Robots in the Japanese Economy Kuni Sadamoto,1981 *Robots in the Japanese Economy* Kuni Sadamoto,1981

The World Yearbook of Robotics Research and Development Sbornik Statei,2013-04-17 How quickly the technological flavour of the month changes At the beginning of the 1980 s many saw robotics as being something of a panacea for those problems in the manufacturing industries which had been exacerbated by the world recession Those working at the time in the field of robotics stressed that robots themselves were only part of the solution Yet in many quarters the hype for the new technology apparently knew few bounds resulting inexorably in many industries painfully discovering for themselves a new realism closely followed by disillusionment In its wider sense the term robotics covers an extremely broad spectrum of technologies ranging from extremely flexible highly sensory and integrated systems capable of handling a very diverse product range through to comparatively inflexible high volume systems which can merely handle slightly different variations of the same basic product As a result of the one buzzword referring to such a variety of actual system types the disillusionment which started to become apparent during the early 1980 s acted as something of a double edged sword A given company might consider a particular robotics based technological solution to its production problems find that it was unsuitable and so renounce all robotics approaches as inappropriate Yet just because one position on that spectrum of technological solutions was unsuitable for the company should not have led them to assume that there was no other robotics solution that was appropriate *U.S./Japan Foreign Trade* Rita E. Neri,2018-02-21 This bibliography first published in 1988 consists of annotated entries of monographs and journal articles published in English that discuss socio economic aspects of Japanese society as well as the general and economic dynamics of United States Japan trade relations Emphasis is on the Japanese perspective *The ^ADigital Flood* Dr. James W. Silverman,Scott Stern,2017-09-29 Despite recent advances in our understanding of how innovation and entrepreneurship impact the creation and appropriation of value numerous questions remain unanswered This volume draws together scholars working at the forefront of entrepreneurship strategy and innovation related domains to

explore these questions **Production and Use of Industrial Robots** United Nations. Economic Commission for Europe, 1985 **The World Yearbook of Robotics Research and Development** , 1985 Production and Use of Industrial Robots: Trends in the manufacture and use of industrial robots , 1983 Robotization in Small Scale Industry of Japan and West-Germany Karl-Heinz Schmidt, 1983 Making Things Better , 1990 **Robots Won't Save Japan** James Adrian Wright, 2023-02-15 Robots Won't Save Japan addresses the Japanese government's efforts to develop care robots in response to the challenges of an aging population rising demand for eldercare and a critical shortage of care workers Drawing on ethnographic research at key sites of Japanese robot development and implementation James Wright reveals how such devices are likely to transform the practices organization meanings and ethics of caregiving if implemented at scale This new form of techno welfare state that Japan is prototyping involves a reconfiguration of care that deskills and devalues care work and reduces opportunities for human social interaction and relationship building Moreover contrary to expectations that care robots will save labor and reduce health care expenditures robots cost more money and require additional human labor to tend to the machines As Wright shows robots alone will not rescue Japan from its care crisis The attempts to implement robot care instead point to the importance of looking beyond such techno fixes to consider how to support rather than undermine the human times spaces and relationships necessary for sustainably cultivating good care
