparisons of this historical depth, analytical sophistication, attention to local detail and to the contingencies that make breakthroughs possible. Tun Myint's study of the Rhine and Mekong will inspire and inform future studies of both river and environmental politics. James C. Scott, Yale University, US. This is a must read for

scholars and water governance practitioners as it addresses the underexploited role of non state actors and local citizens in the field of international water governance The book fills in this knowledge gap by offering an inspiring refinement of the theory of polycentricity Evidence is found by well written and attractive in depth case studies dealing with the international clean up of the Rhine and the construction of the Pak Mun Dam in the Mekong basin Carel Dieperink Utrecht University The Netherlands This superb analysis of water governance in the Rhine and Mekong river basins should be read by everyone interested in the challenges of international water management Thomas Bernauer Swiss Federal Institute of Technology ETH Zurich Switzerland This important book employs the theory of polycentricity a system with several centres as an analytical concept to explain the multilayered international environmental governance of river basins It introduces a new methodological framework to deconstruct and investigate the dynamics of citizens states and non state actors in world politics via the context of river basin governance The methodology is tested through in depth field based case studies illustrating how local citizens and industries in the Mekong and Rhine river basins participate in transnational environmental governance at both local and international levels Tun Myint expertly presents both a methodology and theory to conceive polycentricity of world politics as a major intellectual milestone in theorizing world politics Providing nuanced details of cases showing the challenges and feasibilities of incorporating multiple actors into a governance framework the book provides careful analysis into the power of non state actors This book will prove insightful for scholars and postgraduate students in international relations international development global environmental governance and international business administration It will also prove an invaluable resource for practitioners and policymakers

River Basin Organizations in Water Diplomacy Anoulak Kittikhoun, Susanne Schmeier, 2020-11-19 Will tensions and disputes among states sharing international water courses and lakes turn into active conflicts Addressing this question the book shows that these concerns are more prominent due to the locations and underlying political dynamics of some of these large rivers and the strategic interests of major powers Written by a combination of leading practitioners and academics this book shows that states are more prone to cooperate and manage their transboundary issues over the use of their common water resources through peaceful means and the key institutions they employ are international river basin organizations RBOs Far from being mere technical institutions RBOs are key mechanisms of water diplomacy with capacity and effectiveness varying on four key interrelated factors their legal and institutional development and the influence of their technical and strategic resources The basins analyzed span all continents from both developed and developing basins including the Columbia Great Lakes Colorado Senegal Niger Nile Congo Jordan Helmand Aral Sea Mekong Danube and Rhine Contributing to the academic discourse on transboundary water management and water conflict and cooperation the book provides insights to policy makers on which water diplomacy engagements can be successful the strengths to build on and the pitfalls to avoid so that shared water resources are managed in a cooperative sustainable and stable way

Managing Water Conflict Ashok Swain, 2004-06

Water scarcity and the use of international river system resources can not only cause international conflict but can also bring about peace and co operation This book looks at the current stresses and likely future scenarios *Rivers of Fire* Arnon Soffer,Murray Rosovsky,Nina Copaken,1999-02-24 In a never ending battle to match population growth with food and energy production the countries of the Middle East have been frenziedly developing water resources including international rivers and groundwater without considering their neighbors needs The inevitable result has been more frequent and increasingly bitter conflicts At the same time a halting Arab Israeli peace process spurred by the collapse of the Soviet Union continues Are we indeed entering a new era in a new Middle East Do the region s leaders understand that reality has changed and that a transition is inevitable Focusing on international rivers and ground water in the region this timely study provides thoughtful_if pessimistic_answers to these questions Encompassing all water sources in the Middle East Arnon Soffer thoroughly explores the Nile Tigris Euphrates Jordan Orontes and Litani Rivers as well as international groundwater He also weighs the implications of going to war over water and such unconventional solutions to the water shortage as desalination and importation **Register of International River Basins** Vereinte Nationen Generalsekretär,1977 *Water Resources and Conflict in the Middle East* Nurit Kliot,2005-07-28 Offers a complete reference to the hydrological as well as social economic political and legal issues in the region It shows how water shortages threaten the renewal of conflict and disruption in the Euphrates Tigris Nile and Jordan basins **Rivers Unbound** Ananth Padmanabhan,Nabeela Siddiqui,Gnana Sanga Mithra S,2025-08-19 Rivers have long been the lifeblood of civilizations shaping landscapes sustaining livelihoods and serving as silent witnesses to the unfolding narratives of human history From the Indus to the Ganges the Nile to the Amazon rivers have defined communities facilitated commerce and inspired cultural and spiritual traditions However in an era marked by climate change geopolitical tensions and environmental degradation rivers are increasingly sites of contestation over access governance and rights The interplay of social currents legal tides and ecological imperatives calls for a multidisciplinary approach to understanding and managing these vital water bodies *Rivers Unbound Exploring Social Currents Legal Tides and Stories of Flow* emerges from the International Conference on Rivers 2024 where scholars policymakers legal experts environmentalists and community advocates convened to engage in critical discourse on the challenges and possibilities of river governance **Bridges Over Water: Understanding Transboundary Water Conflict, Negotiation And Cooperation (Second Edition)** Ariel Dinar,Shlomi Dinar,Daene C Mckinney,Stephen C Mccaffrey,2013-02-21 *Bridges over Water* places the study of transboundary water conflicts negotiation and cooperation in the context of various disciplines such as international relations international law international negotiations and economics It demonstrates their application using various quantitative approaches such as river basin modeling quantitative negotiation theory and game theory Case studies of particular transboundary river basins lakes and aquifers are also considered This second edition updates the literature on international water and in depth analyses on political developments and cooperation

between riparian states With an appended chapter on principles and practices of negotiation and a new case study on the La Plata Basin this edition is a timely update to the field of transboundary water studies Defining Effective Transboundary Water Cooperation Melissa McCracken, 2022-03-30 This book establishes a framework for defining transboundary water cooperation and a methodology for evaluating its effectiveness which will contribute to more effective and therefore successful cooperation processes With the increasing focus on transboundary cooperation as a part of the Sustainable Development Goal Framework there is global recognition of transboundary water cooperation as a tool for improved governance and management of transboundary surface and groundwaters However there is not an agreed upon definition of transboundary water cooperation in the literature or in practice This book develops the Four Frames of Transboundary Water Cooperation which is a neutral modular framework for developing context specific explanatory definitions of transboundary water cooperation in basins and aquifers The Four Frames of Cooperation are legal institutional relational and outcome However we need to move beyond defining cooperation to understand better measures of the quality and effectiveness of cooperative processes The Weighted Model of Effective Cooperation presents a first step in qualitatively evaluating the effectiveness of transboundary water cooperation This model defines effective transboundary water cooperation and operationalizes a method to evaluate the effectiveness of cooperative processes over internationally shared waters Effective cooperation emphasizes the relational and outcome frames of cooperation while working towards equitability and sustainability Together the Four Frames of Cooperation and the Weighted Model of Effective Cooperation will improve the understanding of cooperation and encourage a detailed evaluation of the quality success and effectiveness of cooperative processes This book will be of great interest to students and scholars of water resource management water governance and environmental politics It will also appeal to policymakers and professionals working in the fields of water conflict water diplomacy and international cooperation **Handbook on the Governance and Politics of Water Resources** Oliver Fritsch, David Benson, 2024-06-05 This cutting edge Handbook provides a global perspective on the current issues affecting water politics and governance Focusing in particular on the policy making process and the power dynamics that it involves it showcases the emerging diversity of objectives instruments and governance approaches in the field of water resources

University of Pennsylvania Law Review and American Law Register, 1918 **Conference on the Unification of River Law** League of Nations. Committee for Communications and Transit. Committee for the Unification of River Law, 1929

Power and Water in Central Asia Filippo Menga, 2017-12-01 Water is an irreplaceable and transient resource which crosses political boundaries in the form of rivers lakes and groundwater aquifers The collapse of the Soviet Union in 1991 led to the birth of fifteen countries including the five Central Asian republics Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan When the USSR ceased to exist so did the centralised Soviet resource distribution system that managed the exchange and allocation of water energy and food supplies A whole new set of international relations emerged and the newly

formed Central Asian governments had to redefine the policies related to the exchange and sharing of their natural resources. This book analyses the role of state power in transboundary water relations. It provides an in depth study of the evolution of interstate relations in Central Asia in the field of water from 1991-2015. Taking as a case study the planned construction of the Rogun and Kambarata dams in Tajikistan and Kyrgyzstan, the author examines various forms of overt and covert power shaping interstate relations and the way hegemonic and counter hegemonic measures are put in place in an international river basin. He argues that the intimate correlation between the concepts of power and hegemony can offer key insights to the analysis and understanding of transboundary water relations. While the analytical focus is placed on state power, the book demonstrates that hegemonic and counter hegemonic tactics represent the ways in which power is wielded and observed. Offering fresh theoretical interpretations to the subjects of power and counter hegemony in the Aral Sea basin, this book puts forward the original circle of hydro hegemony, an analytical framework in which the various forms of power are connective in the function of hegemony. It will be of interest to scholars in the field of water and environmental politics and Central Asian Studies.

SOCIAL AND ECONOMIC DEVELOPMENT - Volume VI Salustiano del Campo, Tomoko Hamada, Giancarlo Barbieroli, Saskia Sassen, Eleonora Barbieri-Masini, Paul Nchoji Nkwi, Owen Sichone, Abubakar Momoh, 2010-11-15.
